During the Renaissance, Rome was divided in four districts: Contents History Beginning of an empire Archaeological evidence supports that Rome grew from pastoral settlements on Colle Palatino , the future site of the Roman Forum, upon which there are several caves. Eventually, the Republic of Rome was founded in c. After that, Rome became an economic and cultural powerhouse in Europe, even though Florence surpassed Rome as the centre of the Italian Renaissance. Due to the rivalry between the two cities, the papacy spent vast amounts of money to create cultural masterworks. And in fact, I want to begin right now. Assent was given by Pope Sixtus IV, and the Templars were provided with military support for their endeavors. Ruling from Rome, he was left alone by the Assassins for the most part until , when Ezio Auditore da Firenze learned that the Vatican Vault was located in Rome, beneath the Sistine Chapel. At the time, the city had fallen far behind those of Florence and Venice , and had grown stagnant in terms of development, due to the influence of the Borgia. In order to free Rome of the Borgia influence, Ezio killed the overlords of the towers and burned the structures themselves to the ground, taking them over for the Assassin Order afterwards. By recruiting several Roman civilians as Assassin apprentices , the Brotherhood worked to free Rome of Templar control, which was accomplished by the death of Rodrigo in and the subsequent Pope Julius II having Cesare arrested. Ezio rescued him, and the duo discovered the Pythagorean Vault inside the Temple, which gave the coordinates for the Grand Temple in North America. Clay remained in the lab for the remainder of his physical life, until the consequences of the Bleeding Effect drove him insane and led him to commit suicide. Clay would then continue to provide assistance within the Animus to his successor, Desmond Miles , via an implanted digital consciousness. There, Desmond managed to rescue his father and kill Vidic using his Apple of Eden, which he also used to escape the laboratory. The simulation was set in the Centro District , depicting the market square, upon which a great many market stalls had been set up, located in front of the Pantheon and the surrounding residences. Although the Pantheon could be seen, its interior and exterior were inaccessible. The streets themselves were relatively spacious, but the many hidden alleyways allowed people to slip away from the masses with ease. Rome, like most of the simulated locations in the first and second stage, had two aesthetic variations. As such, it could be utilized during the day or at dusk. Layout The city was divided into four districts: Centro, Antico , Campagna , and the Vaticano district. With the exception of the Vaticano district, these were also subdivided into 12 territories, each one controlled by a Borgia tower. Brotherhood designed Rome with its later Baroque style to be more familiar to their audience. Brotherhood, with fencing and blockades along the Castello and Vaticano district. This is one of the largest anachronisms in the series to date, and an oversight of years.

Three days later, the body was pulled from the river and autopsied. The Roman Brotherhood of Assassins, also known as the Hidden Ones during its early years and later as the Liberalis Circulum, was the branch of Assassins which operated throughout the territory controlled by Rome during the era of the Roman Republic and the Roman Empire.

Next day the visitor has disappeared, and so has Jonathan. His friends realise that he has gone on a secret quest to Rome, and they are determined to find him. Their dangerous mission takes them to the Golden House of the Emperor Nero, where a deadly assassin is at work. He is gloomy, saying that something bad always happens on his birthday. He opens his presents and is not satisfied with any except a jar of lemon oil; he breaks it, the scent reminding him of his mother, who died in the Siege of Jerusalem. Not long afterwards, a stranger arrives at the house. Then Jonathan realises that the stranger is Simeon ben Jonah. Darting out of hiding place, Jonathan head-butts the assassin and tells his father to knock him out cold before he gets up. Later, Jonathan thinks about the overheard conversation, concluding that Simeon must hate him for preventing Susannah from leaving. That night, he dreams that his mother is sat at her loom in the Cyclops cave and tells him that she is still alive. The next day, the household wakes to find that Jonathan and Simeon have disappeared, but have left a message: The official returns and arrests Mordecai for hiding Simeon. Realising that Jonathan is very likely in danger, Flavia Gemina and Nubia set off after him, with their bodyguard, Caudex, and cart driver, Feles. To their relief, the man welcomes them in and they tell him the reason for their visit; he kindly agrees to help them. Meanwhile, Simeon and Jonathan have rented a room in Rome, where Simeon admits to his nephew that he is a messenger to the Emperor Titus Flavius Vespasianus. Simeon is also revealed to be a skilled musician on the bass lyre. Bato tells them that Simeon had been involved in a plot to kill the emperor. If Mordecai helped him, it was treason. The three friends visit Mordecai in the prison; he tells them that Simeon really was an assassin, but had changed his ways years before. They then return home to discover a message from Jonathan: Susannah is alive and at the Golden House; this was the reason he had run away with his uncle. Aristo and Lupus set off to Rome to tell Flavia and Nubia the news and help them, whilst Miriam stays in Ostia to look after the house. Meanwhile, Simeon admits to Jonathan that he is the first of three assassins hired to kill the Emperor. He then asks the boy if he wants to go with him to the palace disguised as musicians, and help him kill the Emperor. Jonathan agrees, but only as it would provide a chance to see his mother. At the palace, Simeon is allowed in to perform because of his exceptional musical talent; however, whilst he is playing he is recognised as an assassin. Simeon and Jonathan are arrested; Simeon is told that his eyes will be gouged out. Jonathan is branded as a slave and sent to work at the Golden House, where he meets the eight year old Rizpah, who knows all the passages, or "cryptoporticuses", of the Golden House. He is able to find her, but discovering that she is visited by the Emperor, he at first thinks that Susannah and Titus are lovers and leaves without making himself known. Rizpah tells Jonathan that it was a woman called Berenice had hired Simeon and other assassins, but that the target was Susannah, not the emperor Titus. Lupus slips into the Golden House to search for the third assassin. Meanwhile, Jonathan hides behind a bush and sees Susannah visited by the Emperor again. After Titus leaves, Jonathan is discovered and Susannah realises that he is a slave in the House. She tells him that Simeon has not been harmed and that the emperor regrets that he sieged Jerusalem. She also explains that she stayed behind all those years ago because her lover, Jonathan the Zealot, was fighting in the city. Jonathan realises that this was the Jonathan whom Simeon was speaking of. She believes that she can make Titus repent for the evil things he has done in the past. Elsewhere in the Golden House, Lupus spots the assassin, Porcius, and chases him. The assassin escapes and climbs up to the roof, but Flavia throws a tambourine at him. He smashes through the glass roof and falls to his death. Titus realises what had almost happened and out of gratitude gives all the slaves and women of the Golden House the option to leave if they wished. Simeon becomes the steward to the Golden House. Titus apologizes to Jonathan for the brand and frees him. The group returns to Ostia to find Mordecai free. The novel ends with the characters holding feast to celebrate. Clio comes, which causes great surprise, as the Ostians had thought she had died in the volcano eruption. Lupus is especially delighted, as he is very fond of her. An old acquaintance, Felix, is

