Kindle Edition Verified Purchase "Super Life Secret Codes," is a recent Viking release by author Great Sun that presents "life codes" to readers, which the author claims will help them to connect to the Universe and ward off disastrous consequences that threaten to overwhelm mankind and the planet Earth. The book starts off as a personal narrative by Great Sun, a California mystic, who describes his own spiritual pilgrimage, which culminated with his meetings in with Friend G. Following those meetings Great Sun became a spiritual counselor in his own right, helping many to find the right path in their lives and gain health, happiness and success in their careers and relationships. During the time that Great Sun met with Friend G, he learned about many natural disasters that would occur in the world between and As described by Great Sun, each of the disasters took place exactly as Friend G. But now I realized that people should reevaluate their lives immediately and figure out the critical processes that should be taken to protect our Earth and make the world a better place. The body of the book is a description of those secret codes, interspersed with personal stories about people who have used the codes in their lives and subsequently experienced significant improvement in their health or health of their loved ones. In several places in the book, Great Sun presents visualization techniques which people can use to reconnect to the Universe, and at times he presents advice on living, nutrition on Feng shui, preparation of the house and other practical matters. Although the book might be classified as spiritual advice, the book is non-sectarian. His advice is meant to help create happiness and success in jobs, professions, relationships and family and is not designed to induce other worldly experiences. When the author does talk at all about the spiritual world, he uses examples taken from engineering, physics and modern technology to explain how all men are connected to the Universe. Great Sun explains that by reconnecting to the Universe, using his secret codes, man can potentially survive the disasters of the future. He explains the reasons for this strong statement in exposition given in different chapters of his book. After introducing the codes in chapter 4, the author goes on, in Chapter 5, to talk about the power of avoiding exposure to negativity found in food, music environment and people. In the next chapter he points out that people have to work hard when employing the secret codes and that only a diligent as opposed to a superficial effort will bring results. In Chapter 7, Great Sun talks about the miracles and benefits that come from the Sun. At the conclusion of the chapter he offers readers a visualization technique which people can use to fill themselves with the great energy that it emanates In chapters 8, 9,11, 12 and 13 Sun applies his teachings to many practical situations in life, including day to day living, marriage, nutrition, the home and breathing. In Chapter 10, Great Sun tells how his teachings will only help people who are open to its ability to assist them and he uses a real life story to illustrate his point. In Chapter 14 Great Sun describes a personal experience he had in which he rose to the formative world and saw a vision of the punitive turmoil that the Earth might face in the future as technologically laden man grows more and more at odds with the natural world. In Chapter 15, Great Sun offers additional encouragement and exercises that his readers can employ to channel the energy of the Sun and the Universe into their lives. In the concluding Chapter, 16, the author exhorts his readers to start employing the practices now. The book contains an appendix consisting of personal letters from the author to heads of state, to religious leaders, to readers of the book and even the angels. The book is about real people and is directed to real people, people who are immersed in life and working hard in our modern technological world. These are people who need a way to maintain their connection to the Universe and not be dragged into the toxic byproducts of our complex modern living, which not only poison our bodies, but also our efforts to be successful in finding a mate, forming a relationship, getting married, have a happy family life and achieving economic success.
