But the information you find on the surfing the web is only the glittery surface of a deep sea of knowledge. If you really want to learn about herbs you need at least three good reference books; preferable the old-fashioned, physical, hold it in your hands and read in your favorite chair by lamplight even if the lights go out kind. These herbals, especially the older ones, can be challenging to read, not only for the archaic English, but also because they were written at a time when people had common knowledge of plants, how to identify them, grow them, preserve them, and make them into medicine and food to sustain themselves and their families, and assume this level of knowledge on the part of the reader. The selection of books here, and the authors quoted from them throughout this website, are the ones in my personal bookcase. While you can find most of them by searching online bookstores, many hidden treasures populate the dusty shelves of second-hand bookstores in your town. If you are lucky enough to find one still in business consider giving them your support. The drawback is an over reliance on the Western view of herbs as simply another type of drug - and not enough of the whole herb tradition that I favor. I find myself referring to it often, especially to sort out conflicting information about botanical names and exotic plants. Very easy to read and understand, there is information here for beginners, and for advanced home herbalists. Also complete identifying information. Well documented and detailed descriptions of herbs and plants used by the Native tribes and settlers of early North America 59 Chase, Dr. Chase, a traveling physician in the mid s, published a book of recipes for health remedies, drinks, livestock cures, etc that was a mainstay in households across early America. Some of these early Eclectic remedies are still good today, some not, but the reader will get a fascinating glimpse into how our forefathers lived. The book has been reprinted, Kessinger Publishing, LLC June 29, , and original copies are battered and timeworn, but still available. Culpeper was quite the rebel in his time, and diatribes against the establishment medical practitioners is infused with a dry wit and intelligence. Down-to-earth wisdom and practical hands-on knowledge. Foreword by Rosemary Gladstar 61 E. Teaches you how to recognise common patterns in the wonderful world of plants all around you. Highly recommended for anyone who ever wondered what is that plant? Gives more evidence based background than most. A great book - formulas range from simple to complex - with easy to follow directions. This book is part of our heritage and is in the public domain. Full of recipes and written in a very accessible homey style. Understandable for beginners, a good reference to more advanced users. Good, succinct information, good indexing. The Science and Practice of Herbal Medicine", Healing Arts Press Excellent reference - solid herbal information - written with an eye on both the science and folklore of medicinal plants with a good dose of common sense. Great home remedies 49 Lehner , Ernst and Johanna. It is in their clip art collection, but the text as well as the illustrations make great reading 57 Li Shih-Chen. This book is a must have for anyone interested in North American medicinal plants, however one major drawback in the plates, while still gorgeous are poor quality black and white. Important knowledge for those wishing to truly understand how plant chemistry works to heal us. Expensive book, so keep a lookout for used copies. Filled with beautiful color photographs of Herbs and plants with good details on history of uses, habitat, origins and how to identify plants in the wild. Use everyday household items to replace expensive OTC preparations. This book is a good contemporary introduction for both students and practitioners of Ayurvedic herbology. The bulk of the book is a page guide to herbs for animals. The recipes are formulated using herbs and spices to help balance the constitution of each person. Very wise and informative. Great selection of home herbal formulations and information for women to be able to take charge of their own health. Good growing and harvesting advice. I first found this book at the local library, and found it instructional enough to buy a copy. Tons of information about essential oils and some really good recipes for use. It was established in by the Minister of Health in Germany in

I searched out my larger values, and I asked myself, if I was going to die, did I want to do it fighting and clawing or in peaceful surrender? What sort of character did I hope to show? Was I content with myself and what I had done with my life so far? I asked myself what I believed. I had never prayed a lot. I had developed a certain distrust of organized religion growing up, but I felt I had the capacity to be a spiritual person, and to hold some fervent beliefs. Quite simply, I believed I had a responsibility to be a good person, and that meant fair, honest, hardworking, and honorable. I believed in them. A person like Dr. I believed in the hard currency of his intelligence and his research. Beyond that, I had no idea where to draw the line between spiritual belief and science. But I knew this much: I believed in belief, for its own shining sake. To believe in the face of utter hopelessness, every article of evidence to the contrary, to ignore apparent catastrophe--what other choice was there? We do it every day, I realized. We are so much stronger than we imagine, and belief is one of the most valiant and long-lived human characteristics. To believe, when all along we humans know that nothing can cure the briefness of this life, that there is no remedy for our basic mortality, that is a form of bravery. To continue believing in yourself, believing in the doctors, believing in the treatment, believing in whatever I chose to believe in, that was the most important thing, I decided. It had to be. Without belief, we would be left with nothing but an overwhelming doom, every single day. And it will beat you. Dispiritedness and disappointment, these were the real perils of life, not some sudden illness or cataclysmic millennium doomsday. I knew now why people fear cancer:

