

1: Thieves' World - Wikipedia

BLOOD BROTHERS by Joe Haldeman. Smiling, bowing as the guests leave. A good luncheon, much reassuring talk from the gentry assembled: the economy of Sanctuary is basically sound.

A good luncheon, much reassuring talk from the gentry assembled: Thank you, my new cook The host appears to be rather in need of a new diet than anew cook, though the heavy brocades he affects may make him look stouter than he actually is. You will stay, of course, Amar. One departing guest raises an eyebrow slightly, our host a boy-lover. We do have business. Enoir, you may release the servants until dawn. We will be dining in the city. Turns and gestures to the pile of cushions by the huge fireplace. I have a good wine, Amar. Be seated while I fetch it. Were you comfortable with our guests? He returns with two goblets of wine so purple it is almost black. He sets both goblets in front of Amar: Even closest friends follow this ritual in Sanctuary, where poisoning is art, sport, profession. Yes, it was the colour that intrigued me. Kalos or something; I could never get my tongue around their barbaric A good dessert wine. Would you care for a pipe? Enoir returns, jingling his bell as he walks up the steps. That will be all for today, thank you We can live with their whimpering. The heavy front door creaks shut behind the servant-master. You would not be the only noble in attendance. Let your beard grow a day or two, borrow some rag from a servant Well, there are two schools of thinking. Hungry dogs are weaker but fight with desperation. Oh, it does happen - I think it happened to me once. Not a killing poison, just one that makes them listless, uncompetitive. He drinks deeply, then sets the goblet carefully on the floor. He crosses the room and mounts a step and peers through a slot window cut in the deep wall. He unfolds the package: He weighs the bag in his hand. This is not enough. He listens and hands back the gold. Then bring me the price we established. The other man suddenly stands and claws at his falchion, but it barely clears its sheath, then clatters on the marble floor. He falls to his hands and knees, trembling, stutters a few words, and collapses. The first ingredient you had along with everyone else, in the sauce for the sweetmeats. The second part was in the wine, part of its sweetness. He runs his thumbnail along the block, collecting a pinch of krrf, which he rubs between thumb and forefinger and then sniffs. You really should try it. It makes you feel young and brave. He carefully wraps the krrf up and retrieves the gold. I have to go change. At the door he hesitates. The poison is not fatal; it only leaves you paralysed for a while. The man stares at the floor for a long time. He is conscious of drooling, and other loss of control. When the host returns, he is barely recognizable. Instead of the gaudy robe, he wears a patched and stained houppelande with a rope for a belt. The pomaded white mane is gone: His left thumb is missing from the second joint. He smiles, and shows almost as much gap as tooth. I am going to treat you kindly. There are some who would pay well to use your helpless body, and they would kill you afterwards. He undresses the limp man, clucking, and again compliments himself for his charity, and the man for his well-kept youth. He lifts the grate in the fireplace and drops the garment down the shaft that serves for disposal of ashes. He lifts the man easily and carries him through the main door. The barking of the dogs grows louder as they descend the stairs. He pushes open the door to the kennels. The barking quiets to pleading whines. Ten fighting hounds, each in an individual run, up against its feeding trough, slavering politely, yawning grey sharp fangs. At the far end of the room is a wooden slab at waist-level, with channels cut in its surface leading to hanging buckets. On the wall above it, a rack with knives, cleavers, and a saw. He deposits the mute staring man on the slab and selects a heavy cleaver. I have to start with the feet. There are philosophers who argue that there is no such thing as evil qua evil: Such philosophers might profit by studying Sanctuary. Sanctuary is a seaport, and its name goes back to a time when it provided the only armed haven along an important caravan route. But the long war ended, the caravans abandoned that route for a shorter one, and Sanctuary declined in status - but not in population, because for every honest person who left to pursue a normal life elsewhere, a rogue drifted in to pursue his normal life. Now, Sanctuary is still appropriately named, but as a haven for the lawless. Most of them, and the worst of them, are concentrated in that section of town known as the Maze, a labyrinth of streets and nameless alleys and no churches. There is communion, though, of a rough kind, and much of it goes on in a tavern named the Vulgar Unicorn, which features a sign in the shape of that animal improbably engaging itself, and is

