The first adaptation of Charles Portis's novel starred John Wayne and while noted for its excellence as a film, it certainly toned down the violent imagery and brutality in the book. The Coen brothers pay homage to the book by retaining much of the story; framing it squarely in the eyes of the original narrator Mattie Ross and ending the film.

Like we said, a rum bunch. All, however, are utterly brilliant. Great Expectations Charles Dickens Film: David Lean There have been untold adaptations of Dickens novels, but this remains the benchmark. Martin Scorsese In what remains his most uncharacteristic film to date – yes, even more so than Hugo – Martin Scorsese shines an uncomfortable light upon the romantic and societal practices of upper class life in New York in the s. A truly fantastic film of a fantastic book. Doctor Zhivago Boris Pasternak Film: The Godfather Mario Puzo Film: Unsurprisingly, therefore, the film stays faithful to the manner and quality of the book. Some backstories are eliminated, while others appear in The Godfather II. The ending of the film is actually more gloomy than the book. But both film and book complement each other perfectly. A three-in-a-bed-violent-death romp, if you will. Film noir at its finest and one of the best film adaptations ever. Moby-Dick Herman Melville Film: Gregory Peck mesmerises as the unbalanced Captain Ahab, while Orson Welles nearly steals the show with a wonderful cameo. Brighton Rock Graham Greene Film: Richard Attenborough sparkles as the psychopathic gangster, while the criminal underbelly of interwar Brighton is also bought chillingly to life. Trainspotting Irvine Welsh Film: It sounds remarkable now, but Welsh had made fiction cool again when he penned this, ahem, addictive book: They came as close with the sequel to recapturing lightning in a bottle as anyone ever manages. Empire Of The Sun J. The 39 Steps John Buchan Film: Upon its release in – just a year after the book was published – it was regarded as a powerful statement of intent from the then fledgling movie industry. The tone is exquisite, capturing the ideas of dignity, service and loyalty impeccably. Wiseguy Nicholas Pileggi Film: Martin Scorsese Wiseguy by journalist Nicolas Pileggi is a celebrated work of non-fiction that told the story of mobster-turned-FBI informant Henry Hill and his life in and around the Lucchese family for 25 years. Martin Scorsese, who knew this subject intimately, was the ideal director to bring this fascinating story to life. His film, retitled Goodfellas, is possibly the greatest gangster movie of all time. Lolita Vladimir Nabokov Film: The subject material – essentially paedophilia – had to be toned down in the censorious Sixties and much of the graphic sexual scenes contained in the book had to be implied on film. That Kubrick made such a colourful and provocative film is a testament to his genius behind the camera. Fight Club Chuck Palahniuk Film: This was not the case with Fight Club. It was visceral, inflammatory and, above all, entertaining. A brilliant book, and film. How to squeeze that into a feature film? Well, Tomas Alfredson did it with aplomb. Gary Oldman is an inspired choice as the understated, stoic and anti-Bond George Smiley: Confidential James Ellroy Film: Confidential was the novel that finally saw James Ellroy compared to the likes of Raymond Chandler and Dashiell Hammett, those arbiters of hard boiled fiction. In doing so, he reinvented film noir for the dying embers of the 20th Century. The Shining Stephen King Film: Kesey claimed to have hated it, despite never allegedly never seeing it. Whatever, the film is hypnotic from beginning to end. This version is the one that is remembered to this day, though. Rum Punch Elmore Leonard Film: Jackie Brown, Director: Thankfully, it was the first version. It pays handsome and stylish dividends. Selznick In truth it would have been a folly not to include this Tinseltown classic. This dramatic retelling of the events preceding, during and following the American Civil War is rightly feted. True Grit Charles Portis Film: The Coen brothers pay homage to the book by retaining much of the story; framing it squarely in the eyes of the original narrator Mattie Ross and ending the film like the book, 25 years after the events depicted. Brokeback Mountain Anne Proulx Film: Noonan encapsulated the spirit of the book in his magical film and in doing so could be held directly responsible for huge swathes of folk experimenting with vegetarianism in the mid-Nineties. The Body Stephen King Film: Although as American as apple pie lots of which is regurgitated in the film, the universal themes of childhood, loss of innocence and looking back upon such times with acceptable nostalgia strike a chord with everyone. Emma Thompson penned the screenplay and starred alongside Kate Winslet and Hugh Grant in

