This is an overhead view flight simulator in which the player can fly a number of different helicopters. This is the only game in the series where vehicles can not be controlled by enemy forces. This game is the only PC game in the series without an appearance by Sarge. The game is made up of five operations with three missions in each one. It introduces several new characters, and the concept of "Plastrification". Plastrification, according to Dr. Madd, is a condition that occurs when a soldier from the "Plastic World" spends too much time in the "Big World" causing the hardening of the limbs and the forming of a plastic base. However, the character Bridgette Bleu has developed a serum that reverses the effects of plastrification. This title is set almost exclusively in the Plastic World, and several vehicles are available to drive. The Tan Army once again launches an unprovoked attack upon the Green Army, so the Green retaliate by attacking the Tan capital. When they discover that the Tan have created weapons of mass destruction, they declare a full-scale war against the Tan and deploy their forces worldwide to destroy the revived Tan Army and its new weapons. This game introduces submarine warfare to the World War titles. Plastro tries to capture the super soldier, but the crash-landing of the helicopter transporting it inadvertently awakens Omega Soldier, causing a one-man rampage against Tan forces. It includes 2 new helicopters, the "King Cobra" and the "Osprey", in addition to the Chinook and Apache. There is a new co-pilot named "Bombshell". In this game each co-pilot has a special secondary weapon which can only be used by that co-pilot. In this game, Bridgette Bleu traps Vikki Grimm in another dimension through the use of a portal. Vikki and a lion named Leo must find the right portal to take them back to the "Plastic World". It provided a brand new perspective on the Army Men game - base building, and a fully 3D camera. The game does provide some unique elements such as collecting the melted plastic after a battle and recycling it to create a fresh supply of troops. It is also unique along with Army Men: This may have been used to give clarity to what the individual soldiers were holding, which would be more difficult with colored weaponry. The Tan Army has struck once again and has taken over a Green Army base. Colonel Grimm has formed a two-man team: Sergeant Hawk and a blue spy to fight the Tan Army.

## 2: Prima Official Game Guide | Awards | LibraryThing

*This is a must for any Army Men World War player. From in depth maps to strategies for multiplayer games. This is a great guide. Tan doesn't stand a chance!*

Maybe I need to refresh my views on what makes a good video game. Or maybe 3DO just needs to stop making these damn Army Men games. The idea stopped being original years ago along with everything else that is in this game. The Tan and Green armies are just going at each other in the plastic world and not in our oversized human world. So whatever charm and fun that the game ever claimed to have is totally gone now. All that is left is a way below average squad based strategy game. Where should I begin? Not even this aspect of the game underwent an upgrade. All corners were cut. Luckily enough, the menu system is easy to get around, so it is easy to actually get into the meat of the game. Graphics The visuals in this game make me long for the pixilated graphics of the Super Nintendo. The fact that all of the moving units are monochromatic just makes the bad animations and lack of detail even worse. Textures in the world just make your units blend in so that they are hard to find at times, which believe it or not, can cause some problems. It seems that with all of the many Army Men games and all of the bad comments about the bad graphics that they would make some kind of attempt to make the game at least slightly pleasant to look at. Sound I was tempted to take a movie of the game just so I could take a clip of the atrocious sounds that curse this already cursed game. The voice acting especially. There is one point in the game where an allied blue unit that has had his troops destroyed is hiding in the bushes. When you get close enough to him, he spouts out how scared he is and blah blah blah. All it made me want to do was turn the game off. The basic sound effects in the game are just that, basic. They are boring, without any kind of personality or flair, and most of all annoying. The game still has bad jokes that are delivered with the timing of an accidental pregnancy. Playability Interface is everything in a real-time strategy game. But did they care to really think the interface out? Meanwhile, half of your units have kicked the bucket and you need to load up the save game. Selecting special weapons and items is also a pain in the butt. You have to right click on the item in the gui in order to select it. And unfortunately, if you forget to change back to your regular gun, the computer will just keep using up the limited ammo of the special weapons if an enemy is near. You can also take control of individual units of the game and use the keyboard to move them around and roll and duck and kneel and all of that. On a positive note, some of the missions are okay. Too bad the mucky gameplay gets in the way of them. But there are several different types of missions, which at least keeps some small interest in the game. Not nearly enough to make the game passingly good however. Multiplayer Yes it has multiplayer, so you and a bunch of your friends can be in pain together. You know, kind of like a bonding experience.
