Customer testimonials Below is what our customers said about this product after they had received their orders. It is so easy to find the desired items on the store, and the order has arrived much earlier than expected and in perfect state. My kids love to learn with SG box curriculum. Their grades have improved substantially, Thanks to SG Box. The order was processed fast and with great service. Book came quickly an well packaged. Interesting books, some are outstanding. Love Singapore Math and Science Sherry in Vermont As a homeschooling family we needed a reasonably priced maths series that the children could work through independently. The Primary Mathematics series definitely gives your brain a workout. I have taken my year six Australian child back to year 4 level in this series, just to let her adjust to the rigour and not blow her confidence, and she is finding it very user friendly. Easy for her to follow the book, with colour pictures, scaffolded questions and prompts to estimate the answer first. I ordered several books and they arrived at my doorstep five days earlier than anticipated. The packaging was such that my books were in pristine condition. Thank you so much! Very good and correct service. I have always received my orders before the due time and I am very pleased with the products. Naida Easy to order Fast delievery Great books N. This is the second time I am ordering from this company, and they delivered the books very quickly I was reluctand initially since the company was based half globe away Items came a lot quicker than I have expected. Our books came in great condition. The texts are informative. We will most definitely order from sgbox again. Excellent service, professional and advanced books, as usual, Thank you soo much! Minnat-Allah Aboul-Ella Great products and great service. Our kids prefer this to any material we have found in the US. Camilla McRae I liked your service very much. The books reached me in perfect condition albeit, a couple of days late. That is all right for international shipment. Pal Simple and easy shopping experience. Excellent quality and service. Cooke Very fast and reliable. Rocha-rojas Fast and efficient as usual. Michele I like the overall content and presentation. My son loves the math books, they are easy to understand with great explanations of the concepts. Easy and responsive B. Your math books are really good: Very smooth transactions with no problems. This is a great service. Cho Thank you for the service and for the follow-up. I am happy to receive my order in a good condition. Very detailed and structured. Good working examples and workbooks give lots of practice. CHEN Everything is spectacular! Yatracos Received the order very quickly, very happy with the purchase. You guys are awesome. You help me help my little boy in his studies. You provide a great service.

Determine the position of each of them with respect to the other if: Find the length of MN if the 2 circles are: There are also permanent posts at each gate. Student Handbook 61 A 5 In the opposite figure: Two circles M and N of radii 3 cm, 4 cm, are intersected at A and B. Draw a circle of radius length 5 cm 1 Drawing a circle passing through a given point Example 2: If A is a point in the plane. Draw in your copybook a circle passes through point A. How many circles could be drawn passes through point A? There are infinite numbers of circles that pass through a point A 2 Drawing a circle passing through two points Example 3: If A and B are two points in the plane. Draw in your copybook a circle passes through points A and B. How many circles could be drawn passes through the two points There are infinite numbers of circles that pass through two points Note 1: The axis of symmetry of AB passes through the centers A 3 Drawing a circle passing through three points Note 2: A and B are two points in plane. Draw in your copybook a circle of radius length more than AB and passes through the two points A and B Note 4: Draw in your copybook a circle of radius length 4 cm and passes through the two points A and B Note 5: In the opposite figure: The perpendicular bisectors of the sides of a triangle intersect at a point which is the centre of the circumcircle of the triangle Note 6: Draw a circle of radius 3 cm and passing through A and B. How many solutions are there? Draw a circle with the smallest possible radius passing through A and B.
