

1: Victoria and Edward

Edward VII (Albert Edward; 9 November - 6 May) was King of the United Kingdom of Great Britain and Ireland and Emperor of India from 22 January until his death in The eldest son of Queen Victoria and Prince Albert of Saxe-Coburg and Gotha, Edward was related to royalty throughout Europe.

First marriage[edit] On 21 December at Coburg , a young Victoria married as his second wife Charles, Prince of Leiningen , whose first wife, Henrietta of Reuss-Ebersdorf, had been her aunt. Regency[edit] After the death of her first spouse, she served as regent of the Principality of Leiningen during the minority of their son, Carl. Shortly after the marriages, the Kents moved to Germany , where the cost of living would be cheaper. Soon after, Victoria became pregnant, and the Duke and Duchess, determined to have their child born in England, raced back, [5] [6] arriving at Dover on 23 April , and moved into Kensington Palace , where she soon gave birth to a daughter, Princess Alexandrina Victoria of Kent. The third brother, the Duke of Clarence, had yet to produce any surviving children with his wife. After the death of Edward and his father, the young Princess Victoria was still only third in line for the throne, and Parliament was not inclined to support yet more impoverished royalty. The provision made for Duchess of Kent was mean: In practice, a main source of support for her was her brother, Leopold. The latter had a huge income of fifty thousand pounds per annum for life, representing an annuity allotted to him by the British Parliament on his marriage to Princess Charlotte, which had made him seem likely to become in due course the consort of the monarch. Their attempts to forge a close relationship with the girl were frustrated by the conflict between the King and the Duchess of Kent. The King, angered at what he took to be disrespect from the Duchess to his wife, took the opportunity at what proved to be his final birthday banquet in August to settle the score. Speaking to those assembled at the banquet, who included the Duchess and Princess Victoria, William expressed his hope that he would survive until Princess Victoria was 18 so that the Duchess of Kent would never be regent. He said, I trust to God that my life may be spared for nine months longer I should then have the satisfaction of leaving the exercise of the Royal authority to the personal authority of that young lady, heiress presumptive to the Crown, and not in the hands of a person now near me, who is surrounded by evil advisers and is herself incompetent to act with propriety in the situation in which she would be placed. He had not counted on William IV surviving long enough for Victoria to succeed to the throne as an adult and consequently, while cultivating her mother, had shown little consideration for Victoria. When the latter succeeded, Conroy risked having no influence over her. He tried to force Victoria to agree to make him her personal secretary once she succeeded, but this plan, too, backfired. The result was that when Victoria became queen, she relegated the Duchess to separate accommodations, away from her own. Thirdly, Conroy by now lived in exile on the Continent and so his divisive influence was removed. By all accounts, the Duchess became a doting grandmother and was closer to her daughter than she ever had been. Legitimacy of Queen Victoria Some historians, including A.

After the Cullens returned to Forks , Riley and the newborns became her first priority: Victoria made continuous feints into the area around Forks, gathering information and hoping that the Cullens would believe these fruitless attacks were all that she had up her sleeve. Riley had hoped that Victoria would spare him, but meeting the Volturi made her paranoid and she wanted to move as fast as possible and then escape. By tormenting Diego to death, she extracted all information out of him and forced Riley to either side with her or against her. Riley reluctantly sided with her and helped kill Diego, much to his dismay. Knowing that she could completely trust him now, she ordered him to prepare the army to attack the Cullens and manipulate them into the same mindset. Eclipse Victoria, beheaded by Edward. When I tore him to pieces. When I turned him into ash. When I turned him The two groups began planning strategy for the upcoming struggle. She had planned to use Riley to distract Edward while she made her move on Bella. Riley momentarily hesitated when Edward told him that Victoria only used him, but she persuaded him otherwise. She attempted to escape when Seth attacked Riley, drawing away her object of distraction, but Edward taunted her relationship to James , angering her to the point that she warred with her survival instincts. She fought Edward while Riley battled Seth. After Seth killed Riley, Victoria tried to escape again, but Edward caught her and immediately ripped her head off. Physical appearance Edit Victoria in the forest in Twilight. There was no wind here, but the fire around her face seemed to shimmer slightly, as if it were alive. She had green eyes as a human. She moved at a feline pace with perfect, lethal steps, as of her agility. Personality and traits Edit Victoria was shown to have a mysterious but elegant personality. She could best be described as calculating, however she was frequently bloodthirsty, whether it was when she was dying to kill Bella for her delicious blood on the baseball field in Twilight or when she was stalking Bella for revenge in New Moon and Eclipse. She is also marked as one of the most persistent and ruthless characters in the series. Like most archetypical vampires and femme fatales, she was seductively charming and vain. As seen in Eclipse, Victoria was shown to be very manipulative and was willing to use others to achieve her own goals. Victoria manipulated Riley by telling him she loved him in order to get revenge on Bella and the Cullens, though she thought of him as nothing more than a pawn. In The Short Second Life of Bree Tanner, she was also petulant and spoiled, but at the same time overly cautious to the point of paranoia and vindictiveness. For self-preservation, she would go through any measure she deemed necessary. Despite all this, she was also paranoid and easily intimidated by dangers, and would do anything to survive. In the films, her personality was described as calculating and sinister, though self-preservation was still her top priority. They danced for a thrilling while, woven in a deadly blur. However, her ability was based more on her gift of self-preservation than on fighting skills; according to Stephenie Meyer, "her feet were dragged to safe spots and places". Enhanced self-preservation Main article: Useful, if you like to play deadly games. A partner with an uncanny instinct for escaping. This ability was carried over because, as a human, she was a servant mistreated by her abusive masters. She had learned to hide from her masters for long periods of time. Also, when she ran away by herself, she was excellent at sneaking into houses, stealing food, and sleeping somewhere safe without any person or animal knowing. Edward identified her ability as self-preservation, which was the instinctive desire to do what is necessary to stay alive. Because of this ability, she became a prominent threat to Bella and the Cullens, as it was impossible to catch her and she made persistent attempts to destroy them. In Eclipse , Edward angered Victoria enough to make her resist her survival instincts, but that brought her to her death when Edward ripped her body apart and burnt the pieces. Relationships Edit Victoria had an older sister named Anne , and once belonged to a coven of six vampires. She was in a coven with her mate, James , and Laurent ; and later, leader of the Seattle newborn army. Riley Biers was a pawn she had created to deceive him with devotion.

