*The book "Elric at the End of Time" was a collection of Moorcock work including the title piece as well as some of the author's reflections on his journey and a sampling of work featuring his early Sojan the Swordsman character.*

Rather than rewriting this excellent overview it is presented here with only minor changes. A ninth book, *Elric at the End of Time*, contains two Elric tales among the works collected in it, but need not be considered a vital part of the saga. A tenth and similarly extraneous book is *Tales of the White Wolf*, an anthology of Elric stories by various authors. This tale is not dealt with here. Elric is forced to invoke Arioch of the Seven Darks, one of the Lords of Chaos, who has not manifested upon the earth for centuries. Using the power this gains him, Elric chases Yyrkoon, who has kidnapped Cymoril, the woman Elric loves, and fled Melnibone. In recovering her, Elric gains possession of Stormbringer, a rune-carved sword possessed of both malign sentience and the power to drain the souls of those it slays. A portion of this power transfers to the weak albino, giving him the strength he has needed, but at a dreadful cost. At the conclusion of the first book, having made the acquaintance of the human hero Rackhir the Red Archer, Elric leaves his cousin as regent. He himself goes adventuring in the Young Kingdoms for a year, in search of the knowledge to revitalize his stagnant, dying kingdom. The Fortress of the Pearl After several minor adventures vaguely described, Elric arrives at the desert city of Quarzhasaat, last remnant of an empire that long ago threatened Melnibone, in The Fortress of the Pearl. Here Elric is dragged into feuds between the rulers of the city, and is forced by them to embark on a journey in search of a legendary treasure. Crossing deserts and other planes, Elric at last returns to Quarzhasaat to destroy it, completing a sentence passed against the city by Melnibone centuries ago, but never carried out. The Sailor on the Seas of Fate In The Sailor on the Seas of Fate, Elric learns something of his true nature, as he joins with three other aspects of the Eternal Champion to battle frightful twins who threaten the entire multiverse. Although this episode seems almost a dream to Elric later in his life, it has a profound effect upon him. Afterward Elric leaves the mysterious ship upon which he has sailed, taking his leave of its blind captain, and finds himself in a world beneath a blue sun. Befriending him, the two escape back to the Young Kingdoms, only to be caught up with the adventurer and explorer Duke Avan Astran, a Vilmirian of considerable fame. The Weird of the White Wolf After a short adventure at the far end of time, Elric returns to Melnibone as described in *The Weird of the White Wolf*, not to rule the Dragon Isle as he had hoped, but to destroy it forever. Then his cousin Yyrkoon seizes the Ruby Throne, declaring Elric a traitor and himself emperor. Leading a fleet of Young Kingdom raiders, Elric attacks the Dreaming City, his home, and the reavers he leads pillage and burn the oldest and most beautiful city in the world. Elric seeks refuge in Tanelorn, the eternal city, a haven for any whose lives are fraught with suffering, but he cannot find the peace that Tanelorn offers all others. Alas, Elric cannot save Myshella from the Pan Tangian and, with her dead, Chaos increases its influence upon the world. Even as Elric begins to fall in love with this spirited young woman, his doom is upon him, and he sends another ancient civilization crashing to destruction by his passing. Traveling with Zarozinia to her home, Elric weds her, hoping to find happiness. For the first time in years Elric puts Stormbringer aside, able to survive on drugs he discovered in Troos. Then he must reclaim the sword in an attempt to save his new home from the depredations of a savage eastern army. Successful, Elric is reunited with Zarozinia, and resides for a time in Karlaak by the Weeping Waste. Jagreen Lern, the Chaos-worshipping Theocrat of Pan Tang, unleashes madness and horror upon the earth. Having gone on a desperate journey to another world to gain a magic horn with which the ravaged earth can be renewed, Elric himself is killed by Stormbringer. Dead, Elric still cannot know peace: The last words of the saga are spoken by the entity that is Stormbringer itself, as it laughs in mockery at the Cosmic Balance and all it stands for.

### 2: - Elric at the End of Time (Elric of Melnibone) by Michael Moorcock

*Elric of Melniboné* is a fictional character created by Michael Moorcock and the protagonist of a series of sword and sorcery stories taking place on an alternative Earth. The proper name and title of the character is Elric VIII, th Emperor of Melniboné.

