Excerpt from Address Delivered Before the Aquidneck Agricultural Society, at Their Annual Exhibition, Am inclined to believe that if every lot on this island was completely surrounded with large trees, that so beneficial would be the addi.

Background on Marshall P. Marshall Pinckney Wilder Marshall P. Wilder A merchant and amateur horticulturalist from Dorchester, Mass. Wilder was a key figure in American pomology during the mid-nineteenth century and an important supporter of agricultural education in Massachusetts. Born in Rindge, New Hampshire, on September 22, , Wilder was presented at 16 with a choice of attending college, starting a farm, or working in the family store, and elected to farm. Following the death of an uncle two years later, however, he was called upon to join his father in their burgeoning wholesale business, remaining there until he set out for the larger markets of Boston in . In , he joined Isaac Parker and Abraham W. Blanchard in the commission dry goods trade, to create a notably prosperous and long-lived firm, Parker, Blanchard, and Wilder later Parker, Wilder and Co. In , Wilder purchased an estate in then-suburban Dorchester from Gov. Increase Sumner where he turned to his avocation, horticulture, with extraordinary zeal. He rapidly transformed Hawthorne Grove into a model in horticultural experiment. The inevitable setbacks did little to dampen his industry. Although a greenhouse fire in cost him all but two of his eight hundred camellias, Wilder had rebounded sufficiently quickly that a year later he was able to exhibit three hundred varieties to a touring group from the Massachusetts Horticultural Society. A regular at horticultural fairs, he was a founding member of the New England Horticultural Society in and the Massachusetts Academy of Agriculture a reform school for boys in , president of the Massachusetts Horticultural Society , a founder and president of the American Pomological Society , the Massachusetts Agricultural Club, the Norfolk Agricultural Society, and the United States Agricultural Society, among many other organizations. Outside of horticulture, he was president of the New England Historic Genealogical Society , an officer in the state militia in New Hampshire and later in the Ancient and Honorable Artillery Company, and he was elected to single terms in the Massachusetts General Court , the state Executive Council , and the state senate, of which he predictably chosen president . Although he was not the first to propose the idea of an agricultural college for Massachusetts, he may have been its most persistent advocate. To build political support for agriculture, Wilder helped establish the State Board of Agriculture in it was first constituted unofficially the year previously , and although it was more than a decade before the college became a reality, Wilder did not flag in his support. A trustee of MAC from until , Wilder was singled out for the honor of addressing its first graduating class in . Rogers agreed that the college would provide instruction in pomology and horticulture. Wilder died in Dorchester on December 16, . Scope of collection The Wilder Collection consists primarily of printed works of the pomologist Marshall P. Wilder, reflecting his broad commitments to American horticulture, agricultural education, and the Massachusetts Agricultural College. Among the miscellaneous publications are several addresses to regional agricultural societies, including his seminal address to the Norfolk Agricultural Society, and seven copies of his address to the first graduating class of Massachusetts Agricultural College. The small number of manuscript items in the collection include a draft copy of the proposal to hold a national meeting of fruit growers -- the first meeting of what would become the American Pomological Society -- and two letters relating to gifts of books to the MAC library. Of special note is a volume of 22 watercolors by the Belgian-American artist Louis E.