Queen Victoria and King Edward Queen Victoria died on 21 January at the age of She had been the Queen of Great Britain for 63 years, presiding over its industrialization and the expansion of the British Empire overseas.

The following summer, we both worked at Water World together. We worked long hours in the sun, went to events and parties, and naturally developed crushes for each other. However, Victoria was starting college in the Fall of and we just decided to be friends. At the end of the following summer, it was clear we both still liked each other. We went on a hike in Boulder, talked about life, and decided to officially start dating. Our relationship has been one filled with many adventures to the mountains to snowboard, hike, fish, backpack, and camp. We have traveled to places such as Wyoming, Portland, New Orleans, Mexico, and Costa Rica, and like to collect a magnet from each new place we visit. We enjoy going to new breweries to taste the many beers Colorado has to offer. And we spend countless hours playing and snuggling up with our dog, Simon. Together, we support each other, encourage one another, and truly enjoy each moment we get to spend together. Our Proposal in the Pouring Rain Eddie and I have known each other for 6 years now, and had been dating for 5 years when I had an inkling that the big question was going to come up soon. I suspected it would happen while camping or hiking, as those are our favorite activities to do, so all summer long with each adventure we went on, I was anxious. The prior year we hiked the West Peak. When we finally reached the trailhead we said that we would make it as far as we could. We talked to another group of hikers who were excited and that seemed to give us energy to keep going. I would say we were about 1. At this point I thought, if he was going to propose at the top of the Peak, he would have kept pushing us to go on, so naturally my heart sunk a little. Well, we start our trek back down and ran into the group we talked to earlier. Eddie asked them to take our photo in the pouring rain. I thought nothing of it and went to pose with him. When I turned around he was down on one knee with the box open! I immediately gasped and started crying, not able to say anything, just kept nodding yes! In between the emotions, he officially asked and I officially said YES!! The guy who took our photo was shocked and his wife was crying harder than I was. Our imperfect adventure, became my favorite perfect memory. The perfect combination of everything I wanted.

Princess Victoria of Saxe-Coburg-Saalfeld was portrayed by Alison Leggatt in the ATV drama Edward the Seventh, by Penelope Wilton in the television serial Victoria and Albert, by Miranda Richardson in the film The Young Victoria, and by Catherine Flemming in the ITV series Victoria.

