Rated 5 out of 5 by kerith90angel from Mysteries of the Mind: I wish they would make another. Everything about this game works. The graphics are gorgeous and the storyline is a blast. You are in a coma and changing the fate of different storylines. The game plays in segments like Redemption Cemetary which is such a blast!! The cut scenes can be skipped, but I rather enjoyed them in this game which is rare for me. The hint button is exactly what I would love to see more games do; you not only can get hints but should you get lost on your way, it will throw up a picture and you just click on the picture and your there. The skip button on games was there from the start, which is another touch I wish more games had. The story line of the game was clean and well thought out, as was the words of encouragement along the way. There are lots of hidden object scenes, and things to put together to make it to the next clue. I overall found this game to be a very delightful and entertaining. You are in a coma and have a second change to right the wrongs and rid yourself of the guilt of the past. Hint - Recharges fairly quickly. Acts as a transporter to other locations. Shows inventory items needed for a particular area. Inventory - Items collected used quickly in other locations. Puzzles - Varied levels of difficulty. Bonus Play - To me, nothing extra, more of a conclusion to the story. Aside from that last line LOL , a very beautiful game. Within the game, Mysteries of the Mind: It took me several hours to finish it as I only play about an hour or two at a time, but I felt like it was worth the purchase. Had to have a little help figuring out some of the puzzles at the start. A good introduction to HO type games. That hour went by so fast. The game starts off great You get to use objects within objects, which is always fun. I can hardly wait to resume playing it! The story was great and was different then the usual which I really enjoyed. Five stars on coming up with something unique!! The graphics were good and voice overs very nice. I hope this developer does more of the same as I would definitely purchase them!!

2: 26 Experts Reveal Secrets of the Subconscious Mind That Most People Don't Know

Mysteries of the Mind is a unique talk-radio program. Alex Merklinger and his guests will inspire you to explore: the arcane secrets of many cultures, spiritualism, cosmology, UFOs, spiritual healing, alternative medical practices, crop circles, current political and economic agendas, personal growth and success techniques, Earth changes.

This is the nature of automatization. As you experience things and learn how to do things, these processes become integrated subconsciously, which allows you to focus on other things. Significantly, your subconscious contains various beliefs and assessments about yourself that are mostly generated during childhood in the midst of many potentially traumatizing experiences, which sacrificed vital needs. Such disconnection can manifest in many ways, including reliving or reenacting aspects of early traumas, subconsciously trying to normalize them or somehow resolve them. Mostly subconscious defense mechanisms such as dissociation, repression, rationalization, and denial hinder conscious practices of being honest, transparent, and vulnerable that foster intimate connection, enriching relationships, and happiness. So, as Nathaniel Branden noted, self-concept is destiny, which is why raising your awareness about developmental experiences and being attuned to your subconscious processes is. Do you know the difference between your Conscious versus your Subconscious mind? Of course there is far more to it than that. She might go home and start to search for answers about what the difference between the conscious and subconscious might be. One of the things she might be surprised to learn is that in the view of many teachers, the subconscious mind is the creative medium from which all results spring. To use an analogy, we can view a garden plot "the dug up earth in your backyard" as the subconscious mind. In it you will plant a seed, and a corresponding plant will grow. You cover the seed, water it, nurture it, and somewhere under the soil, a wonderful thing begins to happen. The wonderful earth reacts with the seed, and with the continued encouragement of the gardener through watering and ensuring that the seed does not get dug up or otherwise disturbed, behold! A little seedling pops out of the soil, reaching for the sun! Is that not a miracle? Is that not one of the most wonderful examples that we are given to illustrate how our subconscious works? Your readers may or may not agree, but it rang true for me. This, he emphasized more than once! Human beings are built so that in order to create a new human, the male conscious has to plant the seed idea somewhere, right? After that seed is planted, the subconscious cannot help but produce what was planted unless something interferes with the process. You do not have to know how it will bring forth the result. And, in fact, you should not try to educate it or force it to create something in a certain way. Using the analogy of the garden. If you plant a seed, should you try to alter the earth or tell it how to do its job? Maybe sit there for a few hours making a few suggestions on how it should react with the seed? Of, if you are looking towards bringing a human life into this world, and the mother is now carrying this little human-in-the-making, can you talk to her body and tell it how it should form, feed, and protect the growing baby? How ridiculous that sounds! Actually, anyone who would suggest such a thing would just sound like an idiot. No one who knows anything about how babies are formed within the womb would dare to suggest that he or she has a better way. When it comes to the subconscious, its ways are beyond knowing. It is not our job to figure out how. Our job, using our conscious minds, is to figure out what we want, and to plant that seed firmly into the subconscious mind, nurture the idea, and allow the subconscious to get to work creating it.

Coma is rated 3. Rated 5 out of 5 by HappyMommy from WOW this was a wonderful game with a strong storyline that flowed well and in a way I related to it which made my connection to the game stronger. Fortunately, this HO game is easy-play and easily navigated. The graphics are great. Well composed and drafted. Nice work Date published: COMA- Wish all games were like this! Review based on completion of the Collectors Edition. This game has to be my favorite. Redemption Cemetaryseries, Reincarnation series and House of doors series. If you like perfect graphics and games where it ALL works The people involved do not know how to tell an interesting story and throw scary stuff at us to keep us interested. Well, these people KNOW how to tell a story. Just a small personal story, no spooky stuff. Just a sad tale, with redemption at the end. And it moves us. The gameplay moves easily enough, and the puzzles are neither too difficult nor too easy, and the HOS are OK. It is refreshing to play a game without monsters, spooks, ghosts and etc. I slowed down on purchasing games because of that fact. Mysteries of the Mind: Coma is a refreshing and fun game to play!!!! I saved soles and myself, brought my parents back together. I think this game is worth a try. I thought this was a fun, exciting and adventurous game. I really had the sense I was in a dream. The cut-scenes had that same affect. The story line was interesting dealing with making right the transgressions of dead family members. Story length was about six hours for me as I am not an advanced player. Standard Hidden Objects scenes with objects easy to find. Puzzles were designed to create some thought. I really like that. Game would have benefited with a jump map. However, the backtracking was not tedious since the hint button will take you to the next task location. I really enjoyed this game. Great fun for a rainy weekend. Loved the voice over. Great music and graphics. Not a difficult game. Excellent storyline, as this person gets another chance to do so.
