Eight National and Provincial Mountain Parks are within easy driving distance. The scenery is classically magnificent - steely grey limestone peaks are clothed in forests, waterfalls, craggy cliffs and, not far west of Canmore, glaciers! The forest cover of the valley floors is broken by frequent lakes and beaver ponds. Towards treeline the forest thins, alpine larches appear as forests give way to alpine meadows. From late May to mid August the forest and especially the meadows are lit in glorious wildflower shades of red, blue, yellow and white. By late August wildflower color is replaced by the reds and golds of Fall. September is in some ways the most spectacular month as the alpine larches turn the treeline into a blazing line of gold and incandescent aspens that speckle the valley floors. We will stay as a group while hiking each day - Expect a slow and steady pace. Most of the days involve hiking for up to 5 hours, but there are options for longer hikes on some days depending on the fitness of the group. Elevation gains of up to m for some hikes. Any training you can do before you arrive will enhance your experience. The more fit you are the more great hiking you can enjoy! A welcome meeting will take place this evening. Exact time and location to be advised with your final documents. Our choice to break the ice is Prairie View Lookout Trail. This trail, located in the Front Ranges, will allow you to see the incredible difference there is looking east towards Calgary and the Prairies or looking west towards the incredible Canadian Rockies. About half-way through, we will stop for our day hike, Chester Lake or Burstall Pass. We spend the next two nights at a comfortable lodge in Banff. Fire being the remains of a wildfire almost regrown now, and Ice being the Stanley Glacier overhanging the cliffs at the head of the valley. Return to lodge for overnight. We can even do a full circuit to include both incredible trails. We spend the next two nights at a comfortable inn in the village of Lake Louise. Tonight we are rewarded with a farewell dinner as we sit together and recall the week of spectacular hiking. It focuses on short but pleasant hikes with easy access from the highway. However, there are several positive things about the book: It is printed on very thick and durable paper which should stand up well if used while on the hikes. The 50 hikes with maps do have excellent pictures associated with them. All of the hikes list the best time of the day to catch the best lighting for pictures, and are classified according to degree of difficulty. The following parks are covered: Banff, Jasper, Kootenay, Yoho, and Waterton. Excellent for starters By Conny Ellison on Aug 02, Because we forgot to bring the books we already had at home, we had to buy new ones once we arrived in the Canadian Rockies this summer. This one did exactly what we wanted it to: Simply Excellent A Customer on Apr 29, These are excellent walks for those on a time budget but who want to see more than the hoard from the latest coach tour. The scenery is so vast that walking further gains little benefit anyway, but it gets you out of the car park and to some breathtaking scenery and peace and quiet. In most cases with very little effort. We took nearly all the hikes that the author noted as his favorites, plus a few more, and had no other hiking guides other than what was available on the Parks Canada web page. We found the book fairly accurate as to photography notes, difficulties, and geographics. For those wanting to take only the shorter or easier hikes, this is a great value of a book. A very useful trail guide A Customer on Jun 28, This book was really helpful in giving advice on great walks in the Rockies, from Banff to Jasper. If you are new to hiking in the National Parks, then this will introduce many of the best hikes with information on points of interest and many excellent photos. Canadian Rockies" is a better choice, but the book gives a good overview with pictures. No maps for hikes. Even short walkways to overlooks are included in the book. Unlike some other "easy hike" guides, the author uses both distance and changes in terrain to grade each hike as "easy" to "harder. The maps are small but legible. They indicate stream, lakes, and parking areas but not elevations. Dye on Aug 06, We studied this book for months prior to our trip to the Canadian Rockies. Trail information very accurate. Rating of trail difficulty very accurate. We almost hiked the entire book!! Some of our favorite were the hikes listed in the "other nearby hikes" after each featured hike. So glad we had this book. I think there is a newer addition and saw it all over the stores in Lake Louise, Banff and Jasper but could not find any differences in the books. Smith on Jan 28, So great to have a menu for enjoying such a spectacular part of the world. There are many dozens of hikes, from wheelchair access, through easy walks, to strenuous non-technical climbs. Great descriptions and photos. I read it cover to cover in a night and felt like I had a good handle on what to see in each park. Add a Book Review Book Summary: This particular edition is in a Paperback format.
