

BASIC MATH REVIEW: CRUNCHING THE NUMBERS pdf

1: [Basic Math Online Course] | www.enganchecubano.com

11/ REVIEW SHEETS BASIC MATHEMATICS MATH A Summary of Concepts Needed to be Successful in Mathematics The following sheets list the key concepts that are taught in the specified math course.

Give your kid a leg up with these educational and super fun math apps. Click on an item in the set below to see more info. Fish School Friendly fish are waiting to help teach kids some of the basics in new and exciting formations! Basic repetition and picture recognition combined with colorful schools of fish swimming into numbers makes counting fun for your tiny tot. Work on numbers and counting with the friendly fish. Brainzy This online games program gets kids to practice essential number and arithmetic skills through over 25 math lessons. Perfect for kids 3 to 7, the games are fun for kids and accessible from computers and iPads. Kids will work on one-to-one number correspondence, addition and subtraction, and shapes through arcade-like games and catchy songs. Click here to play Brainzy. Park Math Variety is the name of the game in this engaging yet educational app. With seven sections to choose from, kids will learn addition, subtraction, counting and categorizing. Each page has plenty for little fingers to explore, with interactive surprises to touch and try in every scene. Kindergarteners will learn the concept that objects and animals can represent numbers or sections of an equation. Hickory Dickory Dock by Mindshapes Ltd. Each hour on the clock brings a new rhyme and activity to play, and little fingers will get a work out helping the delightfully animated mouse as he tries to eat cheese, clean the clock, bake, and much more. Features require some getting used to, so make sure to show kids how to select the highlighted number to set the correct time and unlock all the different features for each round. Once the fun is started, though, get ready for learning and laughter! Wings Forget Angry Birds help your little one soar to the head of her math class with this avian-themed pre-multiplication app. Kids will explore the concepts behind multiplication with easily understandable dot visuals before actually having to solve equations. A Fun Math Game Pay homage to retro arcade-style games with this addicting space-themed math app. Take off on an intergalactic mission into outer space, solving puzzles and shooting down alien crafts as you fly. Watch out for enemy fire and avoid punching in too many wrong answers; both could lead to a failed mission. Missions are based on four different math operations addition, subtraction, multiplication and division. Rocket Math Earn money and learn about money concepts by solving math problems in this fast-paced intergalactic app. Modern, sharp graphics are age-appropriate and still appealing to the upper-elementary crowd. This tool covers a lot of ground and provides practice for most third grade math basics like addition, subtraction, multiplication and division with an appealing theme space exploration that keeps kids playing. Math Bingo This app goes above and beyond to improve on the old classic game, with engaging interactive elements and game play that will have kids coming back for more. Choose from addition, subtraction, multiplication or division, and race against the clock to solve the sums. The name of the game is to review basic math facts in reverse: Splash Math Worksheets Blast off into number space with this intergalactic math app. Fifth graders can work independently, moving their avatar between space-themed challenges that tackle place value, algebra, multiplication, division, fractions, decimals, measurement and geometry. Match-Up Math Match your way to math success with this educationally rich app. In the same vein as many classic matching games, your mathematician clears tiles off the screen by matching problems and answers. Match-Up Math was made with long-term use and multiple grade levels in mind.
