

1: THE 10 BEST France Hotel Deals (Nov) - TripAdvisor

Bed & Breakfast in France by AAA, AAA. (Paperback) We see that javascript is disabled or not supported by your browser - javascript is needed for important actions on the site.

Overview[edit] Generally, guests are accommodated in private bedrooms with private bathrooms, or in a suite of rooms including an en suite bathroom. Some homes have private bedrooms with a bathroom which is shared with other guests. Often the owners themselves prepare the breakfast and clean the rooms, but some bed and breakfasts hire staff for cleaning or cooking. China[edit] In China expatriates have remodelled traditional structures in quiet picturesque rural areas and opened a few rustic boutique hotels with minimum amenities. Most patrons are tourists but they are growing in popularity among the Chinese. They usually are a small family-run hotel, have an intimate ambience and a pleasant atmosphere. It provides an affordable alternate for the hotels. Premium providers may offer extra services to justify the increased price. Some of these services include, but are not limited to: Breakfast can mean a cooked " Irish Fry " or continental style buffet. All over the country, but especially in northern Israel Galilee, Upper Galilee and the Golan Heights the zimmer has developed into an extensive industry. This industry began to develop in the s, when agriculture became less profitable, and many families with farms in moshavim, kibbutzim , farms and even in cities decided to try their luck in the business of hospitality. In the last decade, there has been development of bed and breakfasts also in southern Israel in the Negev. There is a national law "Legge 29 marzo , n. In the Netherlands, it is also often referred to as lodgings with breakfast, a guestroom or guesthouse. Snow continues to pile up during the February 9â€”10, North American blizzard. Bed and breakfasts in New Zealand tend to be more expensive than motels and often feature historic homes and furnished bedrooms at a commensurate price. Popular resorts like Murree , which attract many tourists from different parts of the country, have a number of such resthouses. The expenses can vary, depending on the quality of facilities. Most bed and breakfast facilities tend to expediently cater to families, given the high level of group tourism, and offer suitable overnight lodging. Bed and Breakfast in Romania are rated with daisies, from one to three, three daisies being the best rating. Visitors will have the chance to try fresh, organic farm products. Spain[edit] Bed and breakfast is a 21st-century phenomenon in Spain. In the past, the equivalent was Habitación con derecho a cocina which means "room along with use of the kitchen area". In Spain, bed and breakfast offers are provided by hotels , hostels , apartments , houses and Inns. Normally bed and breakfast flats or houses consist of rooms but as they are not heavily regulated, people are free to provide their houses as bed and breakfast to pay for some of the bills. No laws in Sweden restrict such advertising; the only restriction is from the authority of traffic Trafikverket , who only give permission to put up the bed and breakfast sign by the local road if the owner lives in the same building as the guests. If the proprietor has less than eight beds, no permissions from the police office is required to run public accommodations, but fire safety and food safety applies to all new facilities, regardless of the number of beds. Standard is usually acceptable but sometimes with en-suite bathroom or sometimes a shared bathroom in the corridor. Most people in Sweden speak and understand English, but in small establishments it often can be tricky to pay with Credit card or Euro. This section does not cite any sources. Please help improve this section by adding citations to reliable sources. Unsourced material may be challenged and removed. Lodging establishments were few and far between in the 18th century and, apart from a limited number of coaching inns , wayfarers relied on the kindness of strangers to provide a bed for the night. Hotels became more common with the advent of the railroad and later the automobile; most towns had at least one prominent hotel. During the Great Depression, tourist homes provided an economic advantage to both the traveller and the host. While little more than short-stay boarding houses , the rooms brought needed income for the home owner and saved money for the traveller. A tourist home or guest house represented an intermediate option between inexpensive campgrounds or cabins and costly railway hotels. The motel fad of the s and s later filled this niche, now occupied by economy limited

