

1: astm a36 pdf- jhroundbar

Abstract. This specification covers carbon structural steel shapes, plates, and bars of structural quality for use in riveted, bolted, or welded construction of bridges and buildings, and for general structural purposes.

A number in parentheses indicates the year of last reapproval. This standard has been approved for use by agencies of the U. Such requirements apply only when specified in the purchase order. Within the text, the SI units are shown in brackets. The values stated in each system are not exact equivalents; therefore, each system is to be used independently of the other, without combining values in any way. Such notes and footnotes, excluding those in tables and figures, do not contain any mandatory requirements. Current edition approved Dec. Originally approved in No further reproductions authorized. General Requirements for Delivery 4. Structural products produced from coil means structural products that have been cut to individual lengths from a coil. The processor directly controls, or is responsible for, the operations involved in the processing of a coil into a finished structural product. Such operations include decoiling, leveling or straightening, hot-forming or cold-forming if applicable, cutting to length, testing, inspection, conditioning, heat treatment if applicable, packaging, marking, loading for shipment, and certification. Materials and Manufacture 6. D,E Elongation in 8 in. Elongation in 8 in. B For wide flange shapes with flange thickness over 3 in. C Yield point 32 ksi [MPa] for plates over 8 in. D Elongation not required to be determined for floor plate. E For plates wider than 24 in. Shapes A Product Thickness, in. For each reduction of 0. Those that are considered suitable for use with this specification are listed by title: Charpy V-Notch Impact Test. Alternate Core Location S Single Heat Bundles S ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility. This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.

2: Standard ASTM A36/A36M

Designation: A36/A36M 14 Standard Specification for Carbon Structural Steel 1 This standard is issue issued under the fixed designation designation A36/A36M; A36/A36M; the number immediately following the designation designation indicates the year of original adoption or, in the case of revision, the year of last revision.
