

## 1: Consent Form | Yachting Magazine

*There were other boat builders in town in the late s: Abel Leaman and his son Dean, who was known for his White Bear Pleasure Row Boats. Abel was also an early participant in yacht racing.*

Many of us stayed at the cottages in the Lake Guntersville State Park as well as the campground. Accommodations were beautiful and the surrounding area was breathtaking. It was a true honor to meet face-to-face so many folks who have built or are building our designs. This Gathering was organized exclusively by the members of our online Boatbuilder Forum. It was rewarding to see this online community of like-minded boat builders organize and carry out such a successful event. The Gathering had been planned for about a year and pretty much everyone online had a part in it. Dave Grason, the Forum moderator and Bill Edmundson, a Glen-L builder were instrumental in getting the event started and scoping out the location. We all met at beautiful Guntersville Lake in Alabama during the weekend of October. The Gathering was such a success that a event is already in the works. Many of the folks on the Forum have known each other for several years but had never met in person. Hot Rod, gaffrig24 or Krugwaffle. Whatever their names, all are kindred spirits that have been infected by the boatbuilding bug. Builders came from all over the United States and Canada. The farthest traveled from Apple Valley, MN towing his boat and only beat the two builders from Canada by about 15 miles-also towing a boat. Not only did the guys on the Glen-L Forum plan the event but also had awards made as well as planned, provided, prepared and cleaned up food for each of the three days and set the stage for a great time for everyone. The Forum has been buzzing with activity since the Gathering and many had comments to share: I was impressed by the craftsmanship of all the boats. Great people to be associated with! Lots of beautiful boats by even more beautiful people. If you sign up for our free online Newsletter, we will keep you informed about all of the Glen-L happenings. Plus, the Newsletter articles, builder feedback and photos, tips and how-to information are indispensable to anyone contemplating building a boat. It is an honor to have a part in the lives of so many great people. Boat builders are a unique breed of individual that value craftsmanship and the creating of something beautiful out of a pile of wood. They are what make Glen-L what it is today. Bob won the award for the longest tow. Ray has traveled over 24, miles of river in this boat. No wonder he named it "Therapy".

### 2: Pathfinder TRSBoat Review - Fishing Reports | Coastal Carolina Fisherman

*Bill Holland is a master boat builder who is most well-known here on the Coast for building one of the Biloxi schooners. Holland worked on the Glenn L. Swetman from to*

A Hatteras Yacht does not aspire to offer a luxury. That is simply where we begin. It is beyond that point that you begin to understand the true Hatteras difference. That difference, for over half a century, has allowed Hatteras to stand as the benchmark of quality and innovation to which all others aspire. Willis Slane envisioned a fishing boat strong enough to withstand the waves off Cape Hatteras, where his prey of choice, the marlin, grow as big as the swells. Unforgiving seas where, for hundreds of years, dreams were sacrificed and legends born. The uncompromising union of inspired design, breakthrough innovation and unmatched craftsmanship. Our commitment began over 55 years ago when Hatteras founder, Willis Slane, envisioned a new breed of fishing boat. One strong enough to tame the waves off Cape Hatteras. What followed was the birth of a legend. Beginning with the Knit Wits, the foot fiberglass yacht that revolutionized the industry, Hatteras served notice that our yachts would now be the standard to which all others were judged above and below the waterline. THE LEGEND From that initial breakthrough vessel to each innovative yacht that has followed through the decades, Hatteras has offered a level of craftsmanship focused on perfecting every detail and over delivering on every expectation. When Hatteras began, some asked why our yachts were made this way. These days, they just want to know how. There is an undaunted spirit in the Hatteras brand. You can see it in the obsessive work of the men and women who pour their talent and heart into building each legendary vessel. You can feel it in the way the Hatteras hull cuts confidently through waters that lesser boats dare not enter. But more than anything, you can witness it inside the ambitious souls who make Hatteras an expression of their own drive for adventure. Those who are unwilling to compromise and determined to push boundaries. So, for all those who celebrate a life without limits, we welcome you aboard. The sea creates winners and losers everyday. And while decades of design and engineering have resulted in a long list of patents and accolades, our focus continues to be on everything yet to come. From hull and propulsion breakthroughs to on-board connectivity and interior design, a commitment to innovation fuels every aspect of our business. The most durable coat in the industry. This includes an initial consultation at our headquarters in North Carolina to outline your wish list, including technology integration and choice of several amenity combinations. A dedicated team, led by your personal sales consultant, will guide you through every step of the planning and construction process to ensure your dream is realized. This includes the ability to personalize several features to your tastes. Everything from appliances and galley tile to furniture upholstery and wall coverings can be impacted by your choice of finishing packages. A multi-day orientation session is offered with each purchase, including the ability to have members of the Hatteras team join you for portions of your maiden voyage. That commitment is also backed by an industry-leading 2-Year Warranty on all systems and a Year Structural Warranty.

