And there you have it. A connection to Johnson and Mies is now present in Balboa Park -- further legitimizing one of the most outstanding, public, examples of post-War modernist architecture in the region: The Timken Museum of Art. Following Walter Ames securing financial support from the Timken family to help build the museum, the firm of Frank L. Hope and Associates was hired to design and build the museum. At the time, the firm was going through a growth spurt -- hiring beyond the first dozen employees, several of whom had worked for Hope for decades. Hope was born in San Bernadino. The post-war building boom proved successful for Hope and his colleagues -- the expansion included his son Frank L. Following a stint with Victor Gruen and Associates, the U. Starting off in the Hope office as a draftsman in , Mock would soon be elevated within the expanding firm to designer, to spec writer and ultimately Quality Control Director. Prior to leaving Frank L. Hope and Associates, just as the Home Economy Building was being demolished, to start his own firm, John Mock was a member of the design team deployed to build something special for the Putnams, The Timkens, and San Diego. It was my concept of its design and importantly how it was to function. During this initial phase John recently recollected meeting with Paul McKim who, at the time, was working for Mosher and Drew on their designs for the Fine Arts Gallery another light, see-through building to the West. A building you can clearly see from within the Timken, not to mention the lily pond to the East of the Timken. While the exterior lighting program is in need of restoration -- a project Director John Wilson is excited to launch -- its rebirth is highly anticipated. Wilson commented recently that even lighting professionals, while in San Diego for professional conferences, could, in addition to the myriad of students drawing and photographing the Timken, use it as a successful site to consider the short history of their design profession. I think John Dale was Job Captain. I wrote the Specs before I left, since I had recommended Travertine and Bronze as the Classical and durable materials most fitting for use. A lot of technical research was done. No building in San Diego made use of these materials at the time. If one were to survey architectural styles, themes, and how designers articulated a variety of programs, they would likely conclude very little of the harmony that is often bandied about. Certainly the Timken and Fine Arts Gallery are the best evidence of s modernity proffered by some of the best talent San Diego had to offer at the time. And to say that any of these buildings are the stripped down ornament-free ideas that modernists desired, is also false. The Fine Arts Gallery is heavily decorated -- the fascia motif, stylized columns and bronze garden gates are all by sculptor Malcolm Leland. One of the most striking juxtapositions of the Timken Museum of Art is the romantic historicism evident on the interior walls. The symmetry, balance and palette of materials travertine, bronze, steel and glass allows a stage to be set for the onlooker unlike any other structure in the park.

The collection also includes the only Rembrandt painting on public display in San Diego. Considered one of the finest small museums in the world, the Timken Museum of Art, which celebrates its 50th anniversary in , provides visitors with an accessible and enriching cultural experience featuring a beautiful collection, intimate surroundings and perennially free admission. The museum is open from 10 a. Tuesday through Saturday and Sundays It is closed on Mondays and all major holidays. For more information visit timkenmuseum.com. The institution was named the Timken Art Gallery now the Timken Museum of Art because of the very generous contributions the Timken family had made to the cultural life of San Diego. In , the paintings were reunited, and hung in their new permanent quarters at the Timken. The works in the Putnam Foundation Collection are primarily in three distinct areas: Each collection boasts unique and priceless representations of the specific genre. The museum is closed Monday. Admission is always free. Architecture Second most important mid-century building of Balboa Park. The first is that it continues a structure in Balboa Park. The dominant architectural in the foyer consciously echoing a similar cast style in was revival: Garden courts it is natural to find Spanish Revival. The Timken is all the more significant for being designed by a local architect. Kelly, who was favored by architects deco in form. So the creation of a mid-century modern, International Style, museum in , especially in Southern California, should come as a logical progression. With the help of longtime friend and for filtered sunlight to bathe the masterpieces up to that time. During mid- benefit, pleasure and inspiration of the citizens became part of the Putnam Foundation summer there is often no need for artificial of San Diego and visitors to the city. After Ames secured financial lights in the galleries. Hope and Associates, the largest of its kind in the region, was hired to design and build a museum to display the collection in San Diego in perpetuity. A special feature of the museum is the significant collection of Russian icons, many from the Moscow and Novgorod Schools, ranging from the fifteenth to the nineteenth century. The foyer is adorned with Parisian seventeenth century tapestries illustrating the Stories of Queen Artemisia. Our Lady of Jerusalem 17th century, Moscow School The Savior Enthroned 15th century, Novgorod School Help it thrive by becoming a member at:

