3 ADVANCES IN NEPHROLOGY about a lot of information that at times conflicts with each other," says Dr. Rao. "They may be able to eat one thing on one diet, but are.

If your institution provides your access to this website, you may link that access to your individual AAP account. You may then access the website remotely and unlock features for individual accounts. This is the touchback warning message modal. Please read these terms carefully. In consideration of payment of the applicable subscription fee, the AAP is willing to provide access to the Materials to you and, if applicable, your Users as defined below, subject to all of the following terms. For individual enrollment use of the Materials is limited solely to you, and you agree not to permit others to access the Materials using your account. For group enrollment, access to the Materials is limited to you and your authorized Users for whom you have obtained an authorized subscription. You agree not to permit others to access the Materials using your account. You agree to issue passwords or other access information only to authorized Users and use reasonable efforts to ensure that Users do not divulge their passwords and other access information to any third party. You will monitor compliance of your Users with the terms of this Agreement. You agree to immediately notify us in the event you determine, or have reason to believe, that an unauthorized party has gained access to the Materials and to take all reasonable steps, both to ensure that such activity ceases and to prevent any recurrence. The AAP and its Providers do not warrant that access to the Materials or Website will be uninterrupted or error free or that any information, software, or other materials available on or accessible through the Materials or Website is free from viruses, worms, Trojan horses, or other harmful components. In no event shall the AAP or its Providers be liable for downtime, system speed or slow-down caused by the misoperation or failure of the Internet or any other network not under the sole control of the AAP or by any other cause beyond the reasonable control of the AAP or its Providers. The AAP will restore access to the Website and Materials as soon as commercially practicable in the event of an unscheduled interruption or failure thereof. The License shall be subject to the following restrictions and conditions, and without the separate written approval of the AAP neither you nor any User shall: Changes to the Materials. The AAP reserves the right at any time, in its discretion, for any reason and without prior notice: If the AAP gives you notice that it is withdrawing materials because it no longer retains the right to publish them or that it has reasonable grounds to believe they infringe copyright or are defamatory, obscene, unlawful or otherwise objectionable, then you agree promptly after receipt of such notice to take all commercially reasonable efforts to prevent further access to the applicable Materials by Users. You agree to pay to the AAP the current subscription fee detailed at enrollment or otherwise provided on the Website, including the then-current fee during any renewal term. The AAP reserves the right, without prior notice, to suspend your use of the Materials if owed fees are past due. The Term will automatically extend for additional renewal periods for which you subsequently pay the then-current subscription fee. The following rights and obligations shall survive any termination: You agree not to distribute, display or publish any such materials without such approval. To the extent that any such items are not deemed a work-made-for-hire or you otherwise retain rights therein, you agree to and hereby grant, assign and convey to the AAP all of your right, title and interest, if any, in such items and in all patents, copyrights and other intellectual property rights therein. The only rights to the Materials granted to you are the rights to use the Materials in accordance with the License and all rights not specifically granted herein are reserved by the AAP. When clinical matters are discussed, the opinions presented are those of the discussants only. The material discussed in the Materials is not intended to present the only or necessarily the best pediatric method or procedure, but rather presents the approach or opinion of the discussant. You acknowledge that the recommendations and information in the Materials do not indicate an exclusive course of treatment or serve as a standard of medical care. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Limitation of Liability and Damages. The AAP shall have no obligation under this Section for any such claims, actions or losses

which are based upon: You agree that Lexi-Comp, Inc. The Lexi-Comp Content is intended to serve the user as a rapidly accessible, concise initial reference resource and not as a complete reference resource. It does not include information concerning every therapeutic agent, laboratory or diagnostic test or procedure available. The Lexi-Comp Content is clinically oriented and is intended to be used only by Users who are: Neither the AAP nor its Providers directly or indirectly practice medicine or dispense medical services and, as such, assume no liability for data contained in the Lexi-Comp Content. Except for your obligations hereunder to pay the AAP, neither party shall be responsible for delays or failures in performance resulting from acts or circumstances beyond the control of such party, including, without limitation, acts of God, strikes or other labor disputes, riots, acts of war, malfunction of portions of the Internet or another third party network, governmental regulations promulgated after the effective date of this Agreement, communication line failures, power failures, equipment failures, fires or other disasters, and acts of third parties including hackers and crackers. The AAP reserves the right to change or modify this Agreement at any time by presenting you with a new set of terms before you access the Materials. Following your agreement to such modified Agreement, this Agreement shall be of no further effect and the modified agreement shall control. In the event you refuse to agree to any such new agreement, the AAP will, if requested, refund any unearned portion of your subscription fee. The AAP is a Section c 3 , not-for-profit corporation, and as such, does not participate in any political activities. You are prohibited from participating in political activities while using the Materials or the Website. This Agreement will be governed by the laws of the State of Illinois applicable to contracts made and to be performed in that state. The parties hereby submit to the exclusive jurisdiction of the federal and state courts located in Cook County, Illinois, U. A waiver of any breach or default under this Agreement shall not constitute a waiver of any other right arising out of any subsequent breach or default. If any term of this Agreement is held to be invalid, the parties agree that such invalidity will not affect the remaining terms. Notices shall be effective when received. Neither party may assign this Agreement to any third party without the prior written consent of the other party. This Agreement and any attachments represent the entire agreement between the parties and supersede any previous contemporaneous oral or written agreements, commitments, representations or communications regarding the subject matter of this Agreement. Any modification to this Agreement must be in writing and signed by a duly authorized agent of both parties. Signed facsimile copies of this Agreement, and attachments will legally bind the parties to the same extent as original documents. Each party shall comply with all applicable laws and regulations in exercising its rights and performing its obligations hereunder. Despite any representations concerning privacy, the AAP reserves the right to disclose without notice to you any information in our possession if required to do so by law or upon a good-faith belief that such action is necessary to comply with the law, to protect or defend our rights or property, or to respond to an emergency situation. Any person accepting this Agreement on behalf of another entity further represents and warrants that such individual is a duly authorized representative, having the power and authority to bind such entity to this Agreement.