owned by the man who usually tends bar on the late shift, an ugly sort of fellow by the name of One-Thumb. One-Thumb finished feeding the dogs, hosed the place down, and left his estate by way of a long tunnel, that led from his private rooms to the basement of the Lily Garden, a respectable whorehouse a few blocks from the Maze. He climbed the long steps up from the basement and was greeted by a huge eunuch with a heavy glaive balanced insolently over his shoulder. Is your mistress in? You want a wench? He stared at it before folding it up. Burn as the stars burn; Burn on after they die. Never to the peace of ashes. Out of sight and succour From men or gods or ghost: To the ends of time, burn. One-Thumb himself suspected that the spell would only be effective for as long as the sorcerer who cast it lived, but that was immaterial. The reputation of the sorcerer, Mizraith, as well as the severity of the spell, kept blades in sheaths and poison out of his food. The afternoon had been an interesting array of sensations for a man whose nose was as refined as it was large. He even sorted out the delicate cucumber fragrance of freshly butchered fish, like a whisper in a jabbering crowd; not many snouts had such powers of discrimination. As ever, he enjoyed the first few minutes within the city walls, before the reek stunned even his nose to dullness. He haggled for a while with a coppersmith, new to the bazaar, for a brace of lamps to replace the ones that had been stolen from the Unicorn last night. He would send one of his urchins around to pick them up. He ordered a hundredweight of salt meat, sliced into snacks, to be delivered that night, and checked the guild hall of the mercenaries to find a hall guard more sober than the one who had allowed the lamps to be stolen. Then he went down to the Wideway and had an early dinner of raw fish and crab fritters. Fortified, he entered the Maze. As the eunuch had said, One-Thumb had nothing to fear from the regular denizens of the Maze. Desperadoes who would disembowel children for sport a sport sadly declining since the introduction of a foolproof herbal abortifacient tipped their hats respectfully, or stayed out of his way. Still, he was careful. There were always strangers, often hot to prove themselves, or desperate for the price of bread or wine; and although One-Thumb was a formidable opponent with or without his rapier, he knew he looked rather like an overweight merchant whose ugliness interfered with his trade. He also knew evil well, from the yiside, which is why he dressed shabbily and displayed no outward sign of wealth. Not to prevent violence, since he knew the poor were more often victims than the rich, but to restrict the class of his possible opponents to those who would kill for coppers. They generally lacked skill.

2: Shoeless Joe - PDF Free Download

"Blood Brothers" was Joe Haldeman's only contribution to Robert Lynn Asprin's shared world anthology series Thieves' World, appearing in the debut volume in

Edited by Robert Asprin Copyright Fantasy and science fiction writer Robert Asprin created the fantasy setting of Sanctuary – a remote town known as a haven for thieves, brigands and riff raff, a number of characters, and invited the heavy hitters of the genre to write stories for what would become a twelve volume anthology. Introduction by Robert Asprin Asprin introduces us to Sanctuary. The emperor has a troublesome, idealistic half-brother who is making his life difficult. His chief adviser says have him killed. The emperor sends his half brother, Prince Kadakithis to Sanctuary to serve as its new governor. There will be no brutality by the town guard. He will target petty crime first, then move up to the smugglers, assassins, and thieves as he learns the lay of the land. The stage is set for the first story. Sentences of Death by John Brunner Jarveena is an orphan whose parents were murdered when marauders sacked her village. She, just nine years old was raped and disfigured. Meanwhile, a member of the town guard has brought to her boss, Melilot who is a scribe who deciphers, decodes, and translates documents, a scroll that was dropped by that very man. Melilot immediately recognizes the runes as magical and develops a scheme to have Jarveena help him swindle some coin from the man who dropped it. Before the swindle can take place, however, the wizard Enas Yorl intervenes and helps Jarveena develop a better plot – one that will help her realize her revenge fantasies. The scroll is actually a spell that will bring about the death of two people. Through swift contrivance, Jarveena is able to bring death to the man who wronged her so many years before. But, Enas Yarl reminds her that there are two deaths in the scroll and that second death very well could be hers. He convinces Jarveena to sign on with a merchant marine and get out of Sanctuary and let death take someone else. Brunner masterfully weaves a number of intricate subplots and twists into his short story. Bravo to the late John Brunner for getting this series of books off to a fascinating start! A bad day indeed. Dubro serves as the blacksmith in the bazaar at Sanctuary. In this remote part of the empire, a replacement will be impossible to find. Dubro takes off to drink his sorrows away. Illyra returns to her work of telling fortunes. A woman of wealth and means, but trying to disguise it, comes to her for a reading. Illyra predicts ill for the woman who finally spills her story. When she spurned him, he declared that she would be the sacrificial virgin placed under the cornerstone of the new shrine. Marilla pleads for help. Illyra gives Marilla a drug that will knock her out. That night, Illyra is visited by the mage, Lythande who tells her Marilla must be saved. It is imperative for the kingdom. Illyra tells Lythande about the knockout drug, but Lythande says that is not enough. A substitute must be found. She wanders into the night to find her husband and happens upon a brutal murder. Emotionally stricken, she collapses and is discovered by Dubro. They acquire a corpse from the gallows. Confident that it will be too dark to distinguish between a sleeping virgin and a dead old man, they interrupt the late night processional of priests to the temple building site. They switch out the corpses. Illyra flees in panic to the barn to hide. There, she encounters an agent of Lythande who explains the ruse. The Priests of Ilsig knew that under their own temple was a body – not of royal lineage as everyone believed – but a lowly slave substituted by the Queen. The Priests of Ils therefore conspired to rig the site of a temple to Ranke with a false body. While their temple was consecrated by an imperfect body, it was a body. A temple consecrated by an inanimate dummy would give Ilsig a leg up on Rankan. Lythande and all mages want to keep the balance of power in the cosmos. Illyra and Dunro have their anvil. This was an engaging story, but without a little groundwork laid for the background of the deities and temples, the conspiracy was difficult to understand. Cappen Varen and his friend, Jamie, must locate the gate within the temple of Ils, pass through, and rescue the beautiful Danlis and the princess to whom she is a lady in waiting. I know Poul Anderson is a legend in science fiction and fantasy, but I thought the dialogue in this story was just atrocious. But the story was good enough to overcome the poorly written dialogue. The story also serves as our introduction to the Vulgar Unicorn and its innkeeper. But the tables get turned on all parties by the unlikeliest of people and Hanse finds himself with an unprecedented opportunity. But Offutt writes well and it is enjoyable if predictable. The Price of Doing Business by Robert

Lynn Asprin Jubal, once a gladiator and slave, is now a merchant and dealer in slaves and contraband. He is one of the wealthiest merchants in Sanctuary with many paid eyes and ears in The Maze and the Bazaar. As he is receiving his daily intelligence briefing in his mansion, a Maze street urchin is brought before him, claiming he has a message. Jubal tries to fight them off, but there are too many. The first half of this story was packed with action and moved quickly. Once Jubal was rescued, it read like a political debate with an anti-climatic resolution. Seeing as Asprin was the editor of this series of books, it looks as if he may be developing a character to be passed onto another writer, because this story, standing alone, is not a good short story. Lastel has just assassinated by way of poison, the son of a noble and acquired a large supply of krrf. He plans to sell it to the owner of a brothel. When they go to ascertain if it is the same block of krrf, they find it gone. It seems a wizard is meddling in their business. In this case, One Thumb must fight Lastel. The blow by blow account of this encounter is confusing and the ending entirely too ambiguous for it to be a good story. Myrtis by Christine DeWees The owner of a brothel is informed that she and the other operators of brothels will have to pay a hefty tax to continue with business in Sanctuary. Myrtis immediately recognizes that the tax is designed not to raise revenue but to put them out of business. Of all of the writers in the first volume of Thieves World, DeWees is the least heralded. Yet her story was the most concise and tightest of the bunch. It is a story that could be set in our world today with its sin taxes designed to change behavior. Myrtis is going to be an interesting character. The Secret of the Blue Star by Marion Zimmer Bradley The magician Lythande saves a poor wretched prostitute from the hands of an evil mage of his order. Each of those mages wears a blue star tattooed on his forehead. He hopes that the prostitute will seduce Lythande and force him to tell the secret of the Blue Star which will eliminate him as a rival by destroying his power. But Lythande has a secret bond with the madame Myrtis and she helps get him out of his bind. Bradley is one of the giants of science fiction writing and this tale is a good example of why she is held in such regard. Great emotion in this story along with well developed characters. None of them are bad. What the reader gets is different perceptions of characters based on who is perceiving them meaning which writer is telling the tale. This book is one of the most widely read and best known anthology series in fantasy literature for good reason.

