Chem in Engg & Tech Vol 1 by Kuriacose and a great selection of similar Used, New and Collectible Books available now at www.enganchecubano.com - Chemistry in Engineering and Technology: V 1 Vol 1 by J C Kuriacose; J Rajaram - AbeBooks.

To impart technological aspects of modern chemistry To lay foundation for the application of chemistry in engineering and technology disciplines Learning Outcomes At the end of the course, the students will be familiar with the fundamentals of water technology; corrosion and its control; applications of polymers in domestic and engineering areas; types of fuels and their applications; recent trends in electrochemical energy storage devices. Hard and soft water, Units of Hardness numerical problems. Disadvantages of hard water: Scale and sludge, caustic embrittlement, priming and foaming, corrosion. EDTA, alkali titration method numerical problems. Lime soda numerical problems , zeolite, ion exchange, mixed bed deionizer, treatment of municipal water. Desalination of sea water, electro dialysis, reverse osmosis. Introduction, preparation, purification and applications as superconductors and HIV protease inhibitors. Introduction, preparation, purification and applications Lubricants: Classification, properties and mechanism of different types of lubricants. Introduction to composite materials " Properties and morphology " loading characteristics " Fibre reinforced composites, metal matrix composites, ceramic composites " properties and specific applications in industries and aerospace. Thermoplastics, thermosetting plastics - properties and industrial applications of important thermoplastic, thermosetting plastics. Classification of fuels, calorific value - LCV, HCV; measurement of calorific value using bomb calorimeter numerical problems. Calculation of air qualities problems. Solid Fuel, Carbonization, coking and caking. Preparation of metallurgical coke, analysis of Solid fuel by proximate and ultimate analysis, Liquid Fuels: Knocking and anti-knocking for petrol and diesel octane number and cetane number - diesel index. Biodiesel and Biogas -composition and applications. Unit V Instrumental Methods of analysis Electromagnetic spectrum: EMR interaction with matter - absorption and emission of radiation. Principle, instrumentation " Quantitative applications of colorimetric analysis " estimation of concentration of a typical metal ion Iron IR Spectroscopy: Principle, instrumentation and Applications Text Books:
