

1: Chicken Soup Preferred Breeder Clubs

Select as many options as you like to find the right food for your pet. Type of Pet.

Great, affordable food By Ameenphin on Oct 30, Top Contributor Simon really likes this catfood and transitioned from this brand of kitten easily. His coat is gorgeous! He has great personality; I think the vitamins it provides are perfect! Please try again later. By Dolores on Sep 3, My rescued barn cat always had really bad mangy skin. I randomly bought this food and, after the first 5 pound bag, her coat became beautifully soft and healthy looking. I think she may have been allergic to other foods. It greatly improved the quality of her life. The only problem is that none of the pet stores in my town carry it any more so I have to order it. This exact product was recommended by several hedgehog breeders. Elsie my little Evil Drama Queen eats it up good. But 5 stars for hedgehog owners. Report Tastes Good By villageidiot on Sep 30, Not sure where these bad reviews about cats not liking it are coming from. They eat it up and choose it over other top brands which is enough for me You liked it! By Sushi on Jul 30, My cat 9 years old has never had a problem with any food until this one. She developed some pretty gross skin issues and she started vomiting. Report Kitties do very well on this food By Anitra on Apr 7, I have 3 Bengals and one rescue cat, they all love this food and do very well on it. I used to buy only the high protein cat foods for my cats, however one of them develops urinary problems with the high protein. She does amazing on this catfood, this is the only food we have found that does not cause her problems. Also on the high protein foods she was overweight, she is a good weight on this food and has a very shiny glittery coat. Report Yuk nobody likes it By Trixie on Apr 11, I thought I would try this since my cats need a change once in a while. Well I put it down for all 8 of them and they sniffed it and walked away. It was breakfast and they were hungry. Hours later not a morsel was touched. So much for that. I had to throw a whole bag away.

2: Chicken Soup for the Dog (Cat) Lover's Soul: Submissions Needs and Writer's Guidelines

Chicken Soup for the Pet Lover's Soul spoke directly to the hearts of all readers whose lives have ever been changed by the love of a pet. Now the coauthors bring readers this volume, honoring the unique and enduring love that people share with their cats and dogs.

I currently have two of my own and could only wish for more. There are stories of adopting special cats, cats alerting their owners to danger or illness, and many other things. There are a lot of people out there that are just cruel to animals including a story in this book where four teenage boys are practicing target shooting on a cat and it hurts to read about people like that. Granted, there are just as many if not more wonderful people in this book who adopt cats and take care of them, so it does have that redeeming quality to it. I will admit that there were quite a few stories in here that made me laugh or cry. The cat getting its head stuck in the garbage disposer it was rescued successfully made me giggle. But, despite there being a specific chapter for cat death "Farewell, My Love", kitty death was rampant through this book. Still, they had a lot of good stories in this book. Overall this is one of the better Chicken Soup books. As a cat lover, I did enjoy it and read it in one sitting. Reynard More of my reviews can be found at www. Divided into sections, the stories vary in age of cat and the lesson or moral of each story. There is definitely something for every cat lover in this wonderful book. Each account is heartfelt and will leave you feeling good. Then he ends up moving into the hearts and home of some kind people. I connected w This is a special collection of true stories, all centered on our feline friends and their undeniable "purrsonality". I connected with this story because I knew a cat like this in my lifetime. Each section has several stories of the special friendship and bond between human and cat. The feline personality and intelligence is showcased and celebrated. It is a book to savour, share, and read again.

Since I adopted him, he has been vomiting several times a week, sometimes several times a day. Upon visits to the vets I was only told it could be hairballs. I have been bouncing through various hairball treatments and foods in this timeframe. I picked up some of the adult light chicken soup formula last week, and so far he has not vomited. Diana My 2 male long hairs 2 years were okay on this for a few months. At least the one stopped his vomiting which he was having on various others- but still had a mess in the litter box. When he got blood in his poop I got concerned and the vet put him first on science diet which he refused to eat, and then royal canin wet which he devoured. His digestion settled down. The minute I tried incorporating the chicken soup dry back into their diet once again -his digestion got bad so I am getting rid of it. I thought this was kinda sneaky and turned me off a bit! Pam I have a 4 year old long haired orange tabby that began having intermittent vomiting, general lethargy, and occasional bloody diarrhea while on Science Diet Hairball formula. Our 3 dogs are on it as well the dog food formula and are doing very well also. I would highly recommend this food! I also feed my dogs the dog food chicken soup which I think has less carbs than the catfood and have had no issues there either. I had a female, approximately 10 years old domestic tortie calico who developed a food allergy to IAMS. She threw up often. I changed her to the Chicken Soup, and she has done well ever since. She is almost 16 years old now, and her brother who passed last was almost 15 years old. I have a 4 to 5 year old and a 1 year old. I would highly recommend it. Neither of my cats would eat this brand. In fact they resorted to eating from my dogs dry food bowl. I donated the remainder of the bag to the local shelter. It might be great nutritionally but my cats would not touch the stuff. Lori I tried feeding the dry food to my cats. I slowly mixed it with their old food just as I was directed to do. I was and still am very disappointed with this brand. My Calico was throwing up several times a week, she may very well have been allergic to my carpet though she has not thrown up since I changed her food and got rid of the carpet. She has not tolerated any food, until now. I do rescue work and it seems to be a brand that does not cause allergies in any of the cats, i. I also feed some canned food not Chicken Soup , and fresh cooked chicken and some tuna not much and also give smaller amounts of Purina One and Beyond salmon flavor as a change of pace and taste treat. Most of my personal cats have lived to age , and they have had other foods throughout their lives. I have only used the Chicken Soup dry for about 7 years. Debra Fisher I have fed this food, in the dry version, to my Maine Coon mix who has hypertrophic cardio myopathyâ€”a serious heart conditionâ€”for many years. He has not been able to tolerate food with any corn product in it which, surprisingly, is a main ingredient in some very expensive cat food and Chicken Soup does not have it. He has lived 10 years past his predicted life span. I like to attribute part of the reason to this excellent cat food. The only complaint that I have is that it can be hard to find a local supplier. Farouk Any food can cause specific allergies. Not all cats are the same and it would be rather naive to think that one brand will have NO issues with various breeds. As mentioned above, cats get bored and it would be safe to change. I change brands very frequently and the cats are thankfully healthy. This brand is premium and the cats eat it joyfully and no issues whatsoever! Karel I have 3 cats and all like Cat Soul Food which I feed them along with another brand of dry cat food, home cooked food, fresh meat, and canned salmon and tuna. Cats get bored with the same food all the time, in my experience. Of the dry foods I give them, Soul Food is their favorite. I have not noticed any negative reactions, and my cats never seem to get fleas. Their teeth are healthy too!
