

1: Atlas of maritime history / Richard Natkiel, Antony Preston | National Library of Australia

This is a straightforward look at major 20th century battles as of its publication complete with photo's and military maps. This book doesn't provide the type of in-depth historical reading desired by many, but it is an interesting survey look at major wars and battles.

Alton Ochsner and Michael DeBakey first reported the association of smoking and lung cancer. This was the birth of chemotherapy—the use of drugs to treat cancer. Norman Delarue compared 50 patients with lung cancer with 50 patients hospitalized with other diseases. He showed that cancer cells were not autonomous and self-perpetuating but were dependent on chemical signals such as hormones to grow and survive, and that depriving cancer cells of these signals could restore the health of patients with widespread metastases. He was awarded the Nobel Prize in shared with Peyton Rous. It was rapidly approved for use in childhood leukemia. She received the Nobel Prize in Wynder and Evarts Graham. The same issue featured a full-page ad for Chesterfields with the actress Gene Tierney and golfer Ben Hogan; the journal accepted tobacco ads until Richard Doll and Prof. Austin Bradford Hill conducted the first large-scale study of the link between smoking and lung cancer. The cigarette companies won. Min Chiu Li — first demonstrated clinically that chemotherapy could result in the cure of a widely metastatic malignant disease. Min Chiu Li published another important and original finding: Twenty years later, it was demonstrated that combination chemotherapy, combined with techniques for local control, had virtually eliminated deaths from testicular malignancy. Selikoff —92 published the results from a study linking asbestos exposure to the development of mesothelioma. These studies concluded that total mastectomy offered no advantage over either lumpectomy or lumpectomy plus radiation therapy. This led to human bone marrow transplantation, resulting in cures for leukemias and lymphomas. Thomas won a Nobel Prize for his work. Bonnadona in Milan performed the first study of adjuvant chemotherapy for breast cancer using cyclophosphamide, methotrexate, and 5-fluorouracil, resulting in reduction of cancer relapse. Adjuvant chemotherapy is now standard treatment for lung, breast, colon, stomach, and ovary cancers. Blumberg was instrumental in developing a reliable and safe vaccine against hepatitis B which causes primary liver cancer. Robin Warren identified bacterium H. This project proved the safety of gene therapy.

Atlas of the 20th century by Richard Natkiel starting at \$ Atlas of the 20th century has 1 available editions to buy at Half Price Books Marketplace.

A hospital ward during the Spanish Flu. Health organizations across the world fear epidemics and pandemics. With the growing populations and overcrowded urban areas, the potential of an epidemic to wipe out entire human populations becomes larger every day. The present century has already been plagued with severe epidemics and pandemics like the West African ebola virus epidemic, the Haitian cholera outbreak, and more. Health organizations like WHO are constantly striving to contain such outbreaks and also prevent them from happening. Lessons learned from the past make it easier to manage the infectious disease outbreaks of the present century. It continues to plague thousands across the world even today. As of , nearly The global incidence of HIV infection was at its peak in According to estimates by Lancet, it was 3. The global incidence, however, decreased significantly with the turn of the century. In , it was 2. Unfortunately, little change was seen in the figure from to Sub-Saharan Africa is the worst affected region in the world. More than half of all global HIV cases are recorded here. Of all countries in the world, South Africa has the highest population of HIV infected individuals at 5. It was an influenza pandemic that involved the H1N1 influenza virus. Worldwide, million suffered from the disease while nearly 50 to million people lost their lives. The disease spread to near all corners of the globe including remote islands in the Arctic and Pacific Oceans. Interestingly, this pandemic killed predominantly healthy young individuals. Most other diseases have greater adverse effects on children, the elderly, and immunocompromised individuals. It neither originated in Spain nor did it kill more people in the country than in others. However, due to wartime censors, many countries like the UK, US, France put restrictions on the press to report the breakout in the initial stages. Asian Flu For three years, from to , a deadly pandemic raged across the world and claimed millions of lives. Termed the Asian flu pandemic, the outbreak was caused by the influenza A virus and was first identified in Guizhou, China, in Despite the name, the disease was not restricted to Asia but also spread to other parts of the world and killed 69, people in the US. As per various sources, one to four million people died due to this disease. The Flu Pandemic Another flu pandemic ravaged the world and killed about one million people within a short span of time from to The flu was caused by the H3N2 strain of the influenza A virus. The pandemic is often referred to as the Hong Kong flu since it originated in Hong Kong. The first record of the outbreak was reported on July 13, Vietnam War troops returning to the US brought the disease with them to the country. However, it was under control in the country. Other parts of the world were also not spared from this disease. Better medical facilities and the availability of antibiotics were some of the factors that helped restrain the pandemic from causing a greater number of deaths. The Sixth Cholera Pandemic Over , people lost their lives during a major cholera outbreak that originated in India in It continued into the 20th century and ended in The cholera is first believed to have struck at the Kumbh Mela in Haridwar. More than 15, died from smallpox between January and May of the same year. Many more were left maimed for life. Attempts were made to contain the disease and prevent its further spread. The last case of smallpox in the country was recorded on May 24, Five years later, the disease was completely eradicated from the world. This page was last updated on June 26, By Oishimaya Sen Nag.