also at the feast.

Rome (Latin and Italian: Roma) is the capital city of Italy. During the Renaissance, Rome was the capital of the Papal States and headquarters of the Roman Rite of the Templar Order.

In fact, they opposed Caesar during his bloody rise to power in a civil war. Only when he started winning the war did they defect to his cause. Decimus belonged to the Roman nobility, the narrow elite that ruled both Rome and an empire of tens of millions of people. Decimus was a soldier at heart, educated but rough and ambitious, as his surviving correspondence shows. Decimus warmed to Caesar, a great commander and a war hero to boot. It was civil war and Decimus chose Caesar. A grateful Caesar named Decimus acting governor of Gaul while Caesar went off to challenge his enemies elsewhere. After more than four years of hard fighting, Caesar returned to Rome triumphant in 45 B. Why, then, did Decimus raise a dagger against Caesar only nine months later? Many Romans feared the power that Caesar amassed. In theory Rome was a constitutional republic. In practice, Rome teetered for decades on the brink of military dictatorship. He even took a queen as his mistress, Cleopatra of Egypt. In March 44 B. All of this was too much for Roman traditionalists. But ambition rather than political principle turned Decimus against Caesar. He wanted the distinction of a triumph or formal victory parade in Rome, but Caesar denied it, although he granted the privilege to lesser generals. No doubt the dictator liked to dole out his favors slowly to keep his men on their toes. He rewarded Decimus in other ways, but the slight still smarted. Another possible influence on Decimus was his wife, who came from a family that was opposed to Caesar. In winter 44 B. Cassius originated the conspiracy to kill Caesar. Like Decimus and Brutus, Cassius belonged to the nobility. He was a professional soldier, like Decimus, but also an intellectual like Brutus. A man of action, Cassius inspired Brutus to move. Brutus was no soldier but he was a philosopher and orator and much admired in Rome. Decimus joined the plot as well, as did more than 60 prominent Romans. Decimus, however, made the wheels turn. Caesar even had Decimus at his side at a dinner party the night before his assassination. On the morning of the Ides Caesar suddenly decided not to go to the senate meeting, probably because of rumors of conspiracy. In fact, the soothsayer warned Caesar a month earlier to beware a day period ending in the Ides of March, that is, the times from February 15 to March. But the Ides had finally come. Decimus did his job. The Roman leader Julius Caesar was stabbed 23 times by a mob of mutinous senators in 44 B. Could he possibly have survived long enough to utter his famous last words? Afterwards Decimus provided security to the killers. He owned a troupe of gladiators who doubled as a private police force. They escorted the assassins to safety on the Capitoline Hill and guarded the perimeter during the tense days that followed. Decimus came in for particular criticism because his closeness to Caesar made his treachery seem all the worse. Decimus soon left Rome to lead an army in northern Italy and defend what he saw as the cause of the republic. Although he started out strong he was outfoxed by Octavius. A year and a half after the Ides of March, Decimus was abandoned by his soldiers, captured by his enemies and executed. A year later, Brutus and Cassius lost a battle and committed suicide. Eventually he went by the name of Augustus. In part because Brutus monopolized favorable publicity. His friends and family polished his image in publications after his death. Unlike Brutus, Decimus was no wordsmith, nor did he have admirers with a literary flair to tell his story. Yet his role does appear in certain lesser-known ancient accounts. Although Shakespeare made little use of them they survive today. Barry Strauss teaches history at Cornell University. He is author of *The Death of Caesar*:
