Feedback Create interactive forms that can be used by anyone, ensuring privacy and independence for all Adobe Acrobat Pro DC form creation tools make it simple to create interactive form fields that are accessible to users with disabilities, including those with visual impairments and mobility impairments. This is typically achieved by adding properly structured fillable fields to the PDF file, setting a tab order to control a logical sequence, and by adding tooltips to fields providing an accessible label and instructions to users of assistive technology. To determine if a PDF document should be an interactive form, examine the file for the presence of form fields, or areas in the document where users are asked to provide information that you would like to collect. If the form contains these qualities, the document can be made electronically fillable, allowing users to complete the form online. Many people with disabilities can fill out electronic forms unassisted, which is a huge advantage over print forms. An accessible electronic form can provide privacy, security, and independence to users with disabilities. There are several items to be aware of when creating accessible electronic forms. Specifically, authors must provide: Accessible and on-screen labels Instructions including field constraints and requirements A logical tab order No keyboard traps or non-user initiated changes in focus Error identification and suggestions when known Error prevention for legal or financial information Note: These must be provided in a way that is available to all users, including those using assistive technology. For example, using the Tooltip property value, it is possible to add text to a check box on an RSVP that users can use to indicate their intention to attend an awards dinner. This document describes the various types of form objects and provides implementation strategies for accessibility in electronic forms. Allows the user to type in text, such as name, address, or phone number. Presents yes-or-no choices for individual items. If the form contains multiple check boxes, the user can typically select as many or few of these as needed. Presents a group of choices from which the user can select only one item from the group. All radio buttons with the same name work together as a group. Displays a list of options the user can select. List boxes have a field property that lets the user Shift-click or Control-click to select multiple items on the list. Allows the user either choose an item from a pop-up menu or type in a value. These buttons can be customized with images, text, and visual changes triggered by mouse actions. Action buttons are different from radio buttons, which represent data choices made by the user. Allows the user to electronically sign a PDF document with a digital signature. Encodes the input form selected fields and displays it as a visual pattern that can be interpreted by decoding software or hardware available separately. Authors can also create forms manually in Acrobat, or individually add form fields to an existing document using the form tools. A form element and form objects for each field will be created in the Tags pane as part of this process. Examine the document carefully to verify that Acrobat accurately detected the fields and labeled them properly. To make an electronic form fillable with the wizard start by selecting the Prepare Forms Wizard from the Tools pane. Prepare Form Tool Figure 2. Form field auto detection is on by default. From the Select a File or Scan a Document to begin pane, select one of the following options and then follow the on-screen instructions. Scan a Document Form: This scans a paper form and converts it to a PDF form. From here, you can add, edit or delete the automatically created form fields. Forms Editing Mode During form field detection, Acrobat may have missed some fields, or created unnecessary ones. It may also have created fields of the wrong type. Verify the fields and field names on the form. The Forms Editing toolbar to may be used to add more fields. You can also right-click on the form to add, edit, or delete fields. Fields may then be selected from the Forms Editing Toolbar that presents the eight possible Acrobat field types. The Fields pane shows any interactive fields that are currently part of the form. You can exit this mode by selecting the Close Forms Editing button above the Preview button. For each field type, it is possible to set a variety of options through the form field Properties dialog box. The forms tools can be accessed in one of two ways: Right click over the form to add new fields. Form Editing Toolbar Figure 5.