3: BLOOD BROTHERS by Joe Haldeman - Thieves World

Forever War *Mandella Hero* () [also as by Joe W. Haldeman] *We Are Very Happy Here* () [also as by Joe W. Haldeman] *End Game* () [also as by Joe W. Haldeman] *You Can Never Go Back* () *Thieves' World Blood Brothers* ().

Apostles are fond of forcing their subjects to send them people to eat, such as the Baron of Koka Castle and the Count. When one uses a Behelit to be reborn as a demon, The Legions of Hell kill the loved one s offered as a sacrifice, generally eating them alive. It also functions as a Secret Test of Character ; if she uses her wishes for the good of others over herself and possesses enough strength of will , she can escape having her soul eaten. Out of the four priestesses, two Miaka and Suzuno escape, since both are too plucky to be devored. The third Takiko was dying already and her strong will was paired with lots of self-hate , so Genbu started to eat her soul and her dad mercy killed her. The fourth Yui is fully devoured due to having been first broken and then manipulated by Nakago, but Miaka uses one of her wishes to bring her Back from the Dead. Nuriko befriends the girl about to be sacrificed, Byakuren, and attempts to save her; however, she ends up being eaten in an Heroic Sacrifice to protect Nuriko himself. In one episode of Dragon Ball Z , Vegeta and Nappa visit a planet called Arlia where the tyrannical Arlian king regularly hosts tournaments between his guards. The loser, if he survives, is thrown into "the pit" and fed to Yenni, a giant cannibalistic Arlian. While this is not tried against the Saiyans, the king does order Yenni released from his pit when Nappa kills a whole bunch of his guards. The Saiyans make short work of Yenni. In the cliffhanger to part 3 of Mistfall , Nyssa and Turlough are staked to the ground as a meal for a horde of ravening marsh spiders. Also, Minuette takes out The Master by throwing the fob watch that contains his essence at the Wolf, who eats it. The Luckiest Smurf story "Empath The Wartmonger", Princess Chamelianne threatens to feed Smurfette to a pack of hungry baby crocodiles unless Empath gives himself entirely to her. Mondo and Meowth planned it out specifically as revenge for him using dangerous experimental drugs on various Pokemon and humans, including James. Weird, because the professor himself is a rodent. Or possibly fitting, to emphasize his cruelty, and badassery " a rat training a cat to be completely loyal is a pretty impressive thing. The Rescuers Down Under: Mcleach tries to feed Cody to some crocodiles. Return to Neverland , Captain Hook is actually revealed to have a pet octopus in which he will often feed unsuspecting pirates to if they disobey him. However, near the end of the film, said octopus eventually develops an obsession of eating Captain Hook as well, and as a result he actually starts to frighten the pirate by constanly bobbing its eyes upside down like you-know-who. Zigzag manages to tame them, which impresses One-Eye enough to accept his help. Later, the crocodiles turn on him and eat him. Actually, the "monster" is Anne-Marie, the orphan girl Carface has captive. World Police , Kim Jong-il releases his ferocious black panthers played by adorable black kittens on two Team America members. He also has a Shark Pool the sharks are, in this case, played by live-action dogfish. Zorba was saved, however though humiliated even more when he made the beast sick and it vomited him out. In Solo this turns out to be how Han and Chewbacca met; Chewie was "the beast". Fortunately Han speaks enough of his language to convince Chewbacca that they can work together to escape. James Bond villains like to use Shark Pools to get rid of people. You Only Live Twice. Blofeld drops a henchman who failed him into a Piranha Pool. Live and Let Die. Kananga tries to feed Bond and Solitaire to his pet shark. His dragon earlier tried feeding him to crocodiles. Bond falls into a pool when a man-eating anaconda slithers in. In Skyfall , Bond and a mook fall into a pit of Komodo dragons. The latter gets eaten by one of the lizards. In the first Superman movie, Lex Luthor keeps a pit with some vicious beasts that are never seen in his lair. After his plan to destroy California fails, his Perky Female Minion is almost thrown to them she being the one who helped Superman and enabled him to stop the missiles but fortunately for her, Superman shows up in time. In Austin Powers in Goldmember , Dr. Roboto is later fed to the sharks for his failure. However, a deleted scene shows that everyone in the vicinity, even Dr. Cave Dwellers totally rips off the abovementioned scene from Conan by having Ator kill a velour snake puppet after a whole bunch of girls are thrown to it. Shao Kahn disposes of Jade this way for failing to kill the heroes in Mortal Kombat: In Dragonslayer , the king feeds virgins to the title dragon every year in order to appease it so it will leave his lands alone. Blanka, the "beast" in question, has other ideas.

