

## 1: All in one Mathematics Reference Books for Class 11 - Class 12 | EffortlessMaths

*I just ordered another one to use as a math book for someone. > Now there's only one thing that I do not like. The answers are just below the problems instead of in the back of the book as they were originally.*

Choose a game from Math 1 " Addition. Play with this bar graph maker. You can click on the words to delete them and write your own. Can you make a graph of how you spend your time? You can make your labels: Each block could be one hour. You can click on the numbers to change them too. Subtraction Day Get out 5 blocks or coins or something, all the same. You have 5 blocks. Pick up one in your hand. How many are laying there now? There are 4 down and 1 in your hand. Now we are seeing that five take away one is four. In math we say: If you take away 2, how many are left? If you take away 5, how many are left? Day Get out ten blocks or whatever. Lay five blocks out together. Add on one block. Continue until you have no blocks. Day Play subtraction harvest. The wiggling apples are going to fall. How many apples will be left on the tree? If you have 5 and take 0 away, you still have 5. If you have 5 and take 1 away, you have four. If you have four and add back on one, then you have five. These facts are all relatives: If you have nine candies and I take eight, then you will only have one left. If I take all nine away, you will have zero. Play feed the frog. This game has missing numbers. If you take 4 away from 5, you still have 1 left. Answers Do you remember how to build fractions? The bottom number tells you how many pieces to divide the shape into. The top number tells you how many parts to fill in. This is a Java activity. You can also download it to use it without Java.

## 2: Top Rated Educational Math Books for Children ( books)

*The PCM carries the true signature of a math encyclopedia in that it is versatile and capable of being all things to all learners in every field of mathematics, and on all levels also. In light of its broad spectrum of topics, the editors have managed to keep this book cohesive and well knit together.*

Review Day 1 Find the numbers and shoot off the fireworks. This and other ABCya links are best done from a computer. A mobile device will redirect this link to the paid app. Go on a math journey. Draw each shape it sings about. The PDF to print will be linked on each day there is a worksheet to print. Day 2 Click on the numbers that add up to whatever number it shows you. Count the tens and then count the ones and click on the number. Choose a picture to make. This is tricky too. Day 3 Buy the item with the exact amount. Measure with a ruler and get the ant to his picnic. Click on the next dot. Then click on the ruler to measure. You can turn the ruler sideways. This link will need to be done from a computer. A mobile device will redirect you to their paid app. Make the numbers using stacks of tens and blocks of ones. Use tens and ones to make numbers. Make 13, 25, 61, and any other two-digit number. Use the numbers that are there to figure out the missing numbers in the pattern. Drag one of those big squares of blocks onto the work mat. What number does it say? There are blocks in that square. Now you are using hundreds, tens and ones. You are using hundreds, tens and ones. Make a big number. Do you see the hundreds, tens and ones. Click on the button to see them all put together. Click on new and make another big number. Stop when you get to multiplication. Choose 6 second addition. Which number is the hundreds? It will tell you a number. Just look down one row because each row has ten numbers. When you find the right answer, click on next to get your next number to find. When this is easy for you, go on to number three below. Now you will add 1 to the tens and 1 to the ones. What happens when you add 1 to 9? Just move down one row to add 10 and over one spot to add 1. Add on ten at a time and fill in the blanks. Answer the addition questions. Can you do it? You can try this game to make sure you are doing it right. You just jump up one row to add ten. You can use the chart to check your answers. Stop when the teacher says to do the problems on your worksheet around 5: When the ones add up to ten, you make them into a group of ten and add them to the tens.
