

### 1: Did I Mention I Love You? |

*Did I Mention I Love You is easily my favourite contemporary romance of the ! It will grip you from the beginning and won't let go until long after dark, with a scorching forbidden romance at it's core.*

When I glance sideways at him, I can see his growing exasperation as he racks his brain for something to say. There is nothing to talk about besides the uncomfortable reality of the situation. He draws my suitcase to a halt by a black Lexus, and I stare dubiously at the polished paintwork. Before the divorce, he and my mom shared a crappy Volvo that broke down every four weeks. Either his new job pays extremely well or he just chose not to splurge on us before. I move around to the right side of the car and slide my backpack off my shoulder, opening the door and getting in. The leather is scorching hot against my bare thighs. I wait in silence for a few moments before Dad edges in behind the wheel. The sun is blinding, so I open up the front compartment of my bag and pull out my shades, slipping them over my eyes. I heave a sigh. This is not entirely the truth though. Not great, but not bad. There are numerous lanes, cars racing down each one, the traffic heavy but moving quickly. The landscape here is open. The buildings are not leaning, towering skyscrapers like those in New York, nor are there rows of trees like the ones back home in Portland. The only satisfying thing I discover is that palm trees do really exist. Part of me always wondered if they were a myth. We pass under a collection of road signs, one above each lane, outlining the surrounding cities and neighborhoods. The words are nothing more than a blur as we speed under them. A new silence is forming, so Dad quickly clears his throat and makes a second attempt at holding a conversation with me. Ella, my dad informed me recently, is his new wife. A replacement for my mom: A better dish-scrubbing technique? He merges into the farthest right lane. The thought of having a stepmom does not appeal to me. I want a nuclear family, a cereal box family made up of my mom, my dad, and myself. Not only have I been blessed with a lovely stepmother, I have also been graced with stepbrothers. He is growing irritated by my obvious negativity. Try to get along with them, honey.

*Did I Mention I Love You is the first book in the phenomenal DIMILY trilogy, following the lives of Eden Munro and Tyler Bruce as they try to find their way in an increasingly confusing world. Out Now in Paperback and eBook!*

What was that book??? And i have to say that all those shits that happened was so unfair for Tyler and Eden. The gang was al little bit surreal, wild, reckless They were making me angsty and worried all the time!!! He was the biggest asshole that ever existed!!! Okay, there are much worser men out there!!! But he was so aggressive without a serious reason and he was pissing me off. Usually, I am for those kind of girls that i love bad boys and i really was starting to wonder if Tyler would manage to make me love him!!! And yep, i have to inform you that he did it!!! And now all this hate toward him turned out a big love!!! And the same goes for Eden too!!! Another thing that i think that made me love this book is that i felt connected with the story. Maybe life would be more bearable if i had or more messed up, as happened to our heroes!!! Well, Eden is going for the summer in L. The situation is painful and too much But after all his ugly behavior is hard for Eden to feel something else than hatred for him Eden is very observant person, especially toward Tyler. And as the time is passing she can see that Tyler is pretending all the time in front of everyone He is wearing a mask!! Except that, she is starting to realize that Tyler is in deep shits and she wants to help him. She wants to unravel all his secrets and after a while she is starting to realize that she wants more of The crude comments and leching over Tiffani and the addictions: Sometimes his facade slips. It is so, so obvious. Mine is my insecurity. And beneath it all lies attraction. Tyler is attracted to me, and I am attracted to Tyler. Eden is the only person that could see beyond his charade and that terrified him and exciting him at the same time. She is making him feel In all his messed up life, she is the only light!!! But there is this problem!!! How can you be siblings when you never have met someone before a month??? But anyway that is a really long discussion!!! So what will happened with those two??? The obstacles between them are too many and too big!!! So, there is a possibility for them to have a future together??? Or they will have to supress their feelings for each other??? And if they will try to stay away from each other, the love that they are feeling will vanish like it never existed or the feelings and the longing for each other will grow more and more??? Well, I have to say that i liked Eden very much!!! I could relate with her so much with how she was feeling about her father and his new family. I liked how close she was with her mother. I also liked how good friend she was!!! And even though her decision near to the end made me extremely sad, i admire her strength!!! In the beginning, he was appearing like a totally prick, but there were more to him than that He was just lost and nobody realized it. And i have to say that he had good reasons for his attitude His past was making him react reckless and he became self-destructive and my heart was aching for his behalf! He was just trying to distract himself with stupid things, until Eden become his distraction When the real Tyler made his appearrance, i just loved him!!! I think that this is a step closer to get over the demons of his past!!! This is me, Eden. I want to be your mess. It was so unfair for them all this situation. When you love somebody, how is it possible to stay away for him??? Why they have to be doomed to ignore the love that they are feeling for each other??? It wrecked me all this emotional ride!!! As for the rest of the characters??? And I have to say that for a stepmother Ella was a great person!!! Rachael and Dean were amazing persons. Jake was just indifferent and Meghan just okay I hate those kind of girls!!! She was a manipulating bitch that she was trying with blackmailing to take what she wanted At this point, I have to remark that as friends all of them were sucking!!! Because when you care about your friend and you see him to destruct himself, you ought to help him. I need salvation for Tyler and Eden

### 3: Did I Mention I Love You? (The DIMILY Trilogy #1)(2) read online free by Estelle Maskame

*Did I Mention I Love You?* is the addictive first book in Wattpad sensation Estelle Maskame's DIMILY trilogy: three unforgettable summers of secrets, heartbreak and forbidden romance. *The DIMILY Trilogy*.

