

1: Microsoft Evaluation Center

Fill out this simple form to download ER/Studio Data Architect for free. This trial lets you see how to better manage data models in complex environments.

A baseline license provides basic feature support for the product. In addition, incremental licenses may be required to support specific DBMS platforms, product add-ons or other functions. A license for a day, full-featured trial version of the product. The trial license must be registered before you can use the product. A license or set of licenses that is tied to a particular workstation. If licensee has purchased a single seat license, licensee may install the product on one computer for being used by one end user. Networked licenses are administered and distributed by a central license server, AppWave Enterprise License Center. There are two types of networked licenses: Users on different machines take turns using licenses from a shared pool. Networked Named User licensing: Those users are guaranteed to have licenses available any time. For more information, see Registering a Networked License. Note that version There is no need to go to the Maintenance Portal. Obtain your serial numbers from the Maintenance Portal. Provide serial numbers to your end users, and they will install and activate The updated license will include the End users need a new slip file from the license server administrator. Obtain your certificates from the Maintenance Portal. Your license server administrator must host them and send end users a new slip file. Ask your license server administrator to host the new license certificates. If you encounter a discrepancy with license counts or have issues retrieving your licenses, please submit a Support request. These instructions also apply if you have purchased a product and received a serial number prior to running the application for the first time, or if the trial period has expired. Copy the serial number from the e-mail, and then paste it into the Serial Number field. The activation file should be downloaded and installed automatically. If this does not happen, click the Trouble Connecting? Try Web Registration link in the license registration dialog and follow the prompts. Registering a Workstation License after Application Startup The following instructions assume that you have received a workstation license by e-mail and that you currently have a valid trial license. If you did not install a trial version or if the trial period has expired, follow the instructions in Registering a Trial or Workstation License at Application Startup instead. Expand Unregistered Serial Numbers item, right-click the serial number just added, and then click Register. The activation file should download and install automatically. Try Web Registration link and follow the prompts. Closed Network Registration To register your product on a closed network machine please follow these steps: Enter the product serial number and the registration code from your workstation. Click Next and then select Download and click on the Register button. Save the registration file and transfer the registration file to the closed network workstation. Click Browse and navigate to the registration file. Then click on Import. Registering a Networked License If your organization uses networked licensing, a license administrator, department head, or someone providing a similar function, needs to provide you with a. Point to that license file in the Product Registration Window that appears when you launch the product. You can also import your license through the License Manager In case you already have another license registered.

2: All App Development and Database Products - Embarcadero
