The marketing materials suggest the latter reason also, and many posters for the film promised that "You [will] actually SEE the birth of a baby! In particular, at no time does the film specifically mention sexual intercourse or pregnancy. This strategy often utilized fabricated letters supposedly written by the mayor of a nearby city, who wished to register concern about local young women in his area who had seen the film and were awakened enough to discuss problems similar to ones of their own. At any one time, a number of "Elliot Forbes"es would give simultaneous talks in a number of locations showing the film. Because the Forbes lecture formed part of the viewing, extra newsreels or short films were not permitted, although previews were allowed. The exploitation genre was pitched against numerous challenges during the s and s, and fought many local censorship battles, and fought bitterly against the motion picture censorship system. One successful challenge was in New York City, where Mom and Dad remained censored until , when the Appellate Division of the New York State Supreme Court overturned the ruling of the censorship board, deciding that human birth did not qualify as "indecent". In , Universal produced a similar film, The Story of Bob and Sally , but was unable to screen it due to the production code , and eventually sold the rights.
