

## 1: The Sound of Music - Do Re Mi - Free Downloadable Sheet Music

*Print and download sheet music for Do-Re-Mi from The Sound of Music. Sheet music arranged for Easy Piano in C Major (transposable). Doe, a deer, a female deer;.*

Major scales[ change change source ] On a piano , there are white keys and black keys. If we start on the note C and play each white key going up until we come to the next C, we have played the C Major scale. There were eight notes. For playing C major, only white keys were hit. There are half steps between two keys next to each other on the piano. So between the third and the fourth, and the seventh and eight tone, there was only half a step. Starting the scale at the next white key D , two black keys will need to be touched to get the same scale: The first one after three, the second after seven tones. Each black key has two names: Major scales generally use the notation with sharps, minor scales, often use the one with flats. Minor scales[ change change source ] There are also minor scales; they work the same as major scales, but use different intervals: This is done by lowering the third and sixth tone. Starting at A, and using only white keys gives A minor natural minor: The step from F to G is three half steps and difficult to sing. For this reason, F is used instead of F, but only going upwards. Except for some forms of Jazz music , the corresponding natural minor is used going downwards. Sometimes the major scale is sung to the words "doh, reh, mih, fah, soh, lah, tih, doh". In the film The Sound of Music , Maria teaches the children to sing by teaching them a song called "Doe, a deer, a female deer". Each line starts on the next note of the scale. Different periods use different scales[ change change source ] Traditional western music generally uses seven tones, and repeats at the octave. During the Middle Ages, and the Renaissance , the diatonic scale the white keys of the piano was used most often. Black keys called accidentals were rare. Natural minor was used less. From about , there are other scales, for example the chromatic scale 12 half tones.

### 2: Free Sheet Music: Play Along With "Do Re Mi" - Richard Rodgers "Singspiel

*Free Do-Re-Mi piano sheet music is provided for you. Do-Re-Mi is a show tune from the Rodgers and Hammerstein musical The Sound of Music. a deer, a female.*

Knowing about scales is massively useful for a songwriter. There are many different types of scales, but the most commonly used scales are major scales and minor scales. Chances are good that you already know what a major scale sounds like. Think back to your grade school days, when your music teacher taught you how to sing "doh - ray - me - fah - so - la - ti - doh"? That was a major scale. Every scale is composed of a specific patterns of whole steps and half-steps. Sometimes these are referred to as tones and semi-tones. One whole step is made up of two half-steps. Think of each line on the fretboard representing a half-step. Try the following exercise Pick a string, then place your finger on the first fret. Move your finger up another fret a half-step and play the string again. Repeat this process, moving up the fretboard. Or you could think of a piano keyboard: Imagine that you are playing each note starting from the one on the left, then across until you hit the black note on the far right i. Each note that you play is a half-step higher than the one before. If you have access to a piano, then you can try actually playing this. Be sure to focus on the top half of the keyboard, else you may not be playing half-steps. Because of the black note that is between C and D. On a guitar, you can play a whole step by moving your finger up two frets instead of just one. For now, just remember that two half-steps make a whole step.