Right Click Form Editing Menu Positioning and Naming the New Form Field Once a form tool has been selected, a crosshair cursor appears, and a blue region defines the outline of the form object selected for placement. On the page, click where the field is to be added. A field with a default size. To create a field using a custom size, drag a rectangle to set the dimensions of the field. In the Field Name box, type the name of the field. Select a name that is relevant and descriptive to make organizing and collecting the data easier. This name is not shown to users of the form. Field Name Box To test the form, select the Preview button at the top of the document window. Preview lets you view a form the way a form recipient would, and gives the author a chance to verify the appearance and behavior of the form. If a form is being previewed, click the Edit button to return to Forms Editing Mode. Next, set the accessible name for the field. This is how the field will be announced by assistive technology. Other properties such as required field notation may also be set here. Each time the page is clicked, a new field is added to the form. To exit this mode, press the Esc key or click the Select Object Tool button. To modify the properties of a field, double-click it. Form Field Properties How a form field behaves is determined by settings in the Properties dialog box for that individual field. Properties can be set that apply formatting, determine how the form field information relates to other form fields, impose limitations on what the user can enter in the form field, trigger custom scripts, and so forth. A variety of properties can be set for an Acrobat form field, depending on the form field type. The properties for each type of form field are selected on a series of tabs. When a property is changed, it is applied as soon as another property is selected or when Enter is pressed. All form field types have a General tab, Appearance tab, and an Actions tab. Other tabs appear only in specific types of form fields. The Options tab appears for most form field types, but the options available are unique to each type of form field. You can leave the Properties dialog box open if you want to change multiple fields at once. Setting Tooltips for Form Fields The tooltip field on the General tab of the field properties dialog is the most important item for form fields. The content of the tooltip will be announced by screen readers as the accessible name of the field. This property provides the user with information and instructions about the field. The tooltip also displays text that users may find helpful in filling in the form field. Tooltips appear when the pointer hovers briefly over the form field. To set the tooltip property of a form field: Set Name and Tooltip Value for Form Field Tooltips for Radio Buttons To create a radio button group, where only one field can be selected at a time, assign each field the same name and the same tooltip, but provide different Button Choices values. The radio button choice is a field in the Options tab of the Radio Button Properties dialog. The tooltip and button value will be announced to users of assistive technology for each radio button. When the same radio button name is assigned to a radio button, the tooltip field should automatically be populated with the tooltip text from the other radio buttons in the group. Create four radio buttons. Properties for multiple form fields can be set at once. To edit multiple form fields, select the fields to edit. Change the properties on each of the available tabs, as needed. The property is changed as soon as another property is selected or Enter is pressed. Activate the Close button or press enter to close the Properties dialog box. If form fields are selected that have different property values, some options in the Properties dialog box are not available. Otherwise, changes to the available options are applied to all selected form fields. To avoid accidental changes to the form field, select Locked in the lower left corner of the Properties dialog box before it is closed. To unlock, click the check box again. Deleting a Form Field With the document in Prepare Forms mode, click on the field to delete and do any of the following: Right-click and select Delete Note: Field Actions There are many different actions that can be associated with a form field. These include actions based on mouse entry, mouse exit, mouse up, mouse down, on focus, and on blur. It is important to note that mouse-only actions will not be keyboard accessible. All functionality must be keyboard-accessible without requiring the use of a mouse. These actions should be used with caution. The user must be able to navigate past form fields without having the keyboard focus trapped.

Advertised as an all-encompassing solution, it seems great for heavy-duty PDF users. Here are the best PDF readers for Windows 10 to consider. Read More rather than using the web version. I think this will give me the most accurate comparison. That is, for free. The main pane in each program lets you view your uploaded PDF. There are tools to edit it on the right and left bars. Check out the top pane and the tools inside it, also. But the company has a plethora of other useful software packages that most people know nothing about. The options at the top of the interface offer more features, but some of these are a bit redundant. For example, there are several Edit and View buttons, which contribute to the toolbars being overly cluttered. PDFescape has a similar feature, though instead of a list the software lists your recent documents in thumbnail views. And the winner is: In contrast, Acrobat only lets you review certain options at one time. You can easily just click the X to get out of any PDF management pane you have open, but I like being able to see all my options in one location, which PDFescape allows. Combine Files allows for combining material from several PDF files into one. Then just click Combine. Your combined PDFs will show up in a new Binder tab. You can easily adjust the order of the combined pages by clicking Organize Pages. You can also combine files in PDFescape. Upload both PDF files you want to merge and click Combine. Just like with Acrobat, this combines both PDFs into a single document. However, it is worth pointing out that some of these features can be accessed with the still free online version of PDFescape. You can easily crop photos, enjoy a convenient automatic spell check feature, and watch formatting automatically adjust to added text. Adobe Acrobat Pro DC. Read More , but then not let me rearrange those file pages. Here are our favorite PDF tools for your iPad. After filling out a W-2 form for tax purposes or reviewing your rental contract, for example. Go back to the web platform we discussed in the previous section and upload the PDF you need to sign. Click on the Text feature to type out any information you need to include in blank fields throughout the document. Sign your name, and click the double green arrow button to automatically save and download your signed PDF file. Choose Sign from the top toolbar. Then, simply type, draw, or upload an image of your signature to the software and click Apply. Okay, both of these programs can work equally well to sign your PDF documents, but PDFescape will only let you sign your documents if you upload them to the web platform. If you already have the free software downloaded on your computer, this just creates an extra step. With Acrobat Pro DC, however, you get easily accessible and convenient signing features right at your fingertips. The apps are free with your Adobe subscription, so if you really feel like editing PDFs from your iPhone or Android device, you certainly can. The Final Verdict While PDFescape is convenient if you just need to combine a few PDFs or use the web portal to sign a contract, the free software fell tremendously short in this comparison. This article covers the key features you must know to create and edit PDFs like a pro. Read More , signing, and manipulation since you can do pretty much anything you want to your PDFs with your Acrobat subscription. There is a Compare feature that contrasts differences between two PDFs. You can also integrate with Dropbox or track PDF forms sent to others. The free version of PDFescape has numerous limitations where the Adobe program performs easily. I think it is, but what do you think? However, they fall short when it comes to editing. Read More , or have all of the features you need in one place? Or can you recommend another free PDF editor with more options and fewer limitations?

