

BEHAVIORAL SCIENCE FOUNDATIONS FOR EARLY CHILDHOOD EDUCATION pdf

1: Early Childhood Education Information - State College of Florida, Manatee-Sarasota

The Early Childhood Education program prepares students to assume management, supervisory, and teaching positions in child development early learning center programs and/or transfer to a baccalaureate program at a four-year institution.

Multi-Cultural Scholars Program The Department of Applied Behavioral Science provides students with the opportunity to supplement their general knowledge within the discipline by concentrating in a specialized area of study. Students select a specialty area or option within a specialty area from among those described below. Each specialty area has its own required sequences of courses as there are typically prerequisites for enrolling in courses beyond the introductory level. Additional information about each specialty area is provided with more specific details regarding the student interest areas, practicum process, career and graduate studies opportunities, and supporting faculty members.

Adults with Disabilities Students interested in working with individuals with developmental disabilities in community settings may have interest in this specialty area. In this specialty area, students are trained to support the development of supportive teaching programs in the community for people with developmental disabilities. Through the coursework, students are taught behavioral-analytic approaches for observing and defining behavior; increasing appropriate and decreasing inappropriate behavior; developing relationships; and legal and ethical issues. Students in this specialty area generally support practicum work with Community Living Opportunities, a community-based residential service agency for adults with developmental disabilities. Graduates of this specialty area are excellent candidates for positions in residential treatment programs, community human service agencies, and vocational and pre-vocational training programs for people with disabilities. Many students also pursue graduate studies in applied behavioral analysis, special education, or psychology.

Basic Research or Conceptual Foundations Students interested in basic and applied research, and history and theory of applied behavior analysis may have interest in this area. This specialty area attracts students interested in careers for which research and conceptual skills are prerequisites. The specialty area has two options: **Basic Research Option-** Students pursuing the basic research option learn about behavioral processes and research methods, and acquire skills in the experimental analysis of behavior. Students pursuing this option are required to complete an introductory course in statistics. **Conceptual Foundations Option-** Students pursuing the conceptual foundations option learn about the historical and conceptual foundations of behavior analysis and acquire skills in historical research and conceptual analysis.

Community Health and Development The Community Health and Development specialty area in the Department of Applied Behavioral Science at the University of Kansas helps to prepare students interested in building healthy and well-functioning communities. Students and faculty in this specialty area contribute to addressing a myriad of socially important problems and goals in communities. Therefore, students in this department are trained to systematically examine community-level problems based on the principles and methods of applied behavioral science. Through the coursework in the specialty area students are trained to analyze community-level problems and goals. Students are also provided a service-learning experience in all of the specialty area courses. The course sequence culminates in a two-semester practicum arranged with faculty members and representatives of community organizations or governmental agencies. Graduates of this specialty area are excellent candidates for positions in public service. Graduates of this specialty area also often pursue a career, following graduate study, in an appropriate field such as public health, public policy, law, rehabilitation, community development, urban planning, psychology, social welfare, public health, community health, community psychology, social work, urban planning, and medicine.

Conceptual Foundations Option- Students pursuing the conceptual foundations option learn about contemporary conceptual issues in behavior analysis, its history and philosophy, and its relations with the behavioral, social, and cognitive sciences in general. Graduates of this specialty area are excellent candidates to pursue careers with research and training centers, or graduate studies in basic and applied behavior analysis. Students having already met the specialty area prerequisites are required to complete the

practicum online tutorial, the practicum pre-enrollment profile, and attend the practicum enrollment meeting with the instructors. The tutorial and the profile can generally be completed during the practicum enrollment meeting. Generally, students in the spring practica are those students completing their second semester of the practicum. Students needing to request enrollment in the spring practicum for their first semester of practicum should contact Dr. Watson-Thompson to discuss enrollment options and availability.

Early Childhood Education This specialty area is for students interested in studying young children and understanding the conditions that promote their healthy development. It includes courses in behavior analysis, child development, curriculum development, parenting, and others that address issues relating to young children. The program culminates in practica that provide students with direct experiences in toddler or preschool classrooms for children with and without developmental disabilities. Students completing this program will gain knowledge and experience in the areas of behavior analysis, child development, developmental disability, education, and intervention. This area is relevant for students interested in working with young children in home, educational, community-based, hospital, or other therapeutic settings. Students wishing to enroll for a practicum in the Early Childhood Education specialty area ABS , , , must request enrollment by attending one of two available practicum sign-up meetings held each semester at least one week prior to enrollment. The meetings are generally held in the Dole 4th floor atrium. The hours for Little Steps are 8: Prior to attending the practicum sign-up meetings, students should review the timetable and draft a schedule that will accommodate practicum hours. Please be aware that practicum spots are limited and instructors may not be able to accommodate late requests for a practicum.