what is accepted as the best Austen adaptation to date. There are no happy endings and no saccharine-coated pill to help ease the dissection of social class and no attempt. It is the film that the book deserves. Marvellous in other words. The long-gestating sequel successfully recreates the magic. An ominous story of a husband and wife attempting to recover from the death of their daughter by staying in Venice, it reeks of menacing and barely disguised violence. A startling, terrifying film that lingers long in the memory. Russell A critical and commercial success, David O. A superlative and sympathetically handled adaptation " a fact that deserves mention because of the sensitive subject material of bipolar disorder " it surprises, entertains and provokes in equal measure. Bradley Cooper is astounding in a serious role, and Jennifer Lawrence demonstrates a maturity way beyond her years. Follow ShortList on Flipboard for more great book content Topics.

2: The 16 best and worst book-to-film adaptations in the past 10 years - CBS News

The movie adaptation of Paper Towns was released in Summer starring Nat Wolff and Cara Delevingne, and directed by Jake Schreier. The Circle, by Dave Eggers The Circle is the world's most.

Buena Vista Distribution Book lovers can be the harshest movie critics. In some cases the authors were fans of the new interpretations of their books, but in many cases they hated them as much as the dedicated readers who showed up at the theater. The filmmaker changed much about the book, most glaringly the dynamics of the Torrance family. Many other important parts were changed as well, including character deaths. Beloved author Roald Dahl famously hated the movie adaptation so much that he never allowed another of his books to be made into a film during his lifetime, but he was definitely in the minority in not liking it. The movie turned his dark cautionary tale of naughty children, a demented candy maker and his Oompa Loompas who were basically African slaves into a whimsical musical that was fun and harmless. The book also sees Forrest become an astronaut, a Hollywood stuntman and a professional wrestler, and he survives being stranded in a jungle with cannibals. In the book, the main character is a ruthless killer of the vampires who now inhabit Earth and is made to pay for his crimes against them. In the movie, the main character is painted as a hero who saves the world by sacrificing himself. Whereas the book was narrated by the character known as Chief Bromden, who gives the reader constant insight into his thoughts and his background, the movie puts the Chief mostly in the background as a mysterious figure. The movie also leaves out a lot of material, including the last three chapters, which were moved to a potential sequel that never happened. The book follows the same main character, a guy named Rick Deckard who hunts escaped androids, but there are many differences between the two versions. In the book, Deckard is a married man and the androids he hunts are not presented as deserving of much sympathy – both huge differences from the film. Remember the big set piece in the film where the T. That never happened in the book but was one of the most essential plot points in the film. The book, told via interviews with survivors of the Zombie War, can be read as a meditation on human nature and a criticism of bureaucracy. Where the book focused on the human price and fallout of the Zombie War, the film was a big, loud action movie that follows a hero who tries to save the world from a zombie outbreak. The movie kept the setting, characters and plot mostly the same but had some glaring differences that likely made lovers of the book roll their eyes. A couple of major changes to the characters included Baloo being a funny slacker instead of a wise, old leader, and Kaa being presented as a goofy villain rather than a friend of the boy. Meanwhile, the movie – which Hornby executive produced – follows Jimmy Fallon as a guy from Boston who worships the Red Sox and falls in love with a woman who has no interest in baseball. Clearly, both are great, but they vary wildly from one another. Both tell the story of Willie Stark, a Southern politician who becomes corrupt as he gains power, but the film totally focuses on him, while the book makes Stark a secondary character. The book is much more focused on Jack Burden, the journalist who follows Stark and narrates the story. While the book is all about the religious guilt that racked early America, the movie is a steamy, rah-rah statement on standing up to bullies. The plots are completely different, and the pacing is about a million times faster in the film than the book, which is more of a slow burn. Tolkien Stretching a single, page book into three films that span nearly nine hours total is the definition of trying to make a dollar out of 15 cents. That amount of bloating meant that a single sentence from the book equated to more than two minutes of screen time, according to FiveThirtyEight. Travers Walt Disney had such a hard time getting P. In the books, Poppins is intimidating, vain and had absolutely no romantic relationship with Bert. Both versions tell the story of the oil man and his son but hardly mirror one another aside from that. But the movie was far different. Where the book, a collection of connected short stories, told varied tales of fascinating robots and gave a fictional history of their being, the film, which starred Will Smith, was a cliché-packed thriller filled with robot paranoia.

