General Surgery Back cover copy "Lecture Notes on General Surgery" introduces the student to the principles of common surgical operations and systematically covers all clinical problems where surgical intervention is indicated. In this new eleventh edition, each chapter has been revised and updated to reflect new developments in investigations, treatment, and basic practical procedures for all major surgical conditions. This popular and classic text will appeal to all medical students and junior doctors on foundation programmes who want a concise introduction to the fundamental aspects of general surgery and will provide the core knowledge for final exams and the MRCS examination. Fluid and Electrolyte Management. The Skin and its Adnexae. The Chest and Lungs. The Heart and Thoracic Aorta. Venous Disorders of the Lower Limb. The Brain and Meninges. The Stomach and Duodenum. The Rectum and Anal Canal. The Gallbladder and Bile Ducts. The Lymph Nodes and Lymphatics. The Kidney and Ureter. The Testis and Scrotum. An excellent study aid, brilliant revision aid, and all-round must have for your clinical education and general interest in the subject. If you only buy one textbook, it should be this one- it will be a welcome companion in preparation for many surgical exams in addition to the routine work of the surgical placement. Reading it cover to cover gives you a good overview of the topics in surgery, whilst still offering enough detail to impress even the most demanding consultant. I love this book. Georges "This is probably the best surgical text, both as a revision aid and general reading - perfect for undergraduate topics. Still involved with transplantation research at Cambridge as well as spending much time in Singapore teaching at their national university. Specialty is liver transplantation.
