WARHAMMER 40, - INDE: ENOS 1 1 WARHAMMER 40, INDEX: XENOS 1 Official Update Version Although we strive to ensure that our rules are perfect.

Not a fan of the Emperor but also not looking to workshop the Chaos Gods? Well it sounds like the Xenos Indexes might be right up your alley! The Xenos Indexes contain everything you need for your alien armies. The War in Heaven. That is really the theme of these Indexes: I think the wargaming community will have a field day trying out all the different options now. It feels like a new game and these indexes are setup in a way to allow players, new and old, to dive right in and start playing again. If that was the design goal then GW nailed it. This is the time to try every unit out and find out what works for you. I have no higher praise for a game than to say it keeps me interested and wanting to play it more. Once the game launches and players from all over share their experiences and thoughts certain things will likely bubble up; the cream rises to the top. But for now, everything is still all mixed in there and new discoveries are waiting to be made. My hope is that you are too. This game has a lot of polish on it, and that care is apparent. The books are going to be available June 17th " so when that time comes go see for yourself. I challenge you to at least try it! Especially you Ork and Nid players" Index: It contains datasheets covering the range of Aeldari and Necron miniatures, with overviews of each army. Updated abilities, psychic powers, wargear, weapon profiles and points values allow you to field your collection in games of Warhammer 40, Updated abilities, psychic powers, weapon profiles and points values allow you to field your collection in games of Warhammer 40,

Jump to navigation Jump to search Example early 3rd edition Codex Imperial Guard Each codex had its own lettering style for the title. Example late 3rd edition Codex Imperial Guard All of these longer codexes had a standard black border and common title style. Example 4th edition Codex Space Marines All codexes had a standard grey metal-effect border and common title style. Example 6th edition Codex Space Marines All codexes had a standard grey name and the word codex. Early 7th Edition Codexes continued this styling. Example Late 7th edition Codex Dark Angels These codexes had a standard white name with their faction type. A codex often pluralised as codexes by Games Workshop, though the grammatically correct pluralisation is codices , [1] in the Warhammer 40, tabletop wargame, is a rules supplement containing information concerning a particular army , environment, or worldwide campaign. Codexes for particular armies were introduced for the second edition of the game. The third edition rendered these obsolete, and a new series began, including introducing codexes for battlezones and campaigns. Until superseded by newer versions, the 3rd edition and later codexes remained valid for the newer editions of Warhammer 40, The rules for all models from 7th Edition onwards have been produced as datasheets. These are normally a concise page containing all the necessary rules for a model or unit. A complete and comprehensive list detailing all the datasheets available for each faction is available on the Datasheet Warhammer 40, Wikipedia page. The introduction of 8th edition saw a large rules overhaul, and all prior codexes were rendered obsolete. On release, 8th edition introduced Indexes to introduce rules for all their armies, before again eventually releasing individual codexes. As with before 8th edition, codexes remain valid until superseded by newer versions currently the oldest valid codex is Codex: Space Marines - 8th Edition. All codexes 6th Edition and prior contained: Background - Information about the force and its place in the Warhammer 40, universe. This includes artwork, short stories, and copies of fictional documents from the future. Bestiary - A description of the units, characters and vehicles that can be chosen for use in a battle. This includes their characteristic values, information on their weapons, and any limitations on their use, as well as background information on the unit. Hobby section - Information on collecting, building and painting an army from the codex. Army list - The items in the bestiary are arranged by type and given a points value, with more powerful units costing more points, so that battles are fought between balanced armies. Options are also given here along with their cost. For 7th Edition Games Workshop overhauled the basic codex layout, 8th edition continued the same layout as such: This includes artwork, short stories, and copies of fictional documents from the future - The same style as before. Army List - This contains datasheets for every unit and a wargear list. In 7th edition datasheets contained the complete rules and points values needed to field a unit and a picture of the model from the Citadel Miniatures range, along with a description of the unit, as per the old bestiary. In 8th edition a datasheet contains the complete rules for fielding a unit including power level and keywords. The points for matched play have been moved from the datasheet to the Appendix. It also contains a quick reference sheet at the very back. In 8th edition this became: Rules for models produced by ForgeWorld are available as part of the Imperial Armour series of books, also published by ForgeWorld.