### 3: Bespoke Narrowboat & Widebeam Boat Builders | The Fit Out Pontoon Ltd

*The general world of canal boat building is not customer facing nor is it a welcoming place for the non-initiated, believe me - but Mark is a new breed of boat builder who understands that world, but also gets your passion and gets modern customer service - he's communicative and responsive, a creative and a problem solver, online and IT.*

There is a lean, graceful look to the custom-built boat. When the Carolina Flare slices through the water the sharp point of its bow arcs gracefully to the deck, which is a distinctive feature of the boats built on the Outer Banks. They were easy to make, durable and performed well in the waters of the Outer Banks sounds. For more than years, they were the boat of choice for Outer Banks watermenâ€™but there was a revolution coming. George Washington Creef was already considered a master boatbuilder when he moved to Manteo after the Civil War. Legend has it that there was a shortage of logs suitable to make kunnners. There was wood available, though, and Creef created a boat utilizing plank-on-frame constructionâ€™sturdy, framed with cedar and using juniper planking. The bow was flared and the beam wide with a curved bottom and tapered stern. The shad boat, as it was called, was the ideal craft for the shallow waters of the Outer Banks. Fast and maneuverable under sail, its shallow draft allowed it to work close to the shore where other boats would have run aground. With its wide beam, it could handle considerably more cargo than any other boat of its size. The boat quickly became the boat to have from Ocracoke to Currituck. Well-designed and innovative, the boat left its mark, and in the North Carolina legislature designated the shad boat the state boat. A demanding craftsman, the skills he taught became the basis for the quality workmanship Outer Banks boatbuilders are known for to the present day. With modifications, the shad boats survived into the 20th century; the original sail power design had to be adjusted for engines. There is no record of him building anything else for some time, but what he did do was to go to college and learn about design. Everything he built he did a scale model. When he returned to the Outer Banks he worked as a fisherman, shrimping in the off-season and taking charters out in the summer. In , he built the Pearl II, the first true Carolina design boat. Named after his wife, the boat replaced the wooden flat-bottomed Pearl I he had built earlier. The new design featured a deep V-shaped hull, giving the craft superior handling characteristics in the ocean and much better efficiency. His innovations were a large part of that, but equally as important was his attention to detail, his knowledge and his insistence on quality workmanship. But there was one boatbuilder he never worked for. He tells a familiar tale of getting into the boatbuilding business. In the winter we had to have something to do. We gravitated to the boat shops. So what would we do in the winter? Modifying, changing this changing that. Davis, who passed away in , was like no other builder before him. Captain of a charter boat by age 20, in he opened Davis Boatworks at 25 and built his first boat, a foot craft, using traditional construction methods and materials. But there was nothing traditional about Davis. Innovative and daring, he was not afraid to take chances. Davis is largely credited with creating the Carolina Flare, with the sharp entry point of the bow of the vessel arcing almost radically to the deck. Nonetheless, his boats had a distinctly different look than anything anyone else was building Maxwell worked with Buddy for a number of years. He absolutely put the Outer Banks on the map. They were the ones that started using jigsâ€™preformed shapes of the hull that allowed the craft to be constructed upside down. They were also the ones that started using CAD designs for their hulls and synthetics to create the lightest weight, strongest craft possible. The new generation has taken those traditions and run with it, building bigger, more powerful craft. It is part of a quest to create that sets each vessel apart from any other. His yachts are-state-of-the art and highly desired, but the future of the custom boatbuilders is not just in high-tech design and material. Scarborough Boatworks Another local boatbuilder, Patrick Harrison graduated from East Carolina University with a degree in woodworking, came back to the Outer Banks to learn from the master boatbuilders and now owns Harrison Boatworks in Wanchese.

### 4: BoaterEd - Post Marine files for chapter 7 bankruptcy

*CHARLESTON, S.C.â€”Tommy Hancock and Dale Martin are back in the boat building business with their new company, Sportsman Boats. Former boat company owners have combined forces to create Sportsman Boats which manufactures an intelligently designed series of center console and bay boats.*