**3: What Does the Bible Say About Doctors?**

*Country Doctor's Book of Medical Wisdom and Cures by Cummings, Michael J A copy that has been read, but remains in excellent condition. Pages are intact and are not marred by notes or highlighting, but may contain a neat previous owner name.*

Are They a Gift from God? The word mistranslated as Physician is actually the word healer. But the Bible, in the original, says something quite different. Who claims to be our Healer? I will also bring it to Pass. I have purposed it. I will also do it. I will speak, and the word that I shall speak shall come to pass. In the Bible, What was the consequence of seeking out anyone else except God for healing? Jesus certainly did miraculous healings when He was on earth, but there was always ONE requirement. We are in rebellion against God, whether we realize and acknowledge it or not. Certainly God can perform a miraculous healing, but what good would that do in your life? It would allow you to continue to live, eat, think, act, and handle stress your OWN way, rather than changing your heart. When Jesus healed the Ten Lepers, how many came back to thank Him? Their hearts were not changed. The "Latter Rain" - How will we recognize it? Is it Already Here? The Christian churches are praising the Lord for what they consider to be the present-day "outpouring of the Holy Spirit" in signs and wonders, including speaking in tongues and miraculous healings just like the events that occurred with the apostles in the Upper Room at Pentecost fifty days after the crucifixion and resurrection of Jesus, years ago. As mentioned, the "Early Rain" is considered by most Christians to have been given to the apostles in the Upper Room at Pentecost. In speaking of this occurrence, the Bible says the apostles were together in the upper room with over other Christians. And yet we hear in the dialect in which we were born, Parthians, and Medes, and Elamites. Their languages were perfectly understood by those from the various respective countries. What they were speaking was NOT an unknown tongue because everyone "understood in his own dialect dialektos - in Greek. Characteristics of the "Early Rain" included: In fact, many Christians believe that this predicted "Latter Rain" is going on right now in the churches, exemplified by an exciting movement of "Spirit-filled" Christians who are speaking in unknown languages and are being miraculously "healed! What are the "keys" in the analysis of the "Early Rain" to unlock the understanding of the "Latter Rain"? Jesus explained that the first birth, is physical, natural, but the second birth is a spiritual birth. Here Paul speaks of two situations, first the natural or physical, and secondly the spiritual. Jesus was explaining this principle to Nicodemus when He said, "The first birth is physical, but the second birth, being born again, is spiritual. The word "soul" in the Bible is never used to describe plants and trees, etc. They can only be discerned understood spiritually. Spiritual understanding does NOT use the five senses. The natural birth of a child can easily be detected by the five senses. It can be seen, heard and felt. God changes the heart quietly and slowly which cannot be detected by the senses. Only the result can be seen, just like the working of the wind. The wind itself cannot be seen, only the result of the wind. The lamb sacrificed for sin in the temple in the Old Testament was the "first" - the physical. But it looked forward to the "Lamb of God" who by His physical death would give us spiritual salvation. Jesus, the Lamb of God, was the "second" - Spiritual fulfillment of the literal, physical sacrificial lamb in the Old Testament sanctuary service. Manna - Bread from Heaven The manna that rained down from heaven when the Israelites were in the wilderness was the "first" bread, looking forward to the "second" - the spiritual bread from heaven, Jesus Christ. They could not understand the spiritual application because "spiritual things are ONLY spiritually discerned. They were physical, they could be seen and touched. And most importantly, humanity was unable to keep them under their own power. The First and Second Deaths! The first death is in us when we are born. As soon as a baby is born, its cells begin to die. That is the "first" death. The "second" death according to 1 Cor This is obviously a spiritual, not a physical, death. So what does it mean? We are told in Revelation that "waters" mean people and multitudes. So "sea", because it is water, means people. A "lake" is also water, so it also must mean peoples and multitudes. The word "fire" is used symbolically and spiritually repeatedly in the Bible. We go through "fiery trials" 1 Peter 4: So the "lake of fire" according to the symbology of Revelation, means fiery trials caused by reaping what we have sown. We are put right back in the midst of the people we have