Books have always enriched my love of theater, and vice versa: especially for musical adaptations of books. The Broadway and Off-Broadway theater landscape has always offered a magnitude of shows that have been inspired by literary source material.

Meaning "condition of being adapted" is from s. Sense of "modification of a thing to suit new conditions" is from The acquisition of modifications in an organism that enable it to adjust to life in a new environment. An advantageous change in the function or constitution of an organ or tissue to meet new physiological conditions. Adjustment of the pupil and retina to varying degrees of illumination. A property of certain receptors through which they become less responsive or cease to respond to repeated or continued stimuli of constant intensity. The fitting, condensing, or contouring of a restorative dental material to a tooth or cast. The dynamic process in which the behavior and physiological mechanisms of an individual continually change to adjust to variations in living conditions. Published by Houghton Mifflin Company. Adaptations develop as the result of natural selection operating on random genetic variations that are capable of being passed from one generation to the next. Variations that prove advantageous will tend to spread throughout the population. Show More A Closer Look: The gazelle is extremely fast, and the cheetah is even faster. These traits are adaptations-characteristics or behaviors that give an organism an edge in the struggle for survival. Darwinian theory holds that adaptations are the result of a two-stage process: Random variation results from slight genetic differences. For example, one cheetah in a group may be slightly faster than the others and thus have a better chance of catching a gazelle. The faster cheetah therefore has a better chance of being well-fed and living long enough to produce offspring. The process is repeated in each generation, and thereby great speed becomes an adaptation common to cheetahs. This same process of natural selection, in which the organisms best adapted to their environment tend to survive and transmit their genetic characteristics in increasing numbers to succeeding generations while those less adapted tend to be eliminated, also favors the fastest gazelles. On the islands, one type of finch gradually gave rise to some 13 different species of birds with differently shaped beaks, each species having adapted to its varying food niches and feeding habits. For instance, because of the misuse of antibiotics, some disease-causing bacteria have rapidly adapted to become resistant to the drugs. Heavy fur, for example, is one adaptation to a cold climate.

5: Book to Movie Adaptations | Books | PBS

A common form of film adaptation is the use of a novel as the basis of a feature film. Other works adapted into films include non-fiction (including journalism), autobiography, comic books, scriptures, plays, historical sources, and other films.

Log in Adapting to Adaptations: One must delve deeper to understand the relationship between books and films when an adaptation is made. Novels are verbal and use words to tell a story, while films are visual and rely on images to do the telling. But there is more to the balance between a book and its film adaptation. Once one fully comprehends the relationship between book, film, and adaptation, one can see that adaptations should be treated as a literary art form of their own. Adaptations are a category of their own and should be treated accordingly. In order to discuss the relationship between book and film in adaptations and the reasons behind the controversy of that relation, it is important to first look at the history of adaptations in order to understand the background surrounding that industry. By doing so, one can see the way adaptations have evolved throughout the years and the manners in which the opinions regarding adaptations have changed and varied and even adapted to the current era. We will examine the ways in which adapting literature to film is viewed in our society and the reasons behind both praise and critical reception of adaptations. Named one of the greatest films of the 20th century by Village Voice, *A Trip to the Moon* was not only widely popular for its special effects and innovative animation, and for being the first known science-fiction film, but also because it did something else, too: After him, many French and Italian filmmakers started making their own adaptations of classic books. Americans, of course, followed using novels, poems, plays and short stories. Adaptations were greeted positively at first, with critics thinking them educational and innovative. Influential film artist D. The merits of a classic subject are nonetheless certain because known and appreciated by comparatively few men. It is the business of the moving picture to make them available to all. Paramount magazine stated: The popularity of adaptations continued to rise over the next years. So much so, that in , nearly every film competing for an Academy Award was an adaptation; adaptations of such classics such as *Of Mice and Men*, *Goodbye, Mr. Some* of the most popularly adapted authors included Balzac, Hugo, Dickens, and Sienkiewicz. Film adaptations remained popular in the following decades. One such argument is that adaptations work against the uniqueness of film. Film is its own creative art form and using other works to adapt them to film stifles that creativity and prevents original work from being produced. This growing popularity of adaptations not only dissolves the barrier between literature and film, but it creates a stigma that film is there to serve as another medium for which to display literature, rather than existing as its own separate entity capable of narrative merit. So the concern is not that adapting will reduce the quality of the original work, but that it is actually the form or medium it is being translated to that matter. In this case, a film is thought to lower the original, causing the general disdain for adapting works of literature-particularly classics-into film. This is not always the case, however. Another argument against adaptations is that combining both mediums could only end up harming them both. It is these alternations that are detrimental to the original work and the reasoning behind opposition to the practice of adapting classic literature to film. Consider the case of J. Except for a framing story, there is little resemblance between the film and the book. He was so traumatized by the experience that he decided never to get involved with adaptations again. And now the world will never see a film adaptation of *Catcher in the Rye* because of it. Then there is the case of Willa Cather, whose novel *A Lost Lady* was adapted very loosely into a film in . As a result, Cather stated in her will that she would not release any rights to any of her literary works. Hutcheon theorizes that the explanation behind this is that even though adaptations are thought of as inferior and secondary creations, they are familiar, and people derive pleasure from the familiar. This is the reason directors and producers keep churning out adaptations, because they know they will sell. Adaptations inherently come with a pre-established fan base. If the original work has already gathered a following, then the possibilities of making money are greater than with an original script. There are some that will attend an adaptation simply because they want to remember their original experience with the book fondly. There are also those who will want to uphold the standards of the original by scrutinizing every

