

1: CNET Do-It-Yourself Digital Home Office Projects - Download Free EBooks

Step 1: Set up your shot. Get yourself in front of a white or cream-colored background, like a wall or posterboard. That's the easy part. Now, with the help of a friend, adjust the lighting so.

How to take your own passport photos Stick it to the overpriced drugstores and print your own passport photos with the DIY project. A digital camera or smartphone Computer A photo printer or local photo printing center Easy enough, right? Now follow the steps to take your passport photos, DIY-style. Take your own passport photos 3: Set up your shot Get yourself in front of a white or cream-colored background, like a wall or posterboard. Make yourself presentable The U. In a nutshell, you should look like your everyday self. Abide by these rules to get your passport photo accepted: Wear your everyday clothing and hairstyle. This is not the time to get creative or try that new electric green eyeshadow. No electronics can be in the photo, so take of your headphones, Bluetooth devices, and 3D glasses before hitting the shutter. Hats, sunglasses, and tinted glasses are forbidden, but if you wear prescription glasses, you can sport those. Pose with a neutral face. A smile or straight face are OK, but no goofy expressions! For a complete list of guidelines which you should review go to the U. You should be cropped out just below the shoulders. Snap a few shots and transfer your photos to your computer. To edit your photo to the proper dimensions and composition, head to the U. Upload the photo to the site, then zoom in or out, and move the photo around until your face is aligned with the outline. The program will save it as a 2-inch-by-inch photo, which will be the final printed size. Otherwise, go through a service like Shutterfly to print it out at your local drugstore. You should attach only one photo to your passport application, and finally, pat yourself on the back for a job well done.