The Sleeping Sorceress Book One: The novel had about a quarter of the text removed for reasons of length mostly in the second and third novellas and the remaining text rearranged with new bridging material added to make sense of the restructuring. These paperbacks all featured cover art work by the same young artist, Michael Whelan, and helped to define the look of both Elric and his sword Stormbringer. The DAW edition of Stormbringer restored some of the original structure and text compared to the release, but other revisions were performed and other material excised. It includes two Elric-related tales: Both would appear in later collections with "The Last Enchantment" occasionally retitled "Jesting with Chaos". White Wolf Publishing released a similar two-volume compilation "Elric: Song of the Black Sword and Elric: The Stealer of Souls". Both of these two-volume compilations are arranged according to the internal chronology of the saga. The White Wolf text has minor revisions when compared to the Millennium release. The early version of the Elric saga, i. Beginning in , Del Rey Books reprinted the Elric material as a series of six illustrated books: This series arranged the stories in the sequence they were originally published, along with related fiction and nonfiction material. In August , Victor Gollancz Ltd. The Elric stories were published in five volumes in and The Sailor on the Seas of Fate, Elric: The Sleeping Sorceress, Elric: The Revenge of the Rose, and Elric: Characters in the Elric series[ edit ] See also: Deities in the Elric series "Yyrkoon" redirects here. For the French death metal band, see Yyrkoon band. He hopes to one day make her his wife and empress. Despite that she stands by Elric in his weakest state before his acquiring of stormbringer and she supports his dreams and wishes even when she is put in danger by them. He fights alongside Elric in the final war against Chaos, wielding the black sword Mournblade. Dyvim Tvar stays loyal to Elric even after he destroys Imrryr. An amiable poet and bard who involuntarily travels across the Multiverse. Amorous and good-natured, he is given to sudden expulsions of verse and song. He is writing an epic poem about Elric during their shared adventures. The cruel ruler of Pan Tang, skilled with both magic and the use of a battleaxe. A short, red-haired human with a cheerfully ugly face, adventuring companion to Elric. He and Elric share many dangers and rewards together. The most steadfast and loyal companion of all the Young Kingdom humans Elric encounters. He helps Elric in completing his fated purpose. Colloquially referred to as the Empress of the Dawn and The Dark Lady of Kaneloon, the powerful sorceress Myshella has acted as a guide and consort to Eternal Champions and adventurers alike down through the ages in the ineffable pursuit of Law. Immortal, ageless, and indescribably powerful. She sometimes rides a metal bird with emerald eyes, and more than once lends this mount to Elric. Prince Gaynor The Damned: A fallen knight of the Balance, doomed to suffer without release by the forces of Chaos. He inhabits a formless existence, imprisoned in a black-and-gold suit of armor emblazoned with the 8-pointed symbol of Chaos. Rackhir, the Red Archer: A human, once a Warrior Priest of Phum but cast out of his order. He and Elric travel and adventure together several times throughout the series. Unlike other characters who serve either Law or Chaos, Rackhir devotes himself to the Balance exclusively. One of the ten remaining Nihrain, this dark-skinned servant of the Balance guides Elric through the final phases of his quest. The daughter of a dead necromancer, Shaarilla of the Dancing Mist was born a mutant and an outcast among her people. Unlike her fellows of Myyrrhn, Shaarilla was born without wings. His fleets aid in the Sacking of Imrryr. A human sorcerer of the Pan Tang isles. A beautiful, scarlet-haired warrior Elric encounters on his journeys through the Multiverse. Serving neither Law nor Chaos, she has sworn an oath of revenge against Gaynor The Damned for the eradication of a universe that was precious to her. A human, ruler of Jharkor. He is next in line for the throne, as Elric has no male heir. Yyrkoon is a great sorcerer who has made many pacts with unholy forces to obtain his sorcerous strength. As further evidence of his decadent ways, he openly desires his sister Cymoril and intends to make her his wife and Empress if his plans ever reach fruition. A human of the Young Kingdoms. She falls in love with Elric and eventually marries him, for a

time allowing him to experience true love and companionship. For her sake, Elric also gives up his blade Stormbringer and reverts to taking sorcerous herbs to sustain his life. Appearances in other media[ edit ] Comics[ edit ] Conan the Barbarian No. First Comics published several Elric mini-series in the s as well. Elric also appeared in a number of original stories published by DC Comics. In , DC Comics published the four-issue Elric: Craig Russell has drawn comics adaptations of three Moorcock novels: The character has also been adapted by Walter Simonson and Frank Brunner , and by George Freeman and others on the long-running Elric series at Pacific which Russell had co-created. Reportedly tensions between him and Thomas were the reason for his departure. Adam Warlock , under artist Jim Starlin , was influenced by Elric and made into a Marvel Comic version of that superhero , with concepts such as the Soul Gem stealing souls, the introduction of Master Order and Lord Chaos. The premise is similar to the Adam Warlock soul-stealing gems, which may well have borrowed from Elric. This presents a recurrence of Elric and Stormbringer, with a liberal dash of Monsieur Zenith. The series, written by Chris Roberson and drawn by Francesco Biagini, is available in both traditional hard copy and for digital download. Stormbringer, the second volume was published in March by the same team and publisher. Moorcock states that this is his favorite comic adaptation of his Elric stories to date and praises the subtle changes to the original story, saying that he wishes he had made them himself. Moorcock and Hawkwind had, at this stage, collaborated a number of times. An expanded live album, Live Chronicles , was released in This included several spoken-word interludes by author Moorcock in his capacity as on-stage narrator. The live show also included a mime artist portraying Elric himself. The heavy metal band Tygers of Pan Tang take their name from the fictional islands of Pan Tang in the Elric series, where the ruling wizards keep pet tigers. Songs from this release would gain further visibility when they were re-recorded by Metallica. The Italian power metal band Domine has based most of their albums on the Elric saga. The Greek epic metal band Battleroar has written the song "Mourning Sword" on their debut album Battleroar. On their second album, "Age of Chaos", there is a song called "Dyvim Tvar". Film[ edit ] Wendy Pini published a book documenting her attempt to make an animated film project of the Stormbringer series. The book contains original artwork, information on the characters, an overview of the plot, and her personal investment in the project. The film, however, never reached completion. On 29 May , in an interview with Empire magazine , directors Chris and Paul Weitz stated that they are in the process of adapting a trilogy of films based on Elric for Universal Pictures. In Chaosium released Elric! Its main difference was in the way magic through demon summoning was detailed and the allegiance system that saw characters lean either towards law, chaos or the balance, themes that underscored the books. It was later re-published with slight modification as "Stormbringer 5th edition". After a disagreement between Moorcock and Chaosium, the Stormbringer line was discontinued. References in popular culture[ edit ] Television[ edit ] In the Babylon 5 episode " The Geometry of Shadows ", the leader of the Technomage order is named Elric in what Michael Moorcock called "clearly straight homage" [24] to his Elric novels. In the TV series Game of Thrones , when King Joffrey I Baratheon is presented with a new sword at his wedding feast, he asks the crowd what he should name it and someone suggests "Stormbringer". The story was published in the short story collection Smoke and Mirrors. A Novel contains many references to Elric as having influenced one of the main characters. The California-based speed-metal band Cirith Ungol included several Elric-based songs on their albums over the years; moreover, their album covers were often book-cover depictions of Elric by artist Michael Whelan , used with permission. The new wave of British heavy metal band Tygers of Pan Tang are named after a warrior society in the Elric stories. The metal band Grand Magus feature part of the Elric saga in the song "Steel vs. Steel" from the "Triumph and Power" album. At the beginning of , the band Hawkwind recorded the album Warrior on the Edge of Time in collaboration with Michael Moorcock, loosely based on his Eternal Champion figure. Founders Steven and Stewart Wieck were fans of the character, and named their roleplaying game magazine, and later their company, after him. The ZX Spectrum strategy game Chaos:

