History of crime fiction One of the earliest stories in which solving a crime is central to the story is Oedipus Rex , in which the search for the murderer of the previous king, leads to the downfall of the current one. The earliest known modern crime fiction is E. Better known are the earlier dark works of Edgar Allan Poe. With his Dupin stories, Poe provided the framework for the classic detective story. Watson in later Sherlock Holmes stories. The evolution of locked room mysteries was one of the landmarks in the history of crime fiction. The Sherlock Holmes mysteries of Arthur Conan Doyle are said to have been singularly responsible for the huge popularity in this genre. The evolution of the print mass media in the United Kingdom and the United States in the latter half of the 19th century was crucial in popularising crime fiction and related genres. Like the works of many other important fiction writers of his dayâ€™e. The series quickly attracted a wide and passionate following on both sides of the Atlantic, and when Doyle killed off Holmes in The Final Problem , the public outcry was so great, and the publishing offers for more stories so attractive, that he was reluctantly forced to resurrect him. In Italy, local authors began to produce crime mysteries in the s. Early translations of English and American stories and local works were published in cheap yellow covers and thus the genre was baptized with the term "Giallo Libri" or yellow books. The genre was outlawed by the Fascists during WWII but exploded in popularity after the war, especially influenced by the American hard-boiled school of crime fiction. There emerged a group of mainstream Italian writers who used the detective format to create an anti-detective or postmodern novel in which the detectives are imperfect, the crimes usually unsolved and clues left for the reader to decipher. Crime fiction in Spain also curtailed during the Franco Dictatorship took on some very special characteristics that reflected the culture of the country. The Spanish writers emphasized the corruption and ineptitude of the police and depicted the authorities and the wealthy in very negative terms. In the post-Mao era, crime fiction in China focused on corruption and harsh living conditions during the Mao era such as the Cultural Revolution. Reader speak of crime fiction as a mode of escapism to cope with other aspects of their life [7]. Detective fiction The cozy mystery: It features a complex, plot-driven story in which the reader is provided with clues from which the identity of the perpetrator of the crime may be deduced before the solution is revealed at the end of the book. The setting of the story and the crime has some historical significance. The locked room mystery: The American hardboiled school: Forensic crime fiction; similar to the police procedural. The investigator the reader follows is usually a medical examiner or pathologistâ€™they must use the forensic evidence left on the body and at the crime scene to catch the killer. This subgenre was first introduced by Patricia Cornwell. The caper story and the criminal novel: The psychological thriller or psychological suspense: The parody or spoof. Pseudonymous authors[ edit ] As far as the history of crime fiction is concerned, some authors have been reluctant to publish their crime novels under their real names. More currently, some publish pseudonymously because of the belief that since the large booksellers are aware of their historical sales figures, and command a certain degree of influence over publishers, the only way to "break out" of their current advance numbers is to publish as someone with no track record. In the late s and 40s, British County Court judge Arthur Alexander Gordon Clark â€™ published a number of detective novels under the alias Cyril Hare in which he made use of his profoundly extensive knowledge of the English legal system. When he was still young and unknown, award-winning British novelist Julian Barnes born published some crime novels under the alias Dan Kavanagh. Other authors take delight in cherishing their alter egos: The author Evan Hunter which itself was a pseudonym wrote his crime fiction under the name of Ed McBain. Availability of crime novels[ edit ] Quality and availability[ edit ] As with any other entity, quality of a crime fiction book is not in any meaningful proportion to its availability. Some of the crime novels generally regarded as the finest, including those regularly chosen by experts as belonging to the best crime novels ever written see bibliography , have been out of print ever since their first publication, which often dates back to the s or 30s. The bulk of books that can be found today on the shelves labelled "Crime" consists of recent first

publications usually no older than a few years. Classics and bestsellers[ edit ] Furthermore, only a select few authors have achieved the status of "classics" for their published works. A classic is any text that can be received and accepted universally, because they transcend context. A popular, well known example is Agatha Christie , whose texts, originally published between and her death in , are available in UK and US editions in all English speaking nations. One example is Val McDermid , whose first book appeared as far back as ; another is Florida -based author Carl Hiaasen , who has been publishing books since , all of which are readily available. Revival of past classics[ edit ] From time to time publishing houses decide, for commercial purposes, to revive long-forgotten authors and reprint one or two of their more commercially successful novels. In , Edinburgh -based Canongate Books started a series called "Canongate Crime Classics," â€”both a whodunnit and a roman noir about amnesia and insanity â€”and other novels. However, books brought out by smaller publishers like Canongate Books are usually not stocked by the larger bookshops and overseas booksellers. The British Library has also since starting republishing "lost" crime classics, with the collection referred to on their website as "British Library Crime Classics series". Sometimes older crime novels are revived by screenwriters and directors rather than publishing houses. In many such cases, publishers then follow suit and release a so-called "film tie-in" edition showing a still from the movie on the front cover and the film credits on the back cover of the bookâ€”yet another marketing strategy aimed at those cinemagoers who may want to do both: Bloomsbury Publishing PLC on the other hand have launched what they call "Bloomsbury Film Classics"â€”a series of original novels on which feature films were based. Older novels can often be retrieved from the ever-growing Project Gutenberg database.

