

1: Books I Hide From My Children

The pictures are really sweet and the flaps are very attractive to small children. It has pictures of a Mommy holding her baby and pictures of grandma and grandpa-which my daughter loves. Great little book.

Pass along this Simple. This entry is part 12 of 32 in the series Baby Days Our little one is turning one in one week. She just started walking this week. She still prefers crawling, but it is oh so sweet to see her toddling along eyes bright with the accomplishment! In honor of her birthday, I thought I would share a book list just for little ones. These are must read by the first birthday. All introduce early concepts and all are fun for little eyes and ears. This post includes affiliate links. When you click on the images of each book on the left and make a purchase, your children will be grateful and so will I! I will receive a small remuneration for referring you. No pressure, the book list is free and libraries are amazing! It is a perfect book for bedtime routines and early lap sitting reading. Fluffy Chick and Friends is another wonderful early book because of its soft cover. It comes in various versions, but this one is a bath book. This book introduces baby to animals, sounds, and colors with a cute rhyming scheme. It is an excellent book to start introducing character voices to your little one. I love to read this one to our girls like a pirate! I am sure my voice sounds nothing like a pirate, but they enjoy and notice the different voice. As the name suggests, this book teaches colors and introduces the animals of the ocean. In My Den by Sarah Gillingham is part of a series of finger puppet books that delight little eyes. There is a hole in the back of the book for the reader to slip her finger into and wiggle around as she reads the book. Watching little eyes light up for this read is so much fun! The book has simple prose, perfect for short attention spans. Seuss introduces little ones to the magic of Theodore Geisel. Early introduction to counting concepts and silliness is a must for baby! Toes, Ears, and Nose! The cute illustrations by Karen Katz are highlighted by the flaps opening to reveal tiny cute body parts. Babies just learning to turn pages will love this book because they will have much to do. Moo, Baa, La La La! This is one of the best books for encouraging talking with your little ones. Goodnight Moon by Margaret Wise Brown is wonderful for babies, toddlers, and school age children getting ready for bed. But babies will like the visual distinctions on each page. Every other layout page is in color. And the other layouts are in black and white. The black and white pages will appeal to baby very early on as they see these distinctions best at this point and then the color pages will subtly introduce colors to baby. I love reading through the book and then singing the ABCs with our little girls while pointing to each letter. Our oldest learned the alphabet rather quickly with this book! Alice in Wonderland by Jennifer Adams and Alison Oliver is part of a series of books introducing basic concepts through classic literature. I love the illustrations! The sparse prose introduces only one concept at a time, giving baby lots to look at with only one new word to process. Perfect for introducing early concepts. Their version of Alice introduces color. A library of little books like this Mickey Mouse Clubhouse board book library is a must! We have a couple of sets. Most libraries of little books introduce early concepts in small doses. They are ideal for small hands to turn the pages and help teach and reinforce cleaning up. When we are done with our little books, we take the time to put them back in the box. This makes early trips to the library a little easier. Tickle Time is so great I just cannot stand it! It is perfect for getting all those giggles and grins out of your little one. And it also reinforces the idea that reading can be FUN! I hope you enjoyed this book list! If you are always on the hunt for a good book, be sure to like me on Facebook where I share the Picture Book of the Day each day selected by an amazing group of moms who love to read. Or you can follow the Picture Book of the Day board on Pinterest to see the pins in your feed. What books would you add as must reads for babies?
