*"Bring on the Bimbos!" The Queen of Solice has passed away, leaving a seat at the right hand of the King vacant. Per sacred tradition, King Bjorn issues a royal decree; summoning all available noble ladies to participate in the game of bimbos.*

The bully, the bimbo and your bottom line The business case for an inclusive culture By Caroline Turner  
Published: Companies with women working with men in senior management and on boards of directors make more money. It makes no sense, then, that women are still so outnumbered in the C-suite and on boards. Companies are missing out on the business value of gender diversity in leadership. No one will say having gender diversity causes a better bottom line. But study after study shows a strong correlation. Do women bring something magical? Women in my opinion rock. The reason gender diversity affects business results, I suggest, has a lot to do with yin and yang -- the Taoist symbol of wholeness and balance. If you have a balance of the two genders in leadership or in any group, you are more likely to have a balance of masculine and feminine energies and strengths. That balance is what drives better decisions and better results. So how do you get a better bottom line? Your goal can be gender diversity. Or your goal can be a culture that leverages both feminine and masculine strengths -- in both women and men. Either way, you should expect greater retention, productivity and profits. You need to understand and value both masculine and feminine strengths and create a culture where both are valued and leveraged. We need to start with understanding. Imagine a long continuum. On the far left is the extreme version of masculine -- a bully. On the far right is the extreme version of feminine -- a bimbo. Neither bullies nor bimbos help your bottom line. Extremes never bring good things to the table. What you want is the strengths along that continuum between bullies and bimbos. Max has lots of important leadership strengths -- directness, decisiveness, linear and focused thinking and competitiveness. Fran brings other strengths to the table -- being relational, collaborative, more process-oriented in decision-making, and persuasive. Leaders had to be like Max, direct, decisiveness and focused. And leaders must bring both sets of strengths out on their teams. In making a decision about a complex issue, a team dominated by Max-like thinkers will be focused and efficient in following a goal handed down from above in the organizational hierarchy. And they make drive efficiently to a bad or short-sighted outcome. A team of only Fran-like thinkers will gather and process lots of points of view and can become paralyzed in seeking consensus. On a team with a balance -- a mix of Max-like and Fran-like thinkers -- there will be a balance of goal and process orientation. The result is likely to be a better and more sustainable outcome. If leaders value only or mostly those on their teams who are like Max, those more like Fran will feel less included -- and be less engaged. If leaders understand and can identify and value both sets of strengths, they will increase engagement among those like Fran. Those with Fran strengths will contribute -- and stay. Engagement is clearly linked with productivity, retention, quality, and a better bottom line. Broadening engagement to include those all along the masculine-feminine continuum is the secret sauce. So, do you want a better bottom line? Better decisions and broader engagement will help. She was senior vice president, general counsel of Coors Brewing Company.

*A lot of bimbos may be dumb or portrayed as dumb, but confidence - particularly in relation to sex - is a huge turn-on for a lot of people. Having a girl who is rather singleminded about sex and absolutely a pro at it is definitely a fetish of mine - I think CoC's corruption touches on it.*

Spellcasting[ edit ] Magic, as performed by player characters, takes the form of Tittiemancy. Characters with a high Uhm score know more spells. Characters with a high Tits score are better at using those spells and have more mana. Tittiemancy is available as an advanced ability. Additional advanced abilities can make more mana or spells available. Adventures do not happen in a vacuum, so there must be a setting for these adventures to happen in and challenges for the bimbos to overcome. The following is one take on a setting appropriate for a BBB game: The menfolk toiled in the fields and protected the towns, and the world was as it should be. Then the man-kings rose to power. Using forbidden technology and foul magics, the man-kings leeched the very manliness from the air, water, and soil around them, gathering its power and hoarding it for themselves. The women-folk looked on in horror as their husbands, fathers, and sons withered before their very eyes, their masculine stubble thinning out to peach fuzz, their muscles shrinking away to near-usefulness, their vitality and enthusiasm in the bedroom almost completely sapped. The man-kings captured and enslaved thousands of subjects to toil in their factories. They castrated hundreds and pressed them into service as eunuch-soldiers for their incessant wars against each other. They thundered across the wastelands in their Ford Fs and Dodge Rams with the KC lights and lifted suspension kits bringing down wild game with guns and spear and their own bare hands. Grimdark cities surrounded by parched, craggy badlands belch black smoke into the sky. Storm-ravaged seas crash dark waves against rocky shores. Foreboding mountains quake with volcanic eruptions and landslides. Bones and broken weapons litter battlefields ancient and new along the borders between the realms of the individual man-kings. In the realms of the man-kings this is an era of gasoline, magic, and heavy metal. In the wilds, it is a primitive struggle for survival, as man-kings greedily keep their secrets of automotive repair, barbecue cuisine, and other manly arts hidden away. Humanity is now a shadow of what it once was. Continuous war, a ravaged environment, and premature ejaculation have taken their toll on the population. The fairest are taken away to serve in the pleasure palaces and temples. In the icy mountains and deep jungles, small bands of free women live simple but desperate existences. These women rely on hunter-warrior women to bring food to their tables and fend off ravenous dinosaurs, great apes, and slavers. Dark Moon, as a setting, provides a handful of character background archetypes for players to work with, a some stock antagonist types for the GM, and a veneer of an explanation as to why bimbos in bikinis might be running around with axes and swords killing stuff. Verisimilitude is way too big a word to be involved. T-Rexing 5 Plot Armor 5.