Humorously averted in *Dragonheart*, in which con-man knight Bowen attempts to rid himself of a nuisance rabble-rouser by suggesting to her village that dragons can be placated with virgin sacrifices. His dragon partner finds the idea ridiculous, and even expresses disgust at the idea of eating a human. Following the Christian Martyrology claims see below, many oldschool films set in Ancient Rome include representations of Christians condemned to this. The film version of *Quo Vadis* has a bunch of Christian kids forced to put on sheep skins before they had a hungry lion released on them; it was such a Kick the Dog moment that the spectators were horrified and mind you, these were all pagans who hated Christianity, and when Gentle Giant Ursui pulled a Big Damn Heroes for them, the audience pleaded with Nero to give Ursus a thumbs-up. *Clash of the Titans* is a movie very loosely based on the myth of Perseus. In this version, Hera orders Andromeda left to the Kraken, the last surviving Titan, threatening to order it to destroy Joppa if her mother does not comply. The Black Queen can dispose of those who displease her by feeding them to the Mathmos, the Eldritch Abomination that her people worship. Even those who were harmed by the man who is fed to the beast and made to watch by the villain are shocked by the cruelty. Has happened to Alex Rider at least once in his career. Later, Bond and Solitaire are to be dragged through a reef until their blood attracts sharks to eat them this was used in *For Your Eyes Only*. In *Brokenclaw*, the eponymous Brokenlaw Lee literally feeds people who have disappointed him to the wolves that he keeps in his home. Especially since the snake is one of his many Horcruxes. *Animorphs* had a unique variant of this. A Yeerk who had displeased the Visser one too many times was fed to a natural Yeerk predator nicknamed the Yeerkbane. I believe Vanarx was the actual name. He also enjoys feeding them to the Taxxons. Twice with Magogs, without success: Done with Marcia Overstrand by DomDaniel. Tried with Jenna Heap by Simon Heap. Martin the main character gets into the habit of feeding people to his new pets, the eponymous insect-like alien monsters. In the second book the Big Bad tells his lackey to listen carefully or be fed to his battle dogs. The barkeep One-Thumb buys a block of krrf an expensive drug from a man and slips him a paralyzing drug. Laird is placed within a set of three magic circles, with each increasing in complexity and strength, and Blake sets loose a demonic imp between the first and second. The first circle is small enough that Laird can barely sit down, and certainly cannot afford to fall asleep, as he might unconsciously break the extremely fragile circle and expose himself to the imp. Sigzil tells of a people who give their convicted criminals a choice: Either be executed, or be set out as bait for the local greatshells, which have valuable gemhearts. If they choose the latter, they will be released if they survive a week. They rarely survive more than two days, but criminals always take the deal, because the hope of survival is better than the certainty of execution. Live Action TV *The Merlin* episode "Lancelot and Guinevere" revolves around an outlaw feeding various people to a Wilddeoren basically, a giant naked mole rat. Batman had a couple of these. King Tut attempted to feed Robin to his crocodiles, but the walkway Robin was on retracted so slowly that Batman was able to arrive and save him. On Zoo, a small Canadian town takes up this practice to placate the hostile animals, voting among themselves each month about whom to force out past the fences. At the teeth of his own dogs, no less! When Callen and his team show up to rescue Hetty, she then feeds her former captor to his own tiger. In the legend of Saint George and the Dragon, the inhabitants of a town threatened by a dragon, having already fed all their livestock to the monster, cast lots to determine whose children are to be fed to the dragon to appease it. Fortunately and on the very day the only daughter of the local king is about to be delivered to the beast, the dragon is killed by St. Christians in Roman times were supposedly fed to lions in the arena as well. The historical truth of that claim is more murky. *Damnatio ad bestias* was the usual Roman punishment of particularly vicious murderers and those convicted of high treason. According to legend, St. Margaret was sentenced to be fed to a dragon. Large constrictor snakes, such as the African rock python, are known to be able to smother and devour large prey – occasionally children and youngsters. They also often were referred to as "dragons". The Romans knew the rock python, and if Margaret was a petite lady and the snake was a large specimen, the legend may well be plausible. *Older Than Dirt*, actually: In Egyptian Mythology, souls that were found unworthy of the afterlife were fed to the monster Ammit. The Christianizing King of Norway, Olaf Tryggvason, is said to have executed a pagan Viking chief, Raud the Strong, by having a viper stuffed down his throat. Or should that be labelled, "Had the Beast Fed to Him"? In Japanese Mythology, the Yamata no Orochi was an eight-headed and eight-tailed

