

1: CodeWest API Exam Preparation

Dear Brothers I have just completed a detailed critical reading on the API & API SI for my coming December & March exam schedules. A colorful pictorial self study notes were generated during the course of reading.

We have added a new exam prep partner in our "Training Resources" area. Effective immediately, the afore-mentioned API Certification items will strongly be considered when making project resourcing decisions which includes hire and release determinations. To read the full letter, please visit this link. Effective July 28th, API announced testing dates for all of Williams will require that all of its onshore inspectors be certified by the American Petroleum Institute by the end of Our goal is that 25 percent of our onshore inspectors be certified by the end of this year , and 65 percent by the end of These certifications standardize knowledge and skill sets and will enhance the quality and safety of new construction. Effective July 7th, We added a new area on the left for "Training Resources" for referring candidates to training resources we have confidence in. Effective May 16th, The following are pointers for applicants to the API Certification Program to help make the application process more efficient and successful. It has also been disclosed that API is offering an additional testing date. See the Scheduled Exam Dates tab for details. Make sure that you understand the qualification requirements for the program. You can find information about the API program here: Make sure that you have all relevant documentation and contact information handy. You will need to upload your diploma or any relevant certifications. Check that your employment references are still alive and that phone and email contact information is accurate. Each of these categories have a different requirement for length of experience. Refer to the API website for an exact description and experience requirement of each. Provide your employment references with the exact details of what you submitted on the application. This makes their verification much simpler. As always, if you have questions, please call our offices during regular business hours and ask to speak to our Safety Coordinators or Personnel Directors. Effective March 30th, QIS is pleased to announce our partnership with the Atlantic Coast Pipeline to provide inspection services in the coming construction season. We have been asked by our partner at ACP to pass along the attached brochure to provide important information about the project. Please note that a large majority of inspection personnel will be required to have their API to be considered for the project. Please contact our offices for any information regarding preparing for the API certification exam. The Pipeline Inspector Certification Program is part of the continuous improvement process to enhance the operational reliability and safety of pipelines. By standardizing the baseline certification of pipeline inspectors across the industry, we can enhance the quality of new construction. Reasons to have a certification program: For more information, please visit this link. August 24, December 7 - 21, - Deadline to apply:
