Driver's Ed in Massachusetts If you're a teenager applying for your first driver's license, you'll need to complete a Driver's Ed program to meet the requirements set by the Massachusetts Registry of Motor Vehicles (RMV).

I recommend using the DMV genie app and this website, I only studied last night and this morning while waiting for the test. I also read the drivers manual and did some practice tests along the way. I failed a few of them, but that did not stop me from passing them. I just kept on studying until I passed every test even the hardest ones. This website is amazing and it has a lot of useful information. Take the information seriously and you will succeed each step of the way. These tests helped me a lot but to be honest the questions are not very much different. A few like asking about the fine for children not wearing seatbelts, ages a child should wear a seatbelt, signs and a few others as well were the only different ones I had on my test. But keep in mind almost every test will be different so definitely do the fines practice tests. I finished my permit exam in less than 6 minutes. I decided to take the test two days back. I skimmed the manual and took all your tests. The design of the tests is pretty similar to the actual test and has been very helpful. This site is amazing. Just do the test and write down your errors. Then try to read the manual and read carefully those pages that you had incorrect answer on. Thank you so much guys for creating it. I took the test today and only got 2 wrong. A lot of the questions were almost identical to the ones on here! Between this site and skimming the manual, the test was cake. I looked online for a easier and faster way to learn and came upon this dandy website. It was the best thing ever and I passed while the two other people in the room with me that day failed. Also I was the first one in my family that had passed on their first try. I took all 6 tests twice and concentrated more on JOL fine questions there is a separate test for that on this website since I am from MA, we tend to get more of those ones. The questions were more about fines and JOL limitations, a few about signs and a couple just random. If you also go through the book, that would be a plus plus! I took all of the tests over the course of a few days and recently went to take the real exam. I flew through it in only a few minutes since everything was clicking so well even most of the fines and limits questions and passed. Would highly recommend this site for reviewing prior to taking the test, it helped me quite a bit! Make sure to you have fines and suspension part covered very well. This the best site to study for the dmr!!! I passed 3 of them and the real one. I think everyone should take advantage of them. Then, my parents found this site, and it worked! I took my permit test today and out of 25 I only got 3 wrong. This site works, the tests work! This site is amazing! This site helped me out a lot. I passed my real test today. I skipped it, thinking that the majority of questions would be about actual driving situations, wrong! I had to guess at all of them. There were several questions about junior operators too. This is a great web-site but the distribution of question types did not reflect the actual percentage of question types on the real test.
