The journey of sealing a PG Medical Seat in Government colleges is difficult but it is not impossible. Read on as we reveal some tried and tested secrets to success to help you ace the exam with flying colors. What the examiners are evaluating and looking for in the perspective candidate. The answer to this is profound and explicit at the same time. The test is actually examining how well you understood the subject that you learnt for the past 6 years and how you applied it during your internship. The candidate needs to approach each question in exam the same way; he would treat a patient by careful diagnosis. Once you understand the mind of the evaluators, you will easily be able to study accordingly. Though mugging up the medical jargon is one part, understanding is what will make you stand out among the crowd. Start Early Many students generally ask as to what is the best time to start the preparation. They fail to recognize that they have already done half the preparation while pursuing MBBS. If you are serious during your MBBS and maintaining good notes, your work is half-done. Though, the first two years in MBBS College pass like a wing, third year is high time you got to get serious. Latest by third year, you should start with your PG Medical Entrance preparation side by side. Go Step-By-Step Follow these 3 simple steps to be ahead of the competition: Learn and cover the syllabus in first reading. Strengthen your concept and understanding. Start revision at least 4 months before the exam. Refrain from learning new concepts at this stage Buckle up for the examination a month before. Intensive time management and online test series should be your only priority by now. But once you have taken this leap of faith, ensure that you do justice to your decision. It is imperative that you test your knowledge of the subject from time to time. To do that, make it a point to enroll for weekly test series. On Sunday, the candidate is evaluated with a set of MCQs. This not only makes you test ready but also gives you a reality check of where you stand. It has a multipronged effect and is the golden rule for cracking any entrance exam. The more you attempt, the more you master the game. Say No to All Nighters Refrain from studying during nights as this may make you lethargic. The best time to study is during the morning. Also, avoid studying continuously for long hours. Take breaks after every two hours to refresh and unwind. Group Study Group study has proved to be really helpful for some aspirants. The idea here is to surround oneself with like-minded bunch of people pursuing the same goal. This will also act as a doubt clearing session aiding constructive discussion. Stay Motivated Do not get demoralized in the middle of your preparation. It is very easy to get bored or get bogged down by pressure, half-way through your preparation, but you need to cross this hurdle and shun all negativity to keep going. Do all it takes to give your hundred percent.

June 13, Some tips that can help you to guide to prepare for Entrance Exams and can help you to get success in your coming exams. Start early Preparation for exams should begin earlier than the day before the test. Get started at least a week before the exam. Organize Begin by making yourself a calendar outlining a daily schedule of topics for review. Cover a small amount of material for each class each day. Every time you complete a topic, give yourself a mini review. Outline Once you have decided what you need to study and how much time you need to spend studying, it is time to actually study. One of the best ways is to make succinct outlines. As you read over your textbook and class notes, write a brief summary for each topic. Highlight the areas in your outline that were most troublesome. When you have finished with all the material, you will have an outline you can review. Make flashcards Similar to outlining, making flashcards is a really helpful technique for studying. By writing down the information from your outline, you are already doing half the studying. Once the flashcards are complete, you will have a portable study packet to look over. Ask your teacher to go over a glitch you might be having. Or if memorizing vocabulary words seems like too much to do, recruit your family members to quiz you with index cards. Sleep You need at least seven hours of sleep a night to function. Tests are designed to make you think. Stay calm Do not panic at the exam! Even if at first glance the test is overwhelming, remember to breathe. If a question seems too hard, answer all the questions you know, then return to the ones you left blank. Remind yourself that you are prepared. Work through the exam slowly and read all the questions before answering them. If you are done before the time is up, look over your answers. Even if you think you bombed the exam, worrying will not change your score. It may, however, affect your mindset for your next final. Zone out the last test and stay focused on the next one. Leave a comment below, if you found them useful.