ADVANCES IN NEPHROLOGY 3 Legitimizing Acute Kidney Injury: A More Precise Approach in the Making (continued from page 1) Dr. Barasch is a cell biologist who has been studying the pathogen-

Dry skin and dry eyes are also common. Itching pruritus occurs in 20–70 percent. This in turn may lead to a number of symptoms or complications: Fluid retention in the abdomen ascites in more advanced disease Oesophageal varices in more advanced disease Hepatic encephalopathy , including coma in extreme cases in more advanced disease. Evidence for this includes cases of PBC in family members, identical twins both having the condition concordance , and clustering of PBC with other autoimmune diseases. Gp has increased expression in the bile duct of anti-gp positive patients, and these proteins may be associated with prognosis. Abnormalities in liver enzyme tests are usually present and elevated gamma-glutamyl transferase and alkaline phosphatase ALP are found in early disease. Antimitochondrial antibodies are the characteristic serological marker for PBC, being found in percent of patients and only 1 percent of controls. Antinuclear antibody measurements are not diagnostic for PBC because they are not specific, but may have a role in prognosis. Anti-gp antibodies are found in 47 percent of PBC patients. This may be needed if a condition causing secondary biliary cirrhosis , such as other biliary duct disease or gallstones, needs to be excluded. A liver biopsy may help, and if uncertainty remains as in some patients, an endoscopic retrograde cholangiopancreatography ERCP , an endoscopic investigation of the bile duct , may be performed. Most patients can be diagnosed without invasive investigation, as the combination of anti-mitochondrial antibodies and typical cholestatic liver enzyme tests are considered diagnostic. However, a liver biopsy is needed to determine the stage of disease. Intermediate magnification micrograph of PBC showing bile duct inflammation and periductal granulomas. Immunofluorescence staining pattern of sp antibodies nuclear dots and AMA. Liver biopsy[edit] On microscopic examination of liver biopsy specimens, PBC is characterized by interlobular bile duct destruction. These histopathologic findings in primary biliary cholangitis include the following: Normal sized triads; portal inflammation, subtle bile duct damage. Granulomas are often detected in this stage. Stage 2 – Periportal Stage: Typically characterized by the finding of a proliferation of small bile ducts. Stage 3 – Septal Stage: Stage 4 – Biliary Cirrhosis: Nodules present; garland or jigsaw puzzle pattern. Treatment[edit] There is no known cure, but medication may slow the progression so that a normal lifespan and quality of life may be attainable for many patients. It helps reduce the cholestasis and improves liver function tests. It has a minimal effect on symptoms and whether it improves outcomes is controversial. Other drugs that do this include stanozolol , naltrexone and rifampicin. The manufacturer, Cephalon, has made agreements with manufacturers of generic modafinil to provide payments in exchange for delaying their sale of modafinil. Screening and treatment of these complications is an important part of the management of PBC. As in all liver diseases, consumption of alcohol is contraindicated. In advanced cases, a liver transplant , if successful, results in a favorable prognosis. Obeticholic acid, which is a modified bile acid, produced a reduction in the level of the biomarker alkaline phosphatase, a surrogate endpoint for clinical benefit in PBC. There is no consensus on risk factors for recurrence of the disease. Chronic cholestasis leads to osteopenic bone disease and osteoporosis, alongside hyperlipidaemia and vitamin deficiencies. Patients with PBC have an increased risk of hepatocellular carcinoma compared to the general population, as is found in other cirrhotic patients. In patients with advanced disease, one series found an incidence of 20 percent in men and 4 percent in women. History[edit] In , Addison and Gull described the clinical picture of progressive obstructive jaundice in the absence of mechanical obstruction of the large bile ducts.

3: Books by Jean-Pierre Grunfeld (Author of Advances in Nephrology, Volume 23)

This is an unsystematic review of those areas of nephrology in which there have been recent advances, selected for a general readership. Space precludes coverage of advances in renal transplantation.