monster that forced a pair of earthly deities to hand over one of their daughters to be devoured by the beast every year. Their eighth and final daughter, Princess Kushinada, was saved from this fate by the storm god Susano-o, who slew the beast by impersonating her, getting it drunk on eight large bowls of sake, and then chopping off each of its eight heads. The fish also occasionally eats any defeated enemies. Bendy and the Ink Machine has the Human Sacrifice variety:

4: Thieves' world : first blood (Book,) [www.enganchecubano.com]

Joe Haldeman's "adept plotting, strong pacing, and sense of grim stoicism have won him wide acclaim" (The Washington Post) and numerous honors for such works as The Forever War, The Accidental Time Machine, and the Marsbound trilogy.

Outsider Poetry, web comics, zombie movie reviews, artwork, and commentary on politics, fantasy football, and modern culture by Outsider poet Thomas L. Then I did what I always do: I went to Ebay and Abe Books and started buying those books for my library. Before I list the books I must relate another memory that puts it in a little more perspective for me. At that time we got a young librarian from NIU who was young enough to notice a bunch of us were hanging out during lunch and playing D and D instead of shooting baskets or outside smoking. He asked us what types of books we were interested in the library acquiring, and he got requests from a lot of us. We were overjoyed, and started checking the books out. Others were apparently not overjoyed, and a few weeks into the books arriving they were pulled from the library shelves and never returned. Then we were banned from playing Dungeons and Dragons on school grounds, and eventually many of us bought the books on our own but soon found out they were banned on school property, also. Hobgoblin is the first of the books I remember having read. Apparently Coyne had seen his nephew playing Dungeons and Dragons and wondered what it would be like to write a novel where a character actually came to life. The second book I bought was I learned a new term today. We came back for the Spring semester, and the young librarian was no longer there. For the first time there were now electronic chutes at the door which monitored the egress of books with a chip. Whereas before the congregating of a few nerds in the back room was of no interest to anyone, our gathering was now scrutinized closely. What I can tell you about that group of kids is that one of them became a high-ranking Marine officer, more than one, and even more than two made a lot of money in Silicon Valley, and the one who came closest to freaking out and becoming like a character in one of these "problem books" now lives on one of the most hum drum and Pleasantville roads in this town. That would be me. Suddenly the Kingdom is aswarm with alien invaders, destroying the peace of the kingdom. Just ordered it from Abe Books. Saw copies selling for several hundred dollars, but I settled on a more economical book club version. Here are a few of the others I remember. In this one the Camelot and King Arthur legend is told from the perspective of the female characters. Morgan la Fey is less of an evil witch bent on destroying the Knights of the Round Table than a druid priestess trying to save her pagan religion from zealous Christian barbarians. In this one, written before the others, I think in , the Arturian legend is told through the eyes of Merlin. This is the first of a trilogy, and is about his adolescent years and travels as he comes into his own as the sorcerer and prophet he is. Edited by Robert Lynn Asprin. Paxson; The Vivisectionist, by Andrew J. The Amber stories take place in two contrasting "true" worlds, Amber and Chaos, and in shadow worlds Shadows that lie between the two. These shadows, including our Earth, are parallel worlds that exist in, and were created from, the tension between opposing magical forces of Amber and Chaos. The Courts of Chaos are situated at the very edge of an Abyss. While traveling shifting between Shadows, one can alter reality or create a new reality by choosing which elements of which Shadows to keep or add, and which to subtract. Ordered those last night. The effort was even more insidious now that I think back about it because what they were really trying to do is get me to censor myself, to passively accept their introjects and their sense of morality and never question it again. The censor would become internal, and I would have believed it was really me, not them. A few weeks into that second semester I was suspended for continuing to bring these books in. I had gone as far as to ask for them from a book club for Christmas, and would share them with anyone who was interested. It has been a lot of fun for me reclaiming these memories from the void, and like the character in The Chronicles of Amber who has amnesia, seeing the books laid out before me in a growing pattern as I remember one after the other. Some of these are most decidedly not literary classics, but I hope you, too, will pick one up and read it, whether the ghost of Edwin Meese likes it or not.
