Other geologists at the congress suggested that the commission should cover also the relationship between the materials in their natural place and the work of engineers. On 17 December the assembly voted the following motion unanimously: However on 21 December the delegates decided to immediately hold a new session during which the International Association for Engineering Geology IAEG was unanimously created. Bain USA , M. Balasundaram India , L. Calembert Belgium , R. Chaturvedi India , G. Chowdhary India , E. Beneo Italy , K. Erguvanli Turkey , A. Hamza India , M. Jain India , L. Kent South Africa , V. Krishnaswamy India , J. Lakshmanan France , A. Mahendra India , M. Manfredi Italy , V. Prasad India , B. Ramchandran India , J. Rosenqvist Norway , B. Sanatkumar India , P. Srinivasan India , L. Srivastava India and M. They elected a provisional committee to steer the initial activity. By the end of , the committee was composed as follows: Beneo Italy ; V. Balasundaram India ; K. Erguvanli Turkey ; A. Ruiz Brazil ; G. Champetier de Ribes France , as Treasurer. The purposes and goals of the association were defined as follows: The scope of engineering geology covers the applications of earth sciences to engineering, planning, construction, prospecting, testing and processing of related materials"; "Article 2: The aims of the IAEG are to encourage research, training and dissemination of knowledge by developing the international cooperation in its relation to engineering". At the time of the congress, the country was deeply affected by the movement of soviet troops. Nevertheless, the general assembly went ahead and the statutes were ratified and an executive committee was elected for a period of four years to replace the provisional committee. Calembert Belgium , Vice-president for Europe; L. Oborn New Zealand , vice president for Australasia; H. Janjic Yugoslavia ; R. Glossop United Kingdom ; A. Drucker Federal Republic of Germany ; J. Landslides, under the responsibility of J. Pasek Czechoslovakia ; Soluble rocks, under the responsibility of F. Reuter East Germany and K. Erguvanli Turkey ; Geotechnical mapping, under the responsibility of M. Finally, it was decided to organize future congresses specifically for the IAEG and to hold these alternately with the International Geological Congresses, which means that both events would take place every four years but the IAEG would have a congress with a general assembly every two years and scientific symposia in the years in between. Starting as a simple artisanal publication, the Bulletin became a scientific reference among the most respected journals in the fields of engineering geology, the environment and other geosciences, and "the official journal of the IAEG". The second statutes were approved by the general assembly in Kyoto Japan in A new definition of engineering geology was given, which reflected the experience collected during the previous 25 years and read as follows: North America - members;.