The collection also includes the only Rembrandt painting on public display in San Diego. Considered one of the finest small museums in the world, the Timken Museum of Art, which celebrates its 50th anniversary in , provides visitors with an accessible and enriching cultural experience featuring a beautiful collection, and intimate surroundings. The institution first opened its doors to the public in October . The institution was named the Timken Art Gallery now the Timken Museum of Art because of the very generous contributions the Timken family had made to the cultural life of San Diego. In , the paintings were reunited, and hung in their new permanent quarters at the Timken. The works in the Putnam Foundation Collection are primarily in three distinct areas: European old master paintings, 18th and 19th-century American art, and Russian icons. Each collection boasts unique and priceless representations of the specific genre. The museum is closed Monday. Admission is always free. That structure, the Home Economy Building designed by architect Carleton Winslow, was demolished in . The Timken is all the more significant for being designed by a local architect. The groundwork for the museum began in . With the help of longtime friend and lawyer Walter Ames, the sisters Amy and Anne Putnam established the nonprofit Putnam Foundation, under which any art acquired became part of the Putnam Foundation Collection. After Ames secured financial support from the Timken family and its foundation, the firm of Frank L. Hope and Associates, the largest of its kind in the region, was hired to design and build a museum to display the collection in San Diego in perpetuity. The symmetry, balance and palette of materials travertine, bronze and glass set the stage for an experience unlike any other structure in Balboa Park. During mid-summer there is often no need for artificial lights in the galleries. According to experts, the Timken represents some of the best evidence of s modernity by some of the best talent San Diego had to offer. Two other points should be remembered when considering the Timken building in the context of Balboa Park. The first is that it continues a trend of building structures of contemporary design in the park. The dominant architectural style in was revival: Twenty years later there was a trend toward modernist designs and the buildings created for the Exposition, such as the Ford Building now the San Diego Air and Space Museum are art deco in form. So the creation of a mid-century modern, International Style, museum in , especially in Southern California, should come as a logical progression. The second point is that the Timken was the most expensive building erected in San Diego up to that time. The benefactors were proud that not only was no expense spared, but that on completion it was given to the city for the benefit, pleasure and inspiration of the citizens of San Diego and visitors to the city. The building and its contents are available free to everyone. A special feature of the museum is the significant collection of Russian icons, many from the Moscow and Novgorod Schools, ranging from the fifteenth to the nineteenth century. The foyer is adorned with Parisian seventeenth century tapestries illustrating the Stories of Queen Artemisia. Thomas Gage, Oil on canvas, x Elizabeth, Oil on canvas,

4: Formats and Editions of European paintings in the Timken Art Gallery. [www.enganchecubano.com]

This painting of the parable of the sower from the Gospels of Matthew, Mark, and Luke is among the earliest signed paintings by Pieter Bruegel the Elder, one of the geniuses of Northern European painting.

Enlarge Description This painting of the parable of the sower from the Gospels of Matthew, Mark, and Luke is among the earliest signed paintings by Pieter Bruegel the Elder, one of the geniuses of Northern European painting. A lone peasant in the left foreground scatters seeds on an upland pasture. The seeds he has already sown have multiplied in the fields below him to the right and in the middle distance. Across the river, a small crowd gathers to hear Jesus preaching. Bruegel left Antwerp in to study in Italy, and on his return made drawings of the Alps, which influenced the detail and aerial perspective of the landscape in this painting. It was then catalogued simply as Flemish school, seventeenth century. In December of that year, when it was cleaned by the elder Mr. Buesco, conservator for the Belgian royal family, the signature and date were revealed. It was then shown in San Francisco and Washington, D. By Leo van Puyvelde, p. Berlin and Leiden, , Der Maler in seiner Zeit Erlenbach, , p. The Paintings London, , pp. Delevoy, Bruegel Geneva, , p. Marijnissen, Bruegel Brussels, , pp. Seidel, Bruegel New York, , p. Complete Edition of the Paintings, 3d ed. London, , p. Gibson, Bruegel New York, , pp. Every Painting New York, , pp. Gibson, "Mirror of the Earth":