detail and comparing it by evaluating its faithfulness to its source. There will be the people that are so against adaptations that they just want to watch an adaptation crash and burn which ironically, supports the adaptation with their presence regardless of their intent. Whatever the case, there is no denying that adaptations sell. This gives some further insight into the phenomenon of the popularity of adaptations despite their reputation as lesser and inferior art. Books helped by adaptations: By the same token, a film can benefit from not only the pre-established fan-base of a book, but also from using its name as a marketing strategy. Strictly following the original source to the letter only becomes an issue when the intended audience is expecting it or demanding it. There are also many critics and reviewers that put themselves in the role of the viewer who has not only read the book, but is expecting the film to be faithful to it. This is a mistake. Critics should not pretend to be the fan-base of the original work and in turn analyze and criticize an adaptation on the basis of its faithfulness to the original book. This is to say, that there are instances in which a film is not recognized as an adaptation because this is never acknowledged or perhaps the book is not well-known. Although this may be the case, adaptations should strive to be recognizable to anyone who is familiar with the original work, regardless of whether the adaptation is faithful to the source or not. As Catherine Grant stated: Recall; this is an interesting notion that often goes unmentioned when discussing adaptations. Author Christine Geraghty focuses less on the way books are adapted and the process involved, and more on the ways in which the film adaptations cause us as viewers to recall things by watching them. Her book *Now a Major Motion Picture*, delves into the mental and emotional aspects that adaptations have on the audience, specifically for those who have read the original work before watching the film adaptation. Barbara Tapa Lupack, author of *Take Two: Adapting the Contemporary American Novel to Film* has a similar train of thought. The reason it is imperial to keep this in mind, is that once we put into perspective our own personal reasons for judging a film adaptation roughly it becomes more clear that there are some unreasonable expectations set for adaptations that are almost impossible to fulfill without leaving at least one malcontent critic. One is far better off enjoying the memories that adaptations stir-up from the original source, or letting oneself be transported to a new unknown world if one is not familiar with the original work. And if an adaptation is regarded as an art form of its own, then this process becomes simpler and more enjoyable for all. Whether one is for or against adaptations, disregarding them as lesser art is a mistake because we will ultimately be closing off on the opportunity to experience both cinema and literature in a different light, one that only adaptations can provide. Cited Works Hutcheon, Linda. *A theory of adaptation*. Now a major motion picture: Lupack, Barbara Tapa, ed..

Debates about film versions of books are nearly as old as cinema itself. Movies can be a delightful reminder of great literature - but they can also ruin it, fixing beloved characters in.