Reflow paragraphs and correct typos without returning to your original source document. This document provides instructions for Acrobat DC and Acrobat You can correct typos, change fonts and typeface size, adjust alignment, add superscripts or subscripts, and resize text or paragraphs. You edit a PDF one page at a time. For more extensive editing or to make global formatting changes across the entire document, edit the original document. Then edit, and re-create the PDF. Each text box is independent, and inserting text in one text block does not push down an adjacent text box or reflow to the next page. Outlines identify the text and images you can edit. Select the text you want to edit. Edit the text by doing one of the following: Type new text to replace the selected text, or press Delete to remove it. You can create new list items, convert an existing paragraph to a list item, convert an existing list item to a paragraph, and convert from one list type to another. Select a font, font size, or other formatting options under Format in the right pane. You can also use the advanced format options, such as line spacing, character spacing, horizontal scaling, stroke width, and color. Formatting options in the right pane Note: For legal reasons, you must have purchased a font and have it installed on your system to revise text using that font. You can edit text only if the font used for that text is installed on your system. Click outside the selection to deselect it and start over. Add or edit a numbered or bulleted list You can add items to a numbered or bulleted list, create new list items, convert an existing paragraph to a list item, convert an existing list item to a paragraph, and convert from one list type to another. Acrobat detects paragraphs and lists separately. Therefore, both paragraph and list may appear in the same bounding box while editing. After you save or save as the changed file and reopen it, the paragraph and list items are displayed in separate bounding boxes. To add or remove items from a numbered or bulleted list: You can add or remove items to the list at all nested levels using the same familiar controls that you use in MS Office. For example, press Enter at the end of a list item to insert a new row. Press Backspace to remove the new row and position the cursor back to the end of the previous list item. To create a numbered or bulleted list: Place the cursor in the document at the location where you want to add a new list. To convert an existing paragraph to a list item: To convert an existing list item to a paragraph: Select all items in the list. The appropriate list type is highlighted under Format in the right pane. Click the highlighted list type. To convert from one list type to another: Place the cursor in the list item or select all items in the list. Choose the appropriate list type bulleted or numbered under Format in the right pane. You can also use Keyboard to add a list item. Drag to define the width of the text block you want to add. For vertical text, right-click the text box, and choose Make Text Direction Vertical. The Add text tool intelligently detects the following text properties of text close to the point of click: Font name, size, and color Character, paragraph, and line spacing Horizontal scaling These text properties are automatically applied to the text that you add at the point of click. You can change the text properties using the options under Format in the right pane. To resize the text box, drag a selection handle. To move the text box, place the pointer over the line of the bounding box avoid the selection handles. When the cursor changes to Move pointer , drag the box to the new location. To maintain alignment with the other list items, press Shift as you drag. Move, rotate, or resize a text box You can move or rotate text boxes on a page. Edits are confined to the page. You cannot drag a text block to another page, or move or rotate individual characters or words within a text box. However, you can copy text boxes and paste them on another page. Resizing a text box causes the text to reflow within the new text box boundaries. It does not change the size of the text. To change the font size, see Edit or format text in a PDF. As with other text edits, resizing is limited to the current page. Text does not flow to the next page. Click the text box you want to move, rotate, or resize. A bounding box with selection handles surrounds the text box you clicked. Do any of the following: Move Place the pointer over the line of the bounding box avoid the selection handles.