### 3: Elric at the End of Time (The Elric Saga #7) by Michael Moorcock

*Elric at the End of Time is a crossover between Elric and Moorcock's Second Aether stories. The pseudo-Victorian Second Aether s I enjoy Moorcock and his Elric stories a great deal, but despite the "Seventh Book of Elric of Melnibone" billing on the cover this particular collection is pretty random and weak.*

They include the most powerful gods who are active on Earth at the beginning of the series. Lords of Chaos[ edit ] "Xiombar" redirects here. For the spider, see Xiombar spider. The Chaos Lords have the powers of gods but the behaviour and appearance of demons. When they appear at their worst, they deliberately inflict pain and suffering on mortals for amusement; even at best, they are not concerned with the harmful effects of their creations. The Revenge of the Rose openly portrays Arioch as insane. Sorcerers often gain power by entering into diabolical pacts with Chaos Lords. The Chaos Lords must act under certain limitations. For instance, Arioch must be summoned by Elric before he can manifest on Earth. He is sophisticated and highly intelligent, and he usually appears in an amazingly beautiful form, usually with blond hair. Balan the Grim or Balaan appears briefly as an ally of Arioch. He is referred to as both the lord of destruction and beauty. Checkalakh the Burning God, a minor Chaos Lord made entirely of fire, was once summoned to Nadsokor to burn disease from the city. Like his essence, he is constantly hungry. Hionhurn the Executioner, a giant, green and gnarled like a tree. Mabelode the Faceless is one of the three oldest and most powerful Chaos Lords. He appears with his face in shadow. Malak appears briefly as an ally of Arioch. Mashabak is a rival to Arioch in The Revenge of the Rose. Count Mashabak is brutal and direct, less subtle than Arioch. Narjhan, a rider in black armour whose voice echoes hollowly in his helm, who leads a force of beggars from Nadsokor against Tanelorn. Orunlu the Keeper is a purple-scaled giant with a fiery aura. Pyaray, the Tentacled Whisperer of Impossible Secrets, appears as a giant red octopus. His soul is kept in a blue crystal on his head. Sailors who drown at sea are taken into his Chaos Fleet. One portent of the end of the world is the ascent of the Chaos Fleet to the surface. Slortar the Old, the oldest Chaos Lord, appears as a slim and beautiful youth. Vezhan appears as a smoky yellow, winged humanoid; at one time he was a patron of Rackhir, a Warrior Priest of Phum. Xiombar prefers to appear as a beautiful young woman but is sometimes referred to with the male pronoun making a pun of her title Queen of the Swords. She is prone to shapeshifting and carries a giant sword. In Stormbringer, she rides a creature with the head of a lion and the body of a bull chimeras are typical creations of Chaos. Balo, the Jester to the Court of Chaos, is able to move at will between the realms of Chaos and Law because he is not exactly a Chaos Lord. His function at court is to amuse and baffle the Lords of the Higher Worlds. At one point, he tries to convert Earth into his own Realm of Paradox. The stories are set in a cosmic cycle when Chaos is most powerful. When they appear, the Lords of Law are usually more benevolent than the Chaos Lords, who are seductive but also sinister and prone to losing their temper. Donblas the Justice Maker is the spokesman and apparent leader of the White Lords. Miggea is a female Lord of Law who goes mad. Arkyn appears in the Corum cycle, but as the deities in the Elric and Corum cycles are essentially the same then it can be presumed that Arkyn is also a member of the White Lords. He assists Corum many times before the destruction of the Gods by Kwll. Shalod is mentioned briefly in the Corum cycle following the defeat of Queen Xiombar. Just as Arkyn, he can be presumed to be a member of the White Lords. The Lords of the Inquisition[ edit ] The Lords of the Inquisition appear in the story "To Rescue Tanelorn," where it is said that they "are pledged neither to Law nor to Chaos but will sometimes help either side if the whim takes them. These purposefully neutral gods are gods of the Balance and caretakers of Tanelorn , the city of the Balance. The Dead Gods made a book aptly called "The Dead Gods Book" which supposedly contained the sum of all knowledge, however over time the book disintegrated into dust. The Dead Gods despite their name did not die but merely left the world because of the fear of Stormbringer and Mournblade which had the power to slay them. The Dead Gods appear to have a chaotic bent as they sided with the Lords of Chaos, however this may be because they assumed the Lords of Chaos would defeat the Lords of Law. Darnizhaan was a member of the Dead Gods, possibly their leader. Darnizhaan appeared as a huge man-like figure with the head of an ape. When Elric calls upon them for aid, some appear in person, while others help by influencing mortal

creatures of their type. This literature-related list is incomplete ; you can help by expanding it. Meerclar, Mistress of Cats.