wronged in order to reap what we have sown in order to be spiritually purified. Faith based on miracles is NOT faith! Simon Magus Acts 8: Many believed in the Lord when they beheld the signs which He did, yet Jesus did not entrust Himself to them, because He knew what was in humanity John 2: It is no longer manifested by signs and miraculous healings Signs and Wonder Paul performs miracles early in his ministry The need for signs and wonders, in order to believe, is a sign of spiritual immaturity. Early in his ministry Paul performed many miracles. People were healed if they just touched his handkerchief. So that from his body were brought unto the sick handkerchiefs or aprons, and the diseases departed from them, and the evil spirits went out of them. Also Paul does not miraculously heal his co-worker, Epaphroditus, who almost died. He obviously got well the long, slow way. The Early Rain, the "First of the two "Rains", was characterized by visible miracles, including resurrections and miraculous healings. These could easily be detected by the 5 senses. No one had to be "spiritual" in order to detect and understand these healings. Even pagans were able to detect these signs. According to 1 Cor Some say that means that "healings" will not be a part of the "Latter Rain. This is in accord with the way the Holy Spirit works in the Second Birth being born again. Look at these examples in the Old Testament. The Israelite symbolically transferred his own sin to the lamb by placing his hands on the lamb. This clearly shows us that the "sin" will be burned out of our lives by "fiery trials", we will be "gold tried in the fire. It was their bonds that were burned off, the ropes that held them in bondage. The ropes represented the bondage of sin. These were burned off, but the three young men were not touched with the fire. In addition, a fourth person was in the fire with them, "One like the Son of Men" - Jesus. Those who take the Mark of the Beast "shall be tormented with fire and brimstone in the presence of the holy angels, and in the presence of the Lamb. It comes from the root word Theios which means divinity or the Godhead. This torment with fire and brimstone occurs "in the presence of the Lamb" meaning that Jesus promises to go through the fire with us, just as He did with Shadrach, Meshach and Abednego. That is truly Good News! Only this time the fire symbolizes the "fiery trials" that the New Testament speaks about, not literal fire. If you think it is a "stretch" to interpret this "fire" of Rev Then WHY would anyone just pick ONE term from that passage, the term "fire and brimstone" and interpret that literally? Also remember the rule of "firsts" and "seconds", the first being physical and the second being spiritual. The wicked resurrected in the second resurrection will be spiritually "destroyed" by having the sin purified out of them by going through "fiery trials" - reaping what they have sown. Until he found it. There was NO cutoff time. Again there was NO cutoff time. For many more texts showing that God will save everyone, see the study entitled "What Happens At The Judgment" at [www](http://www). The Latter Rain has the following five characteristics: Miraculous healings do NOT change the heart. Before Jesus healed the paralyzed man whose friends let him down through the roof, Jesus said, "Your sins be forgiven you. Forgiveness of his own sins was necessary before his healing could take place. Notice that Jesus did NOT say that the man was sick because he lived in a sinful world.

