The manual describes it: The actual jack seems to take a plug that is like a 3. What the heck is that? There appears to be a cable that has such a plug on one end and a "DIN" connector on the other to connect to certain specific speakers. The use of the top 3. The adapter has the 3. The Audigy 1 is capable of EAX 4. This was enabled as the Audigy 2 was released and new drivers were available. The Audigy 1 has no disadvantages in this manner. Or am I misinformed? It came installed by default on an old Gateway machine. You can still go to the Creative Labs website and download the documentation for this exact card so What is the model number on the card? SBxxxx -- Swaaye I think it is similar to the original audigy value card. From looking at the picture it looks like it has a CA chip on it. If necessary I can take a look at it to figure out what chips are on it I noticed the SB Player comes with a breakout box whose connector has the same layout as the 2ZS which I also own, but without box. Please take a moment to review my edit. If you have any questions, or need the bot to ignore the links, or the page altogether, please visit this simple [FAQ](#) for additional information. I made the following changes:

You can help by adding to it. April Testing chain: External loopback line-out1 - line-in3 Sampling mode: It had nearly all of the capabilities of the PCI edition, but in a far smaller form factor. It was the first gaming-oriented sound hardware add-on board for notebooks that offered full hardware acceleration of 3D audio along with high-fidelity audio output quality. The video capture of the device is hardware-accelerated; encoding it to a complex format in real-time rather than using the CPU. While this results in good quality video even on basic systems, the device cannot be used by software that uses the standard DirectShow or VFW interface. Because of this limitation, the supplied software to capture video must be used. This prevents use of the device in conjunction with a video camera as a webcam, as standard webcam interfaces use DirectShow. Creative has made the free VidCap application available on their website. Captured files can be imported into a video editor application or DVD authoring program. The card is physically smaller than other Audigy 2 cards. It is designed as an entry-level budget sound card. I searched the internet and could find no evidence of any retail boxes labeled "Audigy 2 SE". Of note is that Creative hardware is not necessary for this device. It is entirely a software solution that is adaptable to various DACs. The board layout is similar to the Audigy 2 Value. It still supports a maximum of 7. It was developed by Eugene Gavrilov. The official webpage is <http://> For the older Audigy cards, there are both benefits and drawbacks compared to the latest official drivers:
