Sage DacEasy Accounting is a powerful, easy-to-use accounting system that includes General Ledger, Accounts Payable, Accounts Receivable, Inventory, Purchasing, Billing, Cash, Recurring, Fixed Assets, Reporting, and DacAccess custom reporting.

An accounting software system designed by Sage. The only product offerings available are upgrades to existing DacEasy customers. DacEasy is a powerful, easy-to-use, complete accounting solution that has been winning awards and satisfying users for more than a decade. Use them together or individually to fit your exact accounting requirements. These tools help you perform business activities, track and report on vital business information, and can grow with your business from start up to a mid-sized organization. In addition to these powerful tools, Sage DacEasy Accounting also offers benefits that can streamline your business processes. Convert stored customer quotes to invoices without reentering information, assign different tax rates to items on a single invoice, and track revenue and expenses by department to determine profitability—all easily accessible through Sage DacEasy Accounting. Sage DacEasy Payroll Sage DacEasy Payroll makes performing your payroll a simple automated process; yet offers you the power and sophistication of much more expensive payroll systems and outsourced services. Whether you enter traditional or out-of-the-ordinary transactions, employee time cards, full payroll, direct deposit, payroll checks, or a combination of these, the payroll process becomes a simple task. Rely on Sage DacEasy Payroll to calculate and pay vacation or sick time, regular and overtime, and liabilities and deductions automatically. The flexibility of Sage DacEasy Payroll allows you to generate payroll for only hourly employees, only salary employees, or a combination of both. In addition, you can generate and print payroll-related forms to meet filing requirements or use the included standard reports to simplify your payroll reporting process. Sage DacEasy Order Entry The easy-to-use Sage DacEasy Order Entry module provides the tools you need to enter customer sales orders, track these orders, and manage the customer relationship from the original quote to shipping the order. Enter transactions such as quotes, orders, blanket orders, and sales returns, and even assign percentage or flat price discounts for specific products to designated customers or during a specific date. Sage DacEasy Order Entry gives in-house sales staff the tools they need to process phone orders. Plus it provides salespeople who go to customer sites or work remotely the access they need to easily sync with the office by transferring orders. Sage DacEasy Point of Sale Sage DacEasy Point of Sale is a powerful yet easy-to-use point of sale system that goes beyond ringing up sales to help retailers better manage their business. In addition to providing the tools you need for the sales process, Sage DacEasy Point of Sale provides advanced reporting, quotes, layaways, and accounts receivable payment—all from the same screen. You can enter multiple tender types, and even include two payment types on a transaction. Sage DacEasy Point of Sale can add flexibility to your business, as well. Assign multiple sales tax rates for each sales transaction or designate promotional pricing for your sales initiatives, Need to print bar-code labels for your products for faster inventory and checkout? Sage DacEasy Job Cost Leverage Sage DacEasy Job Cost to estimate the cost of jobs, track the costs associated with jobs as they progress, and compare actual costs to your estimated costs. Sage DacEasy Job Cost is ideal for wholesalers, distributors, light manufacturers, the construction industry, and any other situation where you need to control the costs of individual jobs closely. In addition, the system can track inventory costs and transfer the costs to each job. And bill at your convenience using the multiple billing options, which include fixed cost, cost plus, hourly, and more. Learn more about these modules by clicking on the module name below. Accounting At the core of DacEasy is a series of fully integrated modules that track information vital to successfully operating and growing your business. Use these modules, together or individually, to fit your exact accounting requirements: General Ledger a complete audit trail Billing.

DacEasy is a powerful, easy-to-use complete accounting solution. It has been winning awards and satisfying users for more than a decade. At the core of DacEasy is a series of fully integrated modules giving you the vital information that's key to you successfully operating and growing your business.

You can quickly view information on the Internet, view helpful tips, access activities and follow guides to complete workflow processes. Use the Setup Workflow Guide to quickly complete each setup step. Present a Professional Image Providing excellent customer service and building relationships extends beyond face-to-face interaction with your customers and vendors. Because printed correspondence is also a reflection of your company, make sure that your accounting software lets you produce custom, professional-looking correspondence. Create professional correspondence using: Customizable forms including invoices, purchase orders, statements, labels and more. Word mail merge letters with our built-in Microsoft Office integration. Instant Reports allow you to quickly view key reports with a single mouse click. While fast access is great, the real power is the ability to click an area on the report to drill down to more detail. For example, if a customer inquires about their account, you can view the Accounts Receivable Aging, and then drill down on a past due invoice to view the invoice detail. Create presentation-quality reports, selecting the fonts, color, paper size, orientation and more. Microsoft Office Integration allows you to easily publish your data to Word or Excel. LookUps allow quick access to existing records. You can sort on any column in a LookUp, include a secondary sort, sort ascending or descending and search for a record. View multiple windows at the same time even from different modules or companies. SQL database engine. This translates into fast and safe access to your data. Combine this with our advanced security feature, which allows you to control the areas each user can access, and you will feel confident in the integrity of your data. Extensive Functionality In addition to the typical features found in most small business accounting software, DacEasy includes a number of features usually only found in much more expensive software. For example, we have extensive inventory-related features such as multi-warehousing, multi-level price breaks and price assignment various criteria , serial number tracking, reorder tracking, multiple costing methods average, standard and last purchase price , assembly on-the-fly, backorder tracking, and much more! All other trademarks and copyrights are the property of their respective holders. Daceasy Hong Kong Ltd.

Sage 50 Accounting has comparable features to Sage DacEasy, plus improvements you won't find in our Sage DacEasy product. Sage 50 Accounting has comparable features to Sage DacEasy, plus improvements and updates you won't find in our Sage DacEasy product.

After browsing around for different options, it appears this might be the best option for a short book that summarizes basic accounting. The question is in what order these building blocks should be assembled in order for the reader to best comprehend the whole. The order above is perhaps the most logical but presenting principles before their application risks making them too abstract, presenting the end result ahead of the principles makes no sense as the reader cannot fully appreciate what they are seeing. The author has solved this in a rather clever way. He presents various accounting principles as they are needed to understand the practical application that is covered next by the text. Mike Piper is the author of introductory level books on an array of economic areas. This text aims to give a quick basic understanding of accounting and bookkeeping. Most major line items on the financial statements are given a short but adequate explanation and topics such as the difference between current and long term balance sheet items, operating vs. To help the reader draw conclusions from the financial statements part one ends with a chapter on financial ratios. Two or three ratios each are presented under the headers liquidity ratios, profitability ratios, leverage ratios and asset turnover ratios. This is all fine but in his efforts to simplify for the benefit of the user Piper in one instance goes too far. The numerator in return on assets is not the same as the one in return on equity. Return on assets uses pre-tax income plus financial costs, not net income. Part two is a mix of accounting principles, bookkeeping and a few slightly more complicated financial statement topics. After briefly discussing FASB and GAAP, the author describes the bookkeeping process with the debits and credits of the double-entry accounting, T-accounts, general ledgers and trial balances. Piper then proceeds with a chapter on accrual accounting, - this separation of cash inflows and outflows from recorded revenues and expenses that is perhaps one of the less intuitive ones for the non accountant reader and that is also the arena for most of the accounting irregularities in real life. However, accruals are important to understand as the topic next in line is the closing of the books. The book totals ninety-seven pages and so Piper has three pages to spare. The discussion on how to close the books could have benefited from at least one of these. It is a bit too brief to be educative I would also dedicate one page to a flow chart between the financial statements to complement part one. Who is the main beneficiary of this book? However, it is absolutely perfect for a one day read prior to taking a university class in accounting. Everything the teacher says during the course will make perfect sense.
