Right from the inception of electricity and its distributive branches, the discipline of EEE has seen disruptive changes while adapting itself to the rapidly changing technologies. Experts see it as a microcosm of all things electrical and electronic, without which there would have been literal darkness all over the face of the earth. Alongside the major branches of engineering, the discipline of EEE holds a significant importance in heralding the greatness of the science of engineering as a whole. For the layman, the branch of Electronic and Electrical Engineering EEE can be defined as the branch of engineering that is associated with the study and applications of electricity, electronics and electromagnetism. Each and every equipment around you function based on the principles of this science. Its uses run the gamut from the early telegraph and telephone to the highly advanced robotic machinery and artificial intelligence based programming. It is because of the advancements and inventions in this field, that we are able to enjoy the luxuries of today at a nominal price. To describe the specific impact of each technology on the various equipment around us, it becomes a bit complicated. All the electronic devices around us and the electrical machinery use a combination of different principles and concepts to function. But to be specific in a differentiating sense, the entire branch can be sub divided based on the specific area they cater to such as-Digital computers, Control Systems, Telecommunications, Power engineering, RF Radio Frequency Engineering, Signal Processing, Microelectronics and Instrumentation to name a few. Each of these branches holds it s own importance and relevance to the subject as a whole in its own unique way. It is no ordinary task as such to be able to win over the interviewer without any technical knowledge about the subject of interest. Most of the companies that look to employ electrical engineers, be it corporate firms or large public sector establishments look for a crystal clear understanding of the science in a potential employee. To be able to meet this criteria, a student must be able to impress the interviewer with his strong grasp over the concepts and principles.