Ayurvedic herbal medicines The Atharvaveda , a sacred text of Hinduism dating from the Early Iron Age , is one of the first Indian text dealing with medicine. The Atharvaveda also contain prescriptions of herbs for various ailments. The use of herbs to treat ailments would later form a large part of Ayurveda. Ayurveda, meaning the "complete knowledge for long life" is another medical system of India. Its two most famous texts belong to the schools of Charaka and Sushruta. The earliest foundations of Ayurveda were built on a synthesis of traditional herbal practices together with a massive addition of theoretical conceptualizations, new nosologies and new therapies dating from about BCE onwards, and coming out of the communities of thinkers who included the Buddha and others. Both these ancient compendia include details of the examination, diagnosis, treatment, and prognosis of numerous ailments. His medical treatise consists of chapters, 1, conditions are listed, including injuries and illnesses relating to aging and mental illness. The Ayurvedic classics mention eight branches of medicine: The teaching of various subjects was done during the instruction of relevant clinical subjects. For example, teaching of anatomy was a part of the teaching of surgery, embryology was a part of training in pediatrics and obstetrics, and the knowledge of physiology and pathology was interwoven in the teaching of all the clinical disciplines. But the physician was to continue to learn. It progressed during Indian sultanate and mughal periods. Unani medicine is very close to Ayurveda. Both are based on theory of the presence of the elements in Unani, they are considered to be fire, water, earth and air in the human body. According to followers of Unani medicine, these elements are present in different fluids and their balance leads to health and their imbalance leads to illness. Muslim rulers built large hospitals in in Hyderabad , and in Delhi in , and numerous commentaries on ancient texts were written. Traditional Chinese medicine Assorted dried plant and animal parts used in traditional Chinese medicines, clockwise from top left corner: Much of the philosophy of traditional Chinese medicine derived from empirical observations of disease and illness by Taoist physicians and reflects the classical Chinese belief that individual human experiences express causative principles effective in the environment at all scales. These causative principles, whether material, essential, or mystical, correlate as the expression of the natural order of the universe. The Jin Dynasty practitioner and advocate of acupuncture and moxibustion , Huangfu Mi , also quotes the Yellow Emperor in his Jiayi jing, c. During the Tang Dynasty , the Suwen was expanded and revised, and is now the best extant representation of the foundational roots of traditional Chinese medicine. Traditional Chinese Medicine that is based on the use of herbal medicine, acupuncture, massage and other forms of therapy has been practiced in China for thousands of years. In the 18th century, during the Qing dynasty, there was a proliferation of popular books as well as more advanced encyclopedias on traditional medicine. Jesuit missionaries introduced Western science and medicine to the royal court, the Chinese physicians ignored them. Because of the social custom that men and women should not be near to one another, the women of China were reluctant to be treated by male doctors. The missionaries sent women doctors such as Dr. Mary Hannah Fulton . Because Machaon is wounded and Podaleirius is in combat Eurypylus asks Patroclus to cut out this arrow from my thigh, wash off the blood with warm water and spread soothing ointment on the wound. View of the Askleipion of Kos , the best preserved instance of an Asklepieion. Temples dedicated to the healer-god Asclepius , known as Asclepieia Ancient Greek: Some of the surgical cures listed, such as the opening of an abdominal abscess or the removal of traumatic foreign material, are realistic enough to have taken place, but with the patient in a state of enkoimesis induced with the help of soporific substances such as opium. He argued that channels linked the sensory organs to the brain, and it is possible that he discovered one type of channel, the optic nerves, by dissection. Most famously, the Hippocratics invented the Hippocratic Oath for physicians. Contemporary physicians swear an oath of office which includes aspects found in early editions of the Hippocratic Oath. Hippocrates and his followers were first to describe many diseases and

medical conditions. Though humorism humoralism as a medical system predates 5th-century Greek medicine, Hippocrates and his students systematized the thinking that illness can be explained by an imbalance of blood, phlegm, black bile, and yellow bile. For this reason, clubbed fingers are sometimes referred to as "Hippocratic fingers". His teachings remain relevant to present-day students of pulmonary medicine and surgery. Hippocrates was the first documented person to practise cardiothoracic surgery, and his findings are still valid. Some of the techniques and theories developed by Hippocrates are now put into practice by the fields of Environmental and Integrative Medicine. These include recognizing the importance of taking a complete history which includes environmental exposures as well as foods eaten by the patient which might play a role in his or her illness. Herophilus and Erasistratus[ edit ] The plinthios brochos as described by Greek physician Heraklas, a sling for binding a fractured jaw. Some of what we know of them comes from Celsus and Galen of Pergamum. Herophilus also distinguished between veins and arteries, noting that the latter pulse while the former do not. He and his contemporary, Erasistratus of Chios, researched the role of veins and nerves, mapping their courses across the body. Erasistratus connected the increased complexity of the surface of the human brain compared to other animals to its superior intelligence. He sometimes employed experiments to further his research, at one time repeatedly weighing a caged bird, and noting its weight loss between feeding times. Some of this vital spirit reaches the brain, where it is transformed into animal spirit, which is then distributed by the nerves. He dissected animals to learn about the body, and performed many audacious operations—including brain and eye surgeries—that were not tried again for almost two millennia. In *Ars medica* "Arts of Medicine", he explained mental properties in terms of specific mixtures of the bodily parts. Naples Dioscurides, 7th century.