Contemporary, Young Adult, Romance Length: Love is everything but expected. Eden Monro came to California for a summer of sun, sand and celebrities – what better way to forget about the drama back home? Until she meets her new family of strangers: A room right next door to her oldest stepbrother, Tyler Bruce. Whom she cannot stand. But the two are constantly thrown together as his group of friends pull her into their world of rule-breaking, partying and pier-hanging. This young adult novel centers around Eden Munro and her forbidden relationship with her new stepbrother, Tyler Bruce. Since they have just met, the romance between them does not really cross over into taboo territory, but some readers might find this aspect of the storyline a little on the squeamish side. Eden Munro has mixed feelings about spending the summer with her long absent father, but needing a break from an unpleasant situation with two of her friends, she decides to take him up on his offer. Dreading a summer of babysitting her stepbrothers, she is delighted to discover the boys are not the toddlers she envisioned. While she likes the two younger brothers right from the beginning, Eden is not quite so enamored by her introduction to seventeen year old Tyler. Eden is a difficult character to like. She has serious issues with her dad and although her animosity is understandable, she does little to clear the air between them. Instead her resentment simmers in the background only to spill over in angry outbursts when she finds herself in trouble for some of her irresponsible behavior. Her instant dislike and snap judgment of her stepmother is also a irritating considering her parents have been divorced for three years. While she has good reason for her bitterness, Eden really did not think through her decision to spend two months with a father she dislikes and an unfamiliar stepfamily. Tyler is an absolute mess and he crosses the line from charming bad boy into just plain old bad pretty much right from the start. He is trouble with a capital T and he is just plain toxic to anyone unfortunate enough to get caught up in his orbit. Sure, there are a few shopping and sightseeing trips thrown into the storyline, but even then, their conversations gravitate to their next party. The ease in which they can obtain booze is mindboggling and the fact that many of their parents are in the house while the teenagers are boozing it up is astounding. Equally astonishing is the lack of punishment when the kids stay out all night, break curfew or come home wasted. For the most part, it is fast-paced and engaging although the story hits a bit of a lull in the middle. Tyler might have been a more sympathetic character if the reasons behind his behavior had been revealed earlier in the story and Eden would have been more likable if she had been able to withstand peer pressure even the tiniest bit.

The eldest of the three is Tyler Bruce, a troubled teenager with a short temper and a huge ego. But how can Eden keep her feelings under control? And can she ever work out the truth about Tyler? What did I just read? Oh yeahâ€”a book that made me question everything. This book was a push and pull, a tug and shove, and I had to look at it through a new set of eyes to enjoy it for what it wasâ€”and it was something. After walking out on her and her mother three years ago, Eden hated her dad for obvious reasons. The relationship with her and her dad definitely influenced her decisions. The book had a lot of partying and teenage drinking, per the usual for her new group of friends. She and her mom had a more stable relationship, and I would have loved to have had more of her in the novel. However, I enjoyed watching her relationship with Ella, her new stepmother, grow and develop, even though it only jumbled my thoughts even more. Arrogant, conceited, and delinquent are only a few words to describe his character. He seems like a difficult character to like, right? Confusing and morally ambiguous relationship aside, I wanted to jump on a plane to California after reading this book. The setting made me itch for the sunâ€”though Christmas Day in South Carolina about gave me my fill of sunny days. Either way, I almost missed summer. Santa Monica, seeing the Hollywood signâ€”though not as up close and personal as Edenâ€”and walking on Pacific beaches has now made my to-do list. What constitutes someone as siblings? Does true love show no bounds? She left school and now writes full-time.

And so, like every girl to ever walk this earth, I dreamed of visiting this Golden State. That and all the other lame tourist must-dos. With one earphone in, my attention half on the music humming into my ear and half on the conveyor belt rotating in front of me, I try my hardest to find a spot clear enough for me to grab my luggage. His voice is too irritatingly painful to ignore. When Mom first broke the news to me that Dad had asked me to spend the summer with him, we both found ourselves in a fit of laughter at the sheer insanity of it all. Three years of hearing nothing and suddenly he wanted me to spend the entire summer with him? All he had to do was maybe start calling me once in a while, ask me how I was doing, gradually ease himself back into my life, but no, he decided to bite the bullet and ask to spend eight weeks with me instead. Mom was completely against the idea. Was he hoping he could mend the relationship with me that he broke the day he got up and left? I doubted that was even possible, but one day I caved and called up my father to tell him that I wanted to come. Besides, I had my own reasons for wanting to get nine hundred miles away from Portland. So, I am not particularly thrilled to see the person approaching me. A lot can change in three years. Three years ago, I was three inches shorter. Oh, how shocking that, in fact, sixteen-year-olds do not look the same as they did when they were in eighth grade. The wires dangle in my hands, the faint lull of the music vibrating through the buds. I follow him out of LAX. Warmth hits my face as I walk across the sprawling parking lot, the sun tingling my skin and the soft breeze swaying around my hair. The sky is mostly clear apart from several unsatisfying clouds. Never did it occur to me that the boring city of Portland would be hotter in the summer than Los Angeles.