Organizational Behavior Management This specialty area is for students interested in studying the application of behavioral principles to people and groups in business, industry, government, and human service settings. This specialty area includes courses in behavior analysis, research methods, and organizational behavior management with a focus on its three sub-disciplines including performance management, systems analysis, and behavior-based safety. The program culminates in practica that provide students with direct experiences improving employee behavior, work safety, or organizational systems within businesses in the community. Students completing this program will gain knowledge and experience in the areas of behavior analysis, management, staff training, and systems-level interventions. This area is relevant for students interested in behavioral consulting, management, human services, and business. The OBM practica have limited availability for students.

Youth Development and Juvenile Justice This specialty area is for students who want to work with children and adolescents who may be involved formally or informally with the juvenile justice system. It includes courses addressing issues such as juvenile law, developing relationships, counseling and problem-solving, behavioral contracting, and other techniques used when working with school-aged children and adolescents. The course sequence culminates in a year-long practicum during which students work with children and adolescents in the Truancy Prevention and Diversion Program. Graduates with this specialty are excellent candidates for positions as probation officers, counselors in mental health programs, intake and assessment officers, truancy prevention specialists, and treatment personnel in intervention and treatment programs for children and adolescents. Many students also pursue graduate study in social welfare, law, counseling, and psychology.

Specialty Area Courses For more information about requirements for our major and specialty area options, please read the Undergraduate Student Handbook.

SCRA serves many different disciplines that focus on community research and action.

APA Division Behavior Analysis Division 25 - Behavior Analysis promotes basic research, both animal and human, in the experimental analysis of behavior; it encourages the application of the results of such research to human affairs, and cooperates with other disciplines whose interests overlap with those of the Division.

American Public Health Association The Association aims to protect all Americans, their families and their communities from preventable, serious health threats and strives to assure community-based health promotion and disease prevention activities and preventive health services are universally accessible in the United States. APHA represents a broad array of health professionals and others who care about their own health and the health of their communities.

2: Early Childhood Education Programs - South Suburban College

With the goal of guiding early childhood educators in understanding and implementing classroom practices that facilitate learning of essential skills and knowledge young children require to be prepared for Kindergarten, the Foundations to the Indiana Academic Standards (Foundations) were developed in

Degree Plan Description and Outcomes The Bachelor of Science in Early Childhood Administration builds on the foundations of early childhood development best practices while preparing you to administer early childhood programs focusing on children from birth through age 8. Foundation coursework concentrates on growth and development, applied theory, health and nutrition, lesson planning, business administration, program leadership and advocacy, current issues and trends, ethics and professionalism, and strategies for building family and community relationships in a diverse society in the early childhood field. The course curriculum blends theory and practice, and provides a general education foundation in ethics, critical thinking, and communication skills to support leadership roles and responsibilities in diverse environments. A field experience component will require students to spend time working on project-based learning assignments in an early childhood setting preschool, home childcare setting, or childcare center. Students may be required to show proof of a background check, immunizations, and additional site-specific requirements as part of securing the site for the field experience component. This program is intended for students who wish to advance their career by assuming a leadership or administrative role in an early childhood development setting. This program is not intended for individuals who are pursuing a license to teach early childhood education in a public or accredited private elementary school. Upon successful completion of the program, you will be awarded a bachelor of science degree. Refer to the Progression Requirements section for details. Apply knowledge through active participation in coursework and review of current practices in child development, learning theory, program administration, leadership competencies, and financial management in early childhood programs. Child, Family, and Community Relationships: Formulate strategies for building family and community relationships in a diverse society. Evaluate developmentally appropriate observation and assessment techniques to administer and inform instructional planning for children and their families. Evaluate developmentally appropriate principles, tools, and practices to create effective learning environments for young children. Demonstrate use of professional standards, ethical values, critical inquiry, and advocacy practices of the early childhood field through the review of case study scenarios. Individuality and Cultural Diversity: Illustrate the importance of individuality and cultural diversity of children and their families to learning and development. General Education Literacies and Professional Competencies In addition to the discipline-specific outcomes, general education literacies and professional competencies are integrated throughout your academic program. You can review the general education literacies and professional competencies associated with your academic program in the undergraduate School of General Education section of this Catalog. Program Availability For program availability, please refer to the U. Policies Please refer to school-specific policies and the Policy Information section for general Purdue Global policies. Certification, State Board, and National Board Exams Certain state certification and licensure boards have specific educational requirements for programs to lead to a license or nongovernmental certification that is a precondition for employment in a recognized occupation. If certain licensed occupations, vocations, or professions are not explicitly listed, Purdue Global has not made a determination with respect to the licensure or certification requirements of those occupations, vocations, or professions. You are responsible for understanding the requirements of optional certification exams. Such requirements may change during the course of your program. You are not automatically certified in any way upon program completion. Although certain programs are designed to prepare you to take various optional certification exams, Purdue Global cannot guarantee you will be eligible to take these exams or become certified.