Later novels by Moorcock mark Elric as a facet of the Eternal Champion. The novels have been continuously in print since the s. Physically weak and frail, the albino Elric must take drugsâ€”later retconned to mean special herbsâ€”to maintain his health. Unlike most others of his race, Elric possesses something of a conscience; he sees the decadence of his culture, and worries about the rise of the Young Kingdoms, populated by humans as Melniboneans do not consider themselves such and the threat they pose to his empire. From the first story onwards, Elric is shown using ancient pacts and agreements with not only Arioch but various other beingsâ€”some gods, some demonsâ€”to assist him in accomplishing his tasks. The sword confers upon Elric strength, health and fighting prowess but must be fed by the souls of those struck with the black blade. But oddly, the Kalevala was read to us at my boarding school when I was about seven. In fact it was a friend who found it under lock and key and got a copy of it to Savoy who are, at last, about to reprint it! For the rest of the character, his ambiguities in particular, I based him on myself at the age I was when I created Elric, which was 20" [11] The influence of Zenith on Elric is often cited in discussions of Zenith e. Oct 5, Reputation: Most people are incubated rather than born. Everyone wears reality warping rings with which they manipulate their surroundings to their will more on those below. An Alien Heat said: The cycle of the Earth indeed, the universe, if the truth had been known was nearing its end and the human race had at last ceased to take itself seriously. Having inherited millennia of scientific and technological knowledge it used this knowledge to indulge its richest fantasies to play immense imaginative games, to relax and create beautiful monstrosities. After all, there was little else left to do. An earlier age might have been horrified at what it would have judged a waste of resources, an appalling extravagance in the uses to which materials and energies were put. An earlier age would have seen the inhabitants of this world as "decadent" or "amoral," to say the least. But even if these inhabitants were not conscious of the fact that they lived at the end of time some unconscious knowledge informed their attitudes and made them lose interest in ideals, creeds, philosophies and the conflicts to which such things give rise. They found pleasure in paradox, aesthetics and baroque wit; if they had a philosophy, then it was a philosophy of taste, of sensuality. Most of the old emotions had atrophied, meant little to them. They had rivalry without jealousy, affection without lust, malice without rage, kindness without pity. Their schemes – often grandiose and perverse – were pursued without obsession and left uncompleted without regret, for death was rare and life might cease only when Earth herself died. Examples of shenanigans that the end time humans get up to, and the technology involved to do this. An Alien Heart said: Do you remember how we laughed when it fell on us? The surrounding landscape had been designed to fit in with the ranch. The sky contained a sunset, which silhouetted the purple hills, and the black pines, which topped them. On the other side was a range containing a herd of bison. Every few days there would emerge from a cunningly hidden opening in the ground a group of mechanical 7th cavalymen who would whoop and shout and ride round and round the bison shooting their arrows into the air before roping and branding the beasts. The 7th cavalry, on the other hand, had been manufactured in his machine shop because he had a distaste for growing people who were inclined to be bad-mannered when the time came for their dissemination. Lord Jagged atomizes a stuffed mammoth and remakes it as his attire it takes. How clever of you to pick that. Lord Jagged had invented a perfect facsimile of the Solar System and had played out every war on it he had ever heard of. Each soldier had been complete in every detail, though of submicroscopic proportions. The entire set had been built into a cube measuring just over two feet square. Iron Orchid uses her ring to atomize a sandwich. With a wave of the ring on her left hand she disseminated the lunch and watched the dust drift away on the air. My Lady Charlolina freezes Yursharisp with a wave of her hand and disintegrates his spaceship with the other. Regretfully Lady Charlolina gestured with one hand and froze the alien while with the other hand she disseminated his spaceship. Disseminate not only means atomise, but spread all over the planet. Amelia Underwood completely and irrevocably. It was unlikely that My Lady Charlolina would have gone that far – but it was possible. In that case Mrs. Underwood might be gone forever. She could not be resurrected if every single atom of her being had been broken down and spread across the face of the Earth. People can change their forms with technology possibly just with their rings at will. Even though he no longer had six arms, he still felt a certain amount of resentment about the way he had been altered, never having the same limbs or the same head, even, from one day to the next. Some of the skies were still being completed, while others were being dismantled as their creators wearied of them. They can create force fields. Almost immediately a force dome appeared over the castle and its environs. It turned the falling rain to steam. People can die and be remade at will. Still, we