He was known as Bertie to the royal family throughout his life. At age seven, Edward embarked on a rigorous educational programme devised by Prince Albert, and supervised by several tutors. Unlike his elder sister Victoria, Edward did not excel in his studies. Although Edward was not a diligent student—his true talents were those of charm, sociability and tact—Benjamin Disraeli described him as informed, intelligent and of sweet manner. After an educational trip to Rome, undertaken in the first few months of , he spent the summer of that year studying at the University of Edinburgh under, among others, the chemist Lyon Playfair. In October, he matriculated as an undergraduate at Christ Church, Oxford. His genial good humour and confident bonhomie made the tour a great success. Buchanan accompanied the Prince to Mount Vernon, to pay his respects at the tomb of George Washington. Vast crowds greeted him everywhere. Prayers for the royal family were said in Trinity Church, New York, for the first time since . They met at Speyer on 24 September under the auspices of his elder sister, Victoria, who had married the Crown Prince of Prussia in . Edward and Alexandra were friendly from the start; the meeting went well for both sides, and marriage plans advanced. Determined to get some army experience, Edward attended manoeuvres in Ireland, during which he spent three nights with an actress, Nellie Clifden, who was hidden in the camp by his fellow officers. Albert died in December just two weeks after the visit. She wrote to her eldest daughter, "I never can, or shall, look at him without a shudder. It was the first royal tour on which an official photographer, Francis Bedford, was in attendance. He was 21; she was . Edward and Alexandra on their wedding day, The couple established Marlborough House as their London residence and Sandringham House in Norfolk as their country retreat. They entertained on a lavish scale. Queen Victoria was of two minds whether it was a suitable match given the political climate. At least fifty-five liaisons are conjectured. Edward always strove to be discreet, but this did not prevent society gossip or press speculation. Ultimately, he did not do so but Edward was called as a witness in the case in early . Although nothing further was proven and Edward denied he had committed adultery, the suggestion of impropriety was damaging. While staying at Londesborough Lodge, near Scarborough, North Yorkshire, Edward contracted typhoid, the disease that was believed to have killed his father. There was great national concern, and one of his fellow guests Lord Chesterfield died. Edward cultivated politicians from all parties, including republicans, as his friends, and thereby largely dissipated any residual feelings against him. His advisors remarked on his habit of treating all people the same, regardless of their social station or colour. In letters home, he complained of the treatment of the native Indians by the British officials: Deep in an international crisis, Salisbury informed the Prince that it had been a dark morning, and that "my mind must have been occupied by some subject of less importance. He opened the college in with the words, "Class can no longer stand apart from class I claim for music that it produces that union of feeling which I much desire to promote. He ordered all the clocks at Sandringham to run half an hour ahead to provide more daylight time for shooting. By the s the future king had taken a keen interest in horseracing and steeplechasing. Tsar Nicholas II left, Empress Alexandra and baby Grand Duchess Olga Nikolaevna, In Edward was embroiled in the royal baccarat scandal, when it was revealed he had played an illegal card game for money the previous year. The Prince was forced to appear as a witness in court for a second time when one of the participants unsuccessfully sued his fellow players for slander after being accused of cheating. The friendship between the two men was irreversibly damaged, and their bitterness would last for the remainder of their lives. Just a few weeks later, in early, Albert Victor died of pneumonia. Edward told Queen Victoria, "[I would] have given my life for him, as I put no value on mine". In, his youngest son, Alexander John, had died just 24 hours after being born. Edward had insisted on placing Alexander John in a coffin personally with "the tears rolling down his cheeks". Sipido, though obviously guilty, was acquitted by a Belgian court because he was underage. Priestley recalled, "I was only a child when he succeeded Victoria in, but I can testify to his

extraordinary popularity. He was in fact the most popular king England had known since the earlier s. However, two days before, on 24 June, he was diagnosed with appendicitis. Treves was honoured with a baronetcy which the King had arranged before the operation [77] and appendix surgery entered the medical mainstream. Edward refused to bestow the honour on the Shah because the order was meant to be in his personal gift and the Foreign Secretary, Lord Lansdowne, had promised it without his consent. Edward also objected to inducting a Muslim into a Christian order of chivalry. Fluent in French and German, he reinvented royal diplomacy by numerous state visits across Europe. Edward doted on his grandchildren, and indulged them, to the consternation of their governesses. Asquith, to travel to Biarritz to kiss hands. Asquith complied, but the press criticised the action of the King in appointing a prime minister on foreign soil instead of returning to Britain. Tennant, to serve on a Royal Commission on reforming divorce law – Edward thought divorce could not be discussed with "delicacy or even decency" before ladies. Gladstone was sacked in the reshuffle the following year and the King agreed, with some reluctance, to appoint him Governor-General of South Africa. Beresford continued his campaign outside of the navy and Fisher ultimately announced his resignation in late , although the bulk of his policies were retained. During his reign he said use of the word "nigger" was "disgraceful", despite it then being in common parlance. Christendom and European civilisation. If the Russians went on giving ground, the yellow race would, in twenty years time, be in Moscow and Posen ". In response, Edward stated that he "could not see it. The Japanese were an intelligent, brave and chivalrous nation, quite as civilised as the Europeans, from whom they only differed by the pigmentation of their skin". However, his personal charm with people at all levels of society and his strong condemnation of prejudice went some way to assuage republican and racial tensions building during his lifetime. The King was displeased at Liberal attacks on the peers, which included a polemical speech by David Lloyd George at Limehouse. Edward was so dispirited at the tone of class warfare – although Asquith told him that party rancour had been just as bad over the First Home Rule Bill in – that he introduced his son to Secretary of State for War Richard Haldane as "the last King of England". Go back home and dissolve this bloody Parliament! The King was annoyed that his efforts to urge passage of the budget had become public knowledge [] and had forbidden his adviser Lord Knollys, who was an active Liberal peer, from voting for the budget, although Knollys had suggested that this would be a suitable gesture to indicate royal desire to see the Budget pass. During the election campaign Lloyd George talked of "guarantees" and Asquith of "safeguards" that would be necessary before forming another Liberal government, but the King informed Asquith that he would not be willing to contemplate creating peers until after a second general election. They threatened to vote against the Budget unless they had their way an attempt by Lloyd George to win their support by amending whiskey duties was abandoned as the Cabinet felt this would recast the Budget too much. Asquith now revealed that there were no "guarantees" for the creation of peers. The Cabinet considered resigning and leaving it up to Balfour to try to form a Conservative government. But in that debate Asquith hinted – to ensure the support of the nationalist MPs – that he would ask the King to break the deadlock "in that Parliament" i. The Budget was passed by both Commons and Lords in April.