The girl is a damsel in distress or villain, and the majority of play revolves around sweaty muscle-men running around being manly. Not so with Busty Barbarian Bimbos. Here the players take on the roles of the titular characters in a world that is dominated not by bearded wizards and savage swordsmen, but by the values of aesthetic beauty, fashion, and social standing. Core design concerns, taken into account whenever possible, include Pretty girls get preferential treatment. They are treated better by other characters. They are treated better by their clothes. They are treated better by the rules. Disdain for slavish book-keeping. Not to knock Red Sonja, but the model of empowering girls by having them act like boys is not the goal here. Busty Barbarian Bimbos has been through a lot of changes through playtesting and high-concept debates regarding both tone and mechanical systems. The result is a sleek, extremely math-light system that facilitates extemporaneous, spontaneous storytelling. It is suitable for recurring campaign play, with characters and stories persisting from one session to the next, or for more episode one-shot play. It is recommended for players that are mature enough to resist being mature about everything, and for players that are immature enough to giggle a bit when somebody trips and falls down. This is meant to be a mutually-enjoyable collaborative storytelling exercise that avoids delving into deep issues of the human condition. If successful, BBB will be published in PDF and paperback format, fully illustrated by a team of artists with a variety of styles and tastes. Character records, garment records, accessory records, and GM cheat sheets will be made available. The book itself will weigh in at roughly pages, containing all the rules necessary to create characters, providing tools to facilitate the creation and adjudication of a broad variety of challenges for the heroines to overcome through charm, guile, and sometimes force. The paperback will make a curious addition to a well-stocked gaming library. What We Need Money, obviously. Also world peace and spiritual fulfillment, but those lie beyond the scope of this campaign. How the Funds Will be Used Funds raised through this Kickstarter campaign will go primarily to the artists. To produce the wealth of cheesecake that will accompany the game rules, a number of talented individuals need to be compensated. We have already paid out-of-pocket for a number of initial pieces including those featured in the presentation video and want to retain these folks for their further efforts in establishing an reinforcing the themes and tone of the Busty Barbarian Bimbos world. If this campaign exactly reaches its funding goal, we will have adequate funding to print the books committed to through pledges, ship them, pay our artists for interior and cover art, and buy myself the primary writer and developer a six-pack of good beer. With your support we hope to exceed the goal, get even more art, and establish a modest set of stretch goals. That said, a couple of goals to reach for: This does not include international shipping, sorry; that stuff makes the US tax code look simple. Backers receiving multiple copies may mix-and-match to taste. An expanded re-skin will include new abilities, equipment, bestiary, and illustrations. The selection of these settings will be established through a poll of our backers just after the goal is unlocked. This crossover adventure module is sure to detoxify, disorient, defoliate, and defenestrate your heroines as they cross paths with aggressively amiable automated aestheticians. A bonus PDF for all reward tiers. Risks and challenges This being our first foray into publishing, a number of hitches can be expected, and unexpected hitches may crop up along the way. The game itself is already written. The rules have been play-tested and work well. The book itself is nearly complete but lacking in illustrations, which this campaign will finance. By diversifying the workload between multiple artists, we hope to mitigate the impact of production delays by any one individual, re-tasking and modifying individual pieces as needed. Printing will be handled by a respected and established print-on-demand concern, and pledge values have been determined with printing and shipping costs in mind. Questions about this project? Exclusive access to pre-layout game manuscript and participation in aesthetics survey.