have all of us died so many times and been recreated so many times that the thrill is gone. For them especially the heavy folk of the Four Year Empire it was an experience they could have only three or four times at most before their systems gave out. They no longer have any diseases of their own, and the diseases in Mongroves menagerie comes from across time from millions of years in the past and across the universe. Others come from all over the universe. We have missed a lot, you know, my friends, by not having diseases of our own. Also, they can move entire lakes. Her territory of Below-the-Lake was not merely subterranean, it was subaqueous, too, in the truest sense. It was made up of mile upon mile of high, muggy caverns linked by tunnels and smaller caves, into which one might put whole cities and towns without difficulty. My Lady Charlolina had hollowed the whole place out herself, many years before, under the bed and following the contours of one of the few permanent lakes left on the planet. This lake was, of course, Lake Billy the Kid. Lake Billy the Kid was named after the legendary American explorer, astronaut and bon-vivant, who had been crucified around the year because it was discovered that he possessed the hindquarters of a goat. Lake Billy the Kid was perhaps the most ancient landmark in the world. It had been moved only twice in the past fifty thousand years. The restructuring of one's one and other people's bodies is possible with the rings. Jherek could see why Mongrove had seen a fellow spirit in Yusharisp. They would get on splendidly. Upon the woman who has imprisoned you here. Where will you take, skree, me? He sympathises with your plight. He wishes to listen to all you have to say. He is perhaps the one person on the planet apart, of course, from myself who really understands what you are trying to do. On top of changing something's shape, the rings can also move objects. The clothes at her feet rose into the air, altering shape and colour until they, too, drifted to the ottoman. Jherek creates an enlarged version of Lake Thirlmere that stretches 50 miles in all directions, but Mrs Amelia Underwood is displeased with it so he destroys it. She described the English Lake District to him and he built her fells and lakes to her specifications, but she was never really happy with the environment. Carnelian," she explained, studying a copy of Lake Thirlmere which stretched for fifty miles in all directions. Time travellers can travel millions of years through time. Carnelian had been right in one thing all her friends, her relatives and, naturally, Mr. Underwood, her whole society, the British Empire itself unbelievable thought that was! However, due to the Morphail Effect, those who travel to the future or who are from the future cannot remain permanently in the past. An Alien Heat said: Visitors from the future cannot exist in the past. The traffic, is, effectively, one-way. That is the Morphail Effect. And he came to Lake Billy the Kid, all serene and dancing in the sunlight, and he had a mind to destroy the Lake and Under-the-Lake and My Lady Charlolina and her menagerie and her caverns to destroy the whole globe if need be. But he contained his rage, for Mrs. Amelia Underwood might even now be a prisoner in one of those caverns. Where does all this power come from? From the energy banks of a previous age, when entire star systems were turned to energy to power Earth's machines. They puffed over the old cities which nobody used any more, but which were not destroyed because the sources of many forms of energy were still stored there the energy in particular, which powered the rings everyone wore. Once whole star systems had been converted to store the energy banks of Earth, during the manic Engineering Millennium, when everyone, it appeared, had devoted themselves to that single purpose. Another former civilization of humanity ruled over 40 planets for years. This is the Guinness, or ruler, himself. An incomplete list of civilizations that resided on Earth, including planet-builders. Not human technology, but Yursharisp an alien traveled millions of light years in thousands of years.