Pretty package wrapped around a skeletal core, padded by lots of glittery styrofoam. On their way home from a debate meet in Arizona, Reese, David and their coach, Mr. Birds have caused four planes all over the country to crash for some mysterious reason. In true post-apocalyptic fashion, the three of them opted to travel by land, getting waylaid by the pandemonium generated by the uncertainty surrounding the strange events. Reese vaguely remembers an accident happening on the road, a strange chamber, a military base and 27 days she has no memory of. There are strange dreams plaguing her at night and stranger compulsions in the morning; suited men following her around and a beautiful girl simultaneously disturbing and drawing her in. Do you know what I mean? I feel that this book ran on two fuels: Not one quip about Capt Sullenberger? Are we looking at a Matrix scenario here? But take away the avant garde atmosphere derived from poetic graffiti in a lesbian bathroom, the eggyolk chambers and birds slamming against airport windows, the essentials I look for in a good book felt lacking: There was no unifying theme. I do not strictly look for a bigger message in books but there has to be a clear and apparent point to everything. This felt a little scattered, the details discordant and unemotional. It had a very sterile feel to it. There was barely any character development for any of the protagonists. Sure I appreciate the novelty of a bisexual heroine in the cusps of sexual awakening but at its core, this still fell prey to the clutches of love triangles and unfounded attraction. The revelation felt milquetoast and dull. Totally robbing the book as a whole. The way this was resolved felt dated and unworthy of the creativity in the possibilities implied by the early chapters. The book being easily summarized thus with a great early sprint ending with a huffing and puffing walk to the finish line. ARC provided by the publishers in exchange for an honest, unbiased review.

The Book: Based on the book of the same name, Hidden Figures tells the story of Katherine Goble Johnson, Dorothy Vaughan, and Mary Jackson, NASA's black female mathematicians who were instrumental.

Page 3 Some movies start their lives as scripts. Others as TV shows that someone, somewhere, decides to turn into film with varying degrees of success. Not these movies though. Hidden Figures The Book: Yet their involvement was largely ignored due to rampant racism and discrimination in the science industry. The movie tracks their phenomenal careers despite the obstacles in their way, and that good old feel-good factor even manages to worm its way in. The Pianist The Book: His own experience in the Krakow Ghetto inspired the changes - including an entirely new character, Dorota. Casino The Book: The second collaboration between Pileggi and director Martin Scorsese brought Robert De Niro back into the fold, taking on the role of Jewish-American Ace Rothstein - a wiseguy planted in Vegas by the mob to oversee the day-to-day operations of their casinos. Scorsese and Pileggi thought this approach would confuse audiences so they simplified it to just one; the Tangiers. The Graduate The Book: Straight out of college, Charles Webb penned the novel based on his personal experience of an academic romance with an older woman. Robinson, are you trying to seduce me? Full Metal Jacket The Book: Marine Corps veteran Gustav Hasford. Marines during boot camp and beyond. Midnight Express The Book: The real-life account transcribed in the book depicts his escape as being from another prison Hayes was transferred to, and he did not kill the head guard before making his exit. This detail hints definitively at the reason behind her final choice - whereas in the film the scene is absent. American Psycho The Book: It was mauled in the press for its depiction of violence. Mary Harron directed the movie based on a script co-written with Guinevere Turner. A frank and bloody depiction of several key events in the novel, she cast Christian Bale in the role of psychotic yuppie businessman Bateman. The body count shown onscreen is considerably less than in the novel - including the painstaking details of the deaths. Jurassic Park The Book: Being on the edge of your seat never felt so damn enjoyable. Lex was younger and keen on sports, whereas Tim was the older of the two fascinated with computers.

His stage adaptation of the novel was a success. The film is an adaptation of a book of the same title. The insect's evolutionary adaptations enable it to be almost invisible even when sitting in the middle of a leaf.

The Birds The Book: The mini-novel by British scribe Daphne Du Maurier tells of a small community besieged by an flock of murderous birds. Under the direction of suspense master Alfred Hitchcock, the fleshed-out feature focuses on the small town of Bodega Bay in California as its citizens come under attack. A mix of black humour and outright terror, The Birds can still provide sufficient reasoning to flake out of that birdwatching trip your Nan insists on taking. Mildred Pierce The Book: Jaws The Book: Author Peter Benchley was inspired to write the tale of a small town terrorised by a great white shark after reading about similar attacks along the New Jersey coast in Scaring the bejeezus out of its audience, the lurching theme by composer John Williams is now synonymous with the hulking monster. The mafioso subplot was omitted from the flick. Confidential The Book: The English Patient The Book: The love story between Hana and Kip is the central romance of the novel, whereas in the movie, they are underplayed and the less prominent tale of the patient takes centre stage. Blade Runner The Book: Set in a post-apocalyptic world, Philip K. While it certainly divided critics upon release, it has since been established as one of the best sci-fi movies to ever exist. And Jodie Foster as Agent Starling? Trainspotting The Book: Different story threads are told in the novel by a variety of characters, whereas Renton is the sole narrator in the movie. The movie went on to become a grandiose hit. In the book, Scarlett has children fathered by each of her three husbands.
