

APPENDIX C. INTERVIEW PROTOCOL pdf

1: Appendix C - Interview Protocol | Highway Worker Safety | The National Academies Press

GENERAL. What are your Job Responsibilities? What has been your involvement with the NCC? NATIONAL CONTACT CENTER. What is your impression of the effectiveness of the NCC?

Administrator training and qualifications: Fee for a copy, no fee for use Available from: Can be downloaded from Project Cork Web site: Screens for heavy drinking and alcohol dependence in the past year in male and female samples of the general household population and hospital clinic outpatients Chan et al. The TWEAK provides a quick and easy method of targeting outpatients and inpatients in need of more thorough assessments of their alcohol use patterns and problems to determine whether treatment is needed. Groups with whom this instrument has been used: Five items; pencil and paper self-administered, administered by interview, or computer self-administered. Less than 2 minutes Scoring time: Approximately 1 minute Computer scoring? No Administrator training and qualifications: Screening and Assessment for Alcohol and Other Drug Abuse This section of the appendix lists common screening and assessment instruments used in cases where abuse of or dependence upon substances including alcohol is in question. The ASI is most useful as a general intake screening tool. The ASI has been used extensively for treatment planning and outcome evaluation. Outcome evaluation packages for individual programs or for treatment systems are available. Designed for adults of both sexes who are not intoxicated on illicit drugs or alcohol when interviewed. It is also available in Spanish. The ASI has been used with males and females with substance use disorders in both inpatient and outpatient settings. Structured interview Administration time: Fifty minutes to 1 hour Scoring time: Five minutes for severity rating Computer scoring? Yes Administrator training and qualifications: A self-training packet is available as well as onsite training by experienced trainers. No cost; minimal charges for photocopying and mailing may apply Available from: Measures early cocaine abstinence signs and symptoms. This instrument could also be used to evaluate the effectiveness of medications intended to treat cocaine abstinence symptoms. Less than 10 minutes Scoring time: Requires little training; clinician-administered Available from: Reliability and validity of the Cocaine Selective Severity Assessment. Addictive Behaviors 23 4: Used to record symptoms of opiate withdrawal. Thirteen manifestations of withdrawal; observer scores Computer scoring? Staff must be familiar with withdrawal signs e. Two new rating scales for opiate withdrawal. American Journal of Alcohol Abuse. A psychiatric interview Groups with whom this instrument has been used: Psychiatric, medical, or community-based normal adults. A psychiatric interview form in which diagnosis can be made by the examiner asking a series of approximately 10 questions of a client. Administration of Axis I and Axis II batteries may require more than 2 hours each for patients with multiple diagnoses. The Psychoactive Substance Use Disorders module may be administered by itself in 30 to 60 minutes. Approximately 10 minutes Computer scoring? Diagnosis can be made by the examiner after the interview. American Psychiatric Publishing, Inc. Designed to assess client motivation to change drinking- or drug-related behavior. Consists of five scales: Separate versions are available for alcohol and illicit drug use. The SOCRATES can assist clinicians with necessary information about client motivation for change, an important predictor of treatment compliance and outcome, and aid in treatment planning.