service hotels. Non-white travellers could consult *The Negro Motorist Green Book*, a printed directory, to find lodging at which they would be welcome despite racial segregation and widespread discrimination. Bicentennial in and assisted by two crucial pieces of legislation: By the mids, the Internet made it more affordable for innkeepers to promote their properties worldwide; it provided online reservation software and allowed travellers to view detailed photos, videos, and reviews. To stay competitive with the rest of the lodging industry, larger bed and breakfast inns have expanded to offer wedding services, business conference facilities, and meeting spaces as well as many other services a large hotel might offer. Regulations[edit] Regulations and laws vary considerably between jurisdictions both in content and extent and in enforcement. They are usually required by local and national ordinances to have fire resistance, a sufficient fire escape plan in place, and smoke detectors in each guest room. Kitchens and equipment used to serve meals are also often required to be monitored for hygienic operation, but there are significant national and local differences. The reason for the moratorium is to force home owners with extra room to rent out their extra space to low income residents who otherwise cannot afford housing on crowded Oahu. Professional and trade associations[edit] This section does not cite any sources. September Learn how and when to remove this template message Many inns and bed and breakfasts are members of professional associations. There are international, national, regional, and local associations, all of which provide services to both their members and the travelling public. Many require their members to meet specific standards of quality, while others simply require a lodging establishment to pay dues. In the US for example, each state has an innkeeping association usually non-profit that exists to promote the industry and tourism. Within those state associations, many city and regional bed and breakfast associations can be found. Many state, city and regional associations, have inspection criteria that often exceed government requirements for safety and cleanliness. In the British Isles the national approval boards set up by governments are far more stringent than others and standards are expected to be high. Please help improve the article by presenting facts as a neutrally-worded summary with appropriate citations. Consider transferring direct quotations to Wikiquote. The following attributes are also appealing: The friendliness of the host was the most important factor, followed by easy access to other places, the site being the most appealing place in the region. Visitors have the opportunity for a relaxing break in a homely environment. Operators have the opportunity to develop a profitable business, make new friends and contacts, understand the cultures and lifestyles of others, and to educate guests about their way of life. Income and leisure time have changed so that shorter breaks with greater choice of leisure activities are sought by travellers. Changing work patterns have increased the popularity of shorter breaks that minimize the absence from work and the effect of absences on workflow and involvement. Eighty-two percent of those sampled are married, and about half 44 percent have children living at home. Newlyweds and "empty nesters" account for a smaller proportion. In fact, only 9 percent of the market is attributed to adults over 59 years of age. Education levels are high, with the largest response category being completion of a college degree 31 percent. In addition, another one third had some graduate school or an advanced degree. It follows that the occupational profile is dominated by professionals and managers. Words like "charm," ambience," "quaintness," and "atmosphere" were often used by respondents to describe this intangible appeal. This system of independent reviews is one of the fastest growing consumer content oriented sites on the net. Another study suggests that people trust online reviews posted by previous guests: The study, conducted in October by comScore and The Kelsey Group, found that online, consumer-created reviews have a big impact on prospective buyers. The study showed consumers were so trusting of online reviews, they were willing to pay at least 20 percent, and up to 99 percent, more if a company was rated excellent or five-star than if a business received a good, or four-star, rating. The study was based on 2, survey respondents, including who used online consumer reviews. Professional critics, and owners of companies that receive less-than-excellent online reviews by laypersons, might question the ability of regular people to adequately judge a service. In fact, noted the researchers, "reviews generated by fellow consumers had a greater influence than those generated by professionals. At least 75 percent of those using online reviews for nearly every category of business included

in the study said the amateur field reports significantly impacted their decision. Eighty-seven percent of those in search of hotels said the reviews played a big part in their choice. This research note highlights the usefulness of the hedonic price technique in this industry by evaluating willingness to pay for specific characteristics of bed and breakfast accommodations. Heterogeneity in price and amenities offered by bed and breakfast accommodations enables us to generate estimates of willingness to pay for specific characteristics. Using data on price and amenities collected from bed and breakfast accommodations, the findings show a willingness to pay for specific characteristics such as sunny balconies, a five star Champagne breakfast, and a room furnished with antique treasures. Yet more and more people are flocking to bed-and-breakfast inns, the most old-fashioned homes away from home. Just 20 years ago, there were only 1, B and Bs, as they are nicknamed, scattered throughout the country. Today there are more than 28, serving more than 50 million guests each year. Many have been lovingly renovated with period decorations, inviting visitors to step back in time. Others carry a theme throughout the house. Since on average they have only seven or eight rooms, they offer peace and quiet, a rare commodity in the average home. The hosts, who nearly always live on the premises, provide plenty of coddling. They will recommend local attractions, help with dinner reservations, often provide an afternoon tea or glass of sherry--and, yes, prepare a delicious homemade breakfast. While some 10, B and Bs are private homes in which the owners offer a room or two, most are serious businesses, complete with websites and toll-free numbers. The clientele tends to be couples, most of them affluent and well educated. Most are tourists or people who are in town to visit family or to celebrate a special occasion. Bed-and-breakfasts are popular with many foreign travelers, mostly from Britain, Germany, Canada, France and Australia, who have grown up going to B and Bs in their own countries.

AAA Bed & Breakfast in France Paperback - January 1, by AAA (Author) Be the first to review this item.

Is it a drama? No sex in it. So what is it? I watched it and liked it. Afterwards, the film lingered in my head bad movies never linger like that! After a while I felt that this movie, more than other movies, can be seen as an illustration of how to relate as a human being to new unexpected circumstances. In this film you can see two different basic attitudes towards "the new", towards life. The first one Caroline is a closed one. The dynamics which follow have a universal character. You basically stay on your own, tend to isolate yourself, tend to alienate your environment, tend to become very emotional. This way of living inhibits living in the now. You just miss life. Not able to connect, you become lonely and frustrated. In a way, you die. And then you go back to the place where most people have this orientation towards life. The second one Bertrand is an open one. You see your better and more authentic self here. The one who will be happy in any situation. The one who is not afraid of his feelings. The one who stays true to himself, who is connected to himself and thereby is able to connect to others. The one who is in the now. You see how everything starts to blossom and flower. How to live life, to feel it! How old is he? Well, the director, Claude Duty, was born in Tunis in For me, this is a key. The pace of life there in Tunisia is much slower than it is in for instance Paris. Of course in his long life as a Bertrand he has met many Carolines. It feels so obvious! Of course, all this is what I see in the movie. But if you choose to watch it from this perspective, Claude Duty is the living master of wisdom. Another title could have been: I choose to give this grand little movie a 10 out of Was this review helpful to you?
