Email Copy Link Copied In , a little movie called "Night of the Living Dead" hit movie theaters and forever changed the world of horror. The film was an instant classic and ingrained itself heavily into American pop culture and the affect the film had on the genre can still be felt today. Much of that has to do with the story, a true horror classic that pulls no punches and absolutely no one gets a happy, Hollywood ending. Almost 40 years later the film is still relevant, with an ending that packs a wallop. The film was co-written by John A. Russo and George A. Romero. Since then both men went their separate ways, with Romero following-up "Night of the Living Dead" with films like "Dawn of the Dead" and "Day of the Dead. Russo was happy to help, so they did an agreement which gave Romero the right to do "Dawn of the Dead" and to call it a sequel. Much like the other films, they all reference a common thread that at some point there was a zombie uprising, but none of the films are really direct sequels to the original. The person who went for the rifle turns out to be the headman, Dr. Blalock. They follow it until the truck breaks down and kill the driver and other guy in the cab. Of course, the first place they attack is the roadhouse and the mother and daughter, when they come back from horse back riding, they get attacked. We caught up with Wolf and asked him to share a bit about his own history with horror, as well as what it means to be working with a horror visionary like Russo. With the purchase in of my first issue of Famous Monsters Of Filmland, my life-long research into the world of horror began. Utilizing magazines and after-school viewings of Dialing-For-Dollars movies, I retained every bit of horror knowledge that my 8 year-old mind could contain, but one movie eluded my "seen it" list. Word-of-mouth on the playground had done its job to make me too damn scared to see "Night Of The Living Dead. The 4th grade horror movie connoisseur. And Dheeraj has done a fantastic job of bringing the project to life with a shocking realism that leaves nothing to the imagination. This is classic horror with a modern sensibility. An officer told me over the phone that when the Sheriff heard what we were working on, he instructed the officer to give me whatever I wanted. They get to the roadhouse where they capture the girl and her father, taking the girl with them eventually and leaving the father to die. Wolf], so we ended up doing that, which was a mess. I did the novel based on that story. William read it and liked it a lot, as did the artist he showed it to, and within a week or two we had a deal. I write novels and screenplays. This is different than all that stuff. So, the stations kind of tabled it. We were close to a deal with Elektra Records here in the States, but the guy who was fronting the deal, well, I think he turned out to be some sort of mobster because all of a sudden he was gone and his apartment was cleaned out. Nobody would talk about it. They liked me and they gave one of the bodyguards, Tony Dino, a copy of the novel and then he and Joey Rizzo took it to Frank or his lawyer, Mickey Rudin, and then they decided to back it," explained Russo. We were put up in the Sinatra wing, we had front row seats to the show and were invited to the opening night party. So, the deal just evaporated at that point. The past five years or so have seen a plethora of new horror films and the resurgence of the genre in comics has been well documented. But Russo maintains that the public never loses interest in the genre, just Hollywood. They think they have to make horror films or science fiction films with huge budgets and end up losing sight of the atavistic terror and storytelling that people want. It never goes away entirely because you can still tell a good horror story on a small budget, but it does go in cycles.
