*By Schism Rent Asunder is a science fiction book written by David Weber. It is the second book in the open-ended Safehold series, after Off Armageddon Reef. The publication date was July 22,*

The Inquisition had seized every copy it could find, but Duchairn was positive there were still plenty of them circulating. Staynair is right about one thing. I may hate admitting it â€” I do hate admitting it â€” but the Council of Vicars is corrupt. But however right he may be about that, first we have to preserve that house. And, he admitted unhappily, if that requires us to. To act as boldly and as decisively as God requires of us. And Mother Church is going to need time to shape and direct their natural and inevitable sense of outrage. Any possibility that we might be able to convince the clergy of Charis, or its people, to return willingly and repentantly to the arms of Mother Church will be gone forever. The only appeal left will be to the sword, not to reason or remonstrance. First, because of what it implied about who had actually made the initial decision to resort to violence. Second, because it starkly underscored the chasm of death and devastation into which Clyntahn was prepared to cast anyone who stood in his path. He had no answer to that question. You know that as well as the rest of us do. Have those innocents had the opportunity to choose between heresy and the truth? And what about those Charisians who remain loyal to God and the Church and still get in the way of the holy armies you propose dispatching to slaughter their neighbors? Are you going to reform the corruption? Renounce your own position of power and wealth? Begin approaching doctrine and matters of faith with a genuinely open and accepting mind? But despite his questions, it still came back to that single, unanswerable fact. To have any chance of restoring Mother Church to what she ought to be, what she must once more become, first Mother Church, whatever her present blemishes, had to be preserved. At any rate, we must take some sort of action against the effects of the Charisian privateers Rhobair and Allayn have analyzed for us.

Edit Nimue Alban , known to the people of the planet Safehold as Merlin Athrawes , has been very busy. Her only escape is space, where nobody else on Safehold can follow her. Planetside, the Kingdom of Charis has been emboldened by its devastating naval victory over the forces sent to destroy it by the Church. Archbishop Maikel Staynair of Charis, who has become the effective Martin Luther of Safehold, declares a schism between the Church of God Awaiting and his see in Charis, accusing the Group of Four which controls the Church of being responsible for the massive sneak attack that was launched on Charis. The Royal Charisian Navy , which now essentially rules the seas of the world, extensively disrupts international commerce and communication with swift and well armed privateer fleets. Meanwhile, the Group of Four set plans into motion to build a force capable of challenging Charis, and in the meantime to attack the Kingdom in any way possible. They order the brutal public execution of the previous Archbishop of Charis, Erayk Dynnys , although things do not exactly go as planned, and they suffer a setback after Dynnis bravely publicly denounces them before his death. They also declare that Cayleb and Staynair are apostates and enemies of God, which creates domestic problems for the King. Merlin barely manages to prevent the assassination of Archbishop Staynair at the hands of Temple Loyalists , who also burn the Royal College. The Group of Four urge all of the nations loyal to the Church to close their ports to Charisian shipping in an attempt to attack Charis via economic means. The ensuing massacre in the port city of Ferayd pushes Safehold to the brink of Holy War. Cayleb, on the advice of Merlin, decides to try to become allies with whomever possible to prepare for the inevitable conflict. This proves to be a very difficult task, as most of the nations of Safehold have aligned with the Church. Originally expecting the Prime Minister to merely seek to restore relations, Queen Sharleyan of Chisholm is shocked when Grey Harbor instead proposes a political marriage between her and Cayleb. It is revealed that Haarahld VII was a member of this group, as were most of his ancestors, and that he had made it his goal to model Charisian society on the principles of the past, and eventually reveal the truth to the world. The decision is made to inform Cayleb of the truth, as Haarahld had died before he could do so. The members of the Brethren agree to keep the amount of people who are aware of the truth as low as possible. Cayleb decides to exact retribution on Delferahk. A large Charisian fleet sails to Ferayd, where it quickly reduces all coastal defenses to rubble and lands a large force of Charisian Marines. Sharleyan arrives in Charis for the wedding, and by chance, she and Cayleb end up falling in love. They decide to combine their two kingdoms into a new Empire of Charis , with both of them ruling over Charis and Chisholm together. Cayleb and Sharleyan decide that the nearby League of Corisande, a longtime enemy of Charis, will also need to be subjugated before it can be reinforced with support from Zion. Lock Island turned to the short, almost pudgy looking officer standing on his other side. Nor had it affected his sharp, incisive intelligence. Although Seamount had been promoted from captain to commodore, Lock Island still felt vaguely guilty. And he would have had that streamer, too. Besides, he was far too valuable where he was for Lock Island to even consider exposing him to enemy fire. Fortunately, Seamount "who claimed he could get seasick taking a bath" appeared quite content. He got to play with fascinating new toys, especially over the past couple of years, and he was too busy stretching his brain to worry about whether his sleeve bore the single embroidered kraken of a commodore or the two gold krakens of an admiral. And the security aspect here is very good. Too much of this island is vertical, Sir. Fortunately, Keelhaul "despite the dubious humor of his name" was as affectionate as he was. Not a minor consideration in a dog which weighed the better part of a hundred and forty pounds. Wherever it came from, though, Keelhaul actually looked forward to their trips up the mountain. And he was calmer and less worried by the sounds of gunfire than most humans. His actual strength on active operations would have been even higher than that, once other attached specialists were added in, and Clareyk and Seamount were right about the space limitations. That had never been a problem before, since about the largest Marine formation in pre-Merlin days had been a single battalion. For the moment, that army still belonged to Lock Island, but he had no doubt a time was coming, probably in the not-too-distant future, when a Royal Army would have to be split off from the traditional Marines. There were simply aspects of what armies had to do that sea officers like himself had never been trained to do. Maybe so, he thought with just an edge of grimness. I believe you both. And General Chermyn and I have already been giving some thought to the problem. As you say, we can keep things under wraps out here on Helen a lot better than we could anywhere else. Then the roundish little commodore grinned suddenly. Lock Island was thoroughly familiar with that "sorting out my thoughts" gesture, and he waited patiently. Then the commodore cleared his throat. Canister range is substantially shorter than that, though. And, Sir, with all due respect, finding clear ranges sixteen hundred yards long is going to be more problematic in a land battle than it is at sea.