Florida, Ya Kill Me! Has it warmed up to the the upper thirties? Or, you know, not-quite-four degrees for you Celsius types. You need to get in a Florida state of mind. Seriously, we could use the tourist dollars. Belly up to the bar in a Sherri Travis mystery and order yourself something with an umbrella and too much rum. Need your humor with less liquor and more pills off the bathroom floor? Which, might explain the three criminally insane novels about inept criminals and low-lives from former Miami Herald columnist, Dave Barry. Of course, long before Dexter, a episode show about Michael Shayne hit the air in Pulpier than a Central Florida orange grove, the Mike Shayne books many ghostwritten show off a less-populated, decidedly un-glitzy side of the Magic City. His view of the Keys, in particular, is worth the price of admission and cheaper than the hotel rates down there this time of year. The downtrodden Hoke Moseley might be doing even worse than Thorn in the lottery of life, especially considering that his author, Charles Willeford, unfortunately died after only four books. Les Standiford is a guy who knows Florida history at least as well as Serge Storms. Henry Flagler and the Spectacular Rise and Fall of the Railroad that Crossed an Ocean is excellent, but he also has a fun eight-book series about John Deal, a builder with a really bad habit of pissing off corrupt developers, political wannabes, and potential revolutionaries. The first book, Done Deal, is set in a pre-Marlins Miami and makes the town seem a little more baseball-crazy than our half-empty stands would suggest. Poisoned Pen Press re-released the series in the early s. The Pulitzer-Prize winner knows crime and knows Miami. Her true crime books are probably better known than her fiction. Lupe Solano strikes me as sort of the anti-Britt Montero. Not quite cozy, but definitely not noir. Lupe might get her hands dirty, but she makes sure her manicurist cleans them up later. Last, but hardly least, I offer you Elmore Leonard. So, what are your favorite Sunshine State mysteries? What did I miss? Neliza Drew is a tofu-eating teacher and erratic reader with a soft spot for crime fiction. She lives in the heat and humidity of southern Florida with three cats and her adorable hubby. Tuesday, October 23, Michael Wiley: Michael Wiley and I were on an Sunday 8: Released from prison after being wrongly convicted of a heinous crime, Franky goes to work for the Innocence Project-like organization that won his freedom. Franky is an intriguing character because he is so complex; he inspired such mixed emotions! How did Franky Dast come to be? The failure of adults to see what I imagined must be obvious innocence shocked and shook me. With all the recent news about false convictions and exonerations, I found the story. Men and women who run innocence projects and justice initiativesâ€”Bryan Stevenson, Barry Scheck, othersâ€”are equally complex sidekicks and often heroes themselves. I model Franky Dast on a number of real exonerated death row inmates. When he gets out of prison, he joins a justice initiative as an investigator. What looks like a poor choice to you or me may look like a reasonable or at least acceptable one to him. So he takes risks, sometimes very dangerous ones. The ability to take them is all he has, his only freedom. By the way, to my thinking, the biggest risk he takes in Monument Road is one most of us take. Through the course of the book, he allows himself to fall in love. I was definitely looking at Franky through my lens of experience "make good choices! When reading it, I often felt like I needed to cool off from the Florida heat and humidity because of the terrific sense of place you established. Did you set out to make the setting a character of sorts? When I started setting books around the Florida-Georgia border, I worked hard to catch the colorsâ€”and the sounds, smells, and humidityâ€”of this place. In addition to writing, you teach literature at the University of North Florida in Jacksonville. Can you name a book or two that you love to teach and why? The characters are immensely complex, conflicted, and lovable even Guitar Bains, who is a psychotic killer. The settingsâ€”north, south, in betweenâ€”are rich and evocative. The plot is gripping. The language is narrative and lyrical. The book is also great crime fiction. What has surprised you most about being a published author? I love how successfully crime fiction cross-pollinates with other writing genres: I know of a basket-load of mysteries that include recipes. Not many people read that one, though, so maybe I should have considered agents, editors, and fans more closely. But when he learns that Bill Higby, the detective whose testimony helped convict him, is facing his own murder charge, Franky is torn. Unless he finds out what happened that fateful night eight years before, the night year-old Duane Bronson and his year-old brother were murdered, Franky will always be under suspicion, and the real killer will remain free. What really happened that dark, wet night on Monument Road? And is Franky prepared for the shocking truth? He is a frequent book reviewer and an occasional writer of journalism, critical books, and essays. Michael grew up in Chicago and lived and worked in the neighborhoods and on the streets where he sets his Kozmarski mysteries.
