Earth Shapes Activity Book, Story time just got better with Prime Book Box, a subscription that delivers hand-picked children's books every 1, 2, or 3 months.

Construction paper in a variety of colors Safe scissors Pencils or crayons Discuss with the students all the people around them that do kind things. Think of people in the school such as custodians, volunteers, aides, other teachers, and even their own classmates. Then suggest that the students prepare hearts to give to someone to thank them for an act of kindness. Fold a piece of construction paper in half and draw one half of a heart on the fold as shown. Prepare enough to provide one for each student. Then instruct the students to cut on the bold line, leaving the paper folded. Hold the folded part in one hand and cut with the other hand. Open it up to produce a heart shape. At each table provide a heart that you, the teacher, have done so that the students can copy it. Keep a basket of these hearts handy. Helping me when I fell on the playground Sharing your toy with me Baking cookies for our party Cleaning our school Teaching me a new game slide 4 of 5 There are many ways to practice making hearts and increase fine motor skills: Use play dough to make hearts. Paint hearts in a variety of colors on white paper at the easel. On a warm day, use a bucket of water and a paintbrush and paint hearts on the playground. Pour salt or sand in a baking tray with sides. Trace hearts with your pointer finger. Use buttons, cereal or small counters to form a heart. Be aware of students who tend to put foreign objects in their mouths to avoid choking hazard. Then instruct the students to color all of the hearts on the paper. Individually, ask each student to name the other shapes. When you plan a unit for preschool shapes , hearts will probably be a familiar shape for the students already. Use the hearts to spread kindness and gratitude while you continue to "shape-up" your students with this fun unit. Little, Brown Young Readers,

TAGS: shapes for kids, toddler activity books ages , early learning activity book, preschool color and activity book, alphabet books for preschoolers, kindergarten activity book, shape books for kindergarten.

Children will practice recognizing shapes while using gross-motor skills. In an open area of the room, use masking tape to form very large geometric shapes on the floor or use large cut-out shapes taped securely to the floor. Aim to have at least three each of the basic shapes: Walk around each shape and name it with the help of the children. Next, invite children to identify matching shapes. Now, who can stand on another triangle? Remember that children may not know the shape names and will need clues to know to which shape you are referring. Put on gentle music and invite two or three children to walk around the outside of a shape. Start them at the top or at a corner of the shape and have them walk slowly around the edge, moving clockwise. Ask them to try to stay on the tape lines or on the edge of the cut-out shape, like a tightrope walker. The object of the game is for everyone to find a particular shape to stand on when the music stops. Nobody is "out" because everyone works together to squeeze onto the shape. Play music and encourage them to move around the shapes in any way they wish. Then stop the music and name one of the shapes for example, "circle". Tell children to stop moving and find a circle to stand on. Once everyone has at least a toe touching a circle, applaud the children for cooperating so well. Ask children to cut out bread shapes using soft sliced bread and a variety of geometric - shaped cookie cutters. Fill several plastic bowls with fruit spread, peanut butter, cream cheese, and sliced cheese. Provide each child with a plastic knife. Invite them to make a sandwich with their bread shapes. Younger children may need assistance spreading food items onto their bread.

Printable Toddler Shapes Activity Book I'm sure you do if you have a destructive toddler like mine and if you don't then you will soon learn or your just lucky and I'm slightly jealous of you. After creating the files for this activity book, I printed, laminated and hole punched each page for the book part of the project.

You can read our full disclosure policy. During one of our recent circle times, our preschoolers loved this activity that included learning colors and shapes. After reading a shape book, we set the color bowls in the center of the circle. During the activity, our preschoolers identified the shapes they were given and placed them in the matching color bowl. These simple hands-on activities at circle time allow all the children to be involved at once, building self-confidence. This post contains affiliate links for your convenience. Circle time is a great way to introduce concepts to our 3 year olds through group activities. They were then invited to come to the center of the circle when called to sort their shapes into the matching bowls. The children placed their shapes in front of them. As they did so, they told us the color and the shape, if known. Activities such as these allow me to assess the children. By taking pictures, I can go back and look at them later and make notes in my assessment binder. This helps greatly when it is time to do evaluations. Group activities promote awareness of a community. Everyone is working together on the same activity. They are learning how to come forward and share. They are learning to help each other when solving problems. They are listening to each other. When planning circle time activities, we make sure they are not too long. For 3 year olds, we keep each group time under 15 minutes. For this reason, we have 3 or even 4 separate circle times during our 3 hours. Our first circle time is after all the children arrive. This is when we say good morning and introduce the materials we will be using. Our second circle time is before snack, when our class helper reports the weather and we do a group activity. Our third circle time is after snack, as we are transitioning to leave for the gym. We use this time to sing songs and do finger plays. Our last circle time is when we return from the gym and need to calm our bodies down. This is when one of the teachers will read a story.

4: Preschool Lesson Plan on Heart Shapes: Songs, Books and Assessment

This free printable book and shapes activity set will keep them happily engaged all the while learning about colors and shapes in one tidy booklet. Once they're done, tuck the shapes neatly in the binder to come back to over and again.
