2: History of the United States - Wikipedia

Rare separately published map of Missouri by Fiala and Haren, published in St. Louis by James M. Crawford. The map is hand colored by counties and subdivided by townships, with an extensive explanation of symbols at the bottom left corner.

Native Americans in the United States This map shows the approximate location of the ice-free corridor and specific Paleoindian sites Clovis theory. It is not definitively known how or when the Native Americans first settled the Americas and the present-day United States. The prevailing theory proposes that people migrated from Eurasia across Beringia , a land bridge that connected Siberia to present-day Alaska during the Ice Age , and then spread southward throughout the Americas. The pre-Columbian era incorporates all period subdivisions in the history and prehistory of the Americas before the appearance of significant European influences on the American continents, spanning the time of the original settlement in the Upper Paleolithic period to European colonization during the early modern period. Native American cultures are not normally included in characterizations of advanced stone age cultures as " Neolithic ," which is a category that more often includes only the cultures in Eurasia, Africa, and other regions. They divided the archaeological record in the Americas into five phases; [3] see Archaeology of the Americas. The Clovis culture , a megafauna hunting culture, is primarily identified by use of fluted spear points. Artifacts from this culture were first excavated in near Clovis, New Mexico. The culture is identified by the distinctive Clovis point , a flaked flint spear-point with a notched flute, by which it was inserted into a shaft. Dating of Clovis materials has been by association with animal bones and by the use of carbon dating methods. Recent reexaminations of Clovis materials using improved carbon-dating methods produced results of 11, and 10, radiocarbon years B. According to the oral histories of many of the indigenous peoples of the Americas, they have been living on this continent since their genesis, described by a wide range of traditional creation stories. Other tribes have stories that recount migrations across long tracts of land and a great river, believed to be the Mississippi River. Archeological and linguistic data has enabled scholars to discover some of the migrations within the Americas. A Folsom point for a spear. The Folsom Tradition was characterized by use of Folsom points as projectile tips, and activities known from kill sites, where slaughter and butchering of bison took place. Linguists, anthropologists and archeologists believe their ancestors comprised a separate migration into North America, later than the first Paleo-Indians. They were the earliest ancestors of the Athabascan - speaking peoples, including the present-day and historical Navajo and Apache. They constructed large multi-family dwellings in their villages, which were used seasonally. People did not live there year-round, but for the summer to hunt and fish, and to gather food supplies for the winter. Since the s, archeologists have explored and dated eleven Middle Archaic sites in present-day Louisiana and Florida at which early cultures built complexes with multiple earthwork mounds ; they were societies of hunter-gatherers rather than the settled agriculturalists believed necessary according to the theory of Neolithic Revolution to sustain such large villages over long periods. Poverty Point is a 1 square mile 2. Artifacts show the people traded with other Native Americans located from Georgia to the Great Lakes region. This is one among numerous mound sites of complex indigenous cultures throughout the Mississippi and Ohio valleys. They were one of several succeeding cultures often referred to as mound builders. The term "Woodland" was coined in the s and refers to prehistoric sites dated between the Archaic period and the Mississippian cultures. The Hopewell tradition is the term for the common aspects of the Native American culture that flourished along rivers in the northeastern and midwestern United States from BCE to CE. At its greatest extent, the Hopewell exchange system ran from the Southeastern United States into the southeastern Canadian shores of Lake Ontario. Within this area, societies participated in a high degree of exchange; most activity was conducted along the waterways that served as their major transportation routes. The Hopewell exchange system traded materials from all over the United States. The indigenous peoples of the Pacific Northwest Coast were of many nations and tribal

affiliations, each with distinctive cultural and political identities, but they shared certain beliefs, traditions and practices, such as the centrality of salmon as a resource and spiritual symbol. Their gift-giving feast, potlatch, is a highly complex event where people gather in order to commemorate special events such as the raising of a Totem pole or the appointment or election of a new chief. The most famous artistic feature of the culture is the Totem pole, with carvings of animals and other characters to commemorate cultural beliefs, legends, and notable events. It was built by the Adena culture. The Adena culture refers to what were probably a number of related Native American societies sharing a burial complex and ceremonial system. A map showing the extent of the Coles Creek cultural period and some important sites. The Coles Creek culture is an indigenous development of the Lower Mississippi Valley that took place between the terminal Woodland period and the later Plaquemine culture period. The period is marked by the increased use of flat-topped platform mounds arranged around central plazas, more complex political institutions, and a subsistence strategy still grounded in the Eastern Agricultural Complex and hunting rather than on the maize plant as would happen in the succeeding Plaquemine Mississippian period. The culture was originally defined by the unique decoration on grog-tempered ceramic ware by James A. Ford after his investigations at the Mazique Archeological Site. He had studied both the Mazique and Coles Creek Sites, and almost went with the Mazique culture, but decided on the less historically involved sites name. It is ancestral to the Plaquemine culture. The Hohokam was a culture centered along American Southwest. They raised corn, squash and beans. The communities were located near good arable land, with dry farming common in the earlier years of this period. The Classical period of the culture saw the rise in architecture and ceramics. Buildings were grouped into walled compounds, as well as earthen platform mounds. Platform mounds were built along river as well as irrigation canal systems, suggesting these sites were administrative centers allocating water and coordinating canal labor. Polychrome pottery appeared, and inhumation burial replaced cremation. Trade included that of shells and other exotics. Social and climatic factors led to a decline and abandonment of the area after A. Ancestral Puebloan archeological sites.

Wall Maps Perfect in any size, for any location. Our wall maps cover every part of the world, both standard and custom. We have a variety of sizes, including 24x36 inches, 36x48 inches, 48x64 inches, 60x80 inches, 72x96 inches, and x inches. All of our maps are both elegant and relevant, making them perfect for decorative display as well as reference. Laminated Maps Now, write on them All of our wall maps are protected! They are laminated on both sides using the highest quality 3 mil hot process. Lamination is available in all sizes, up to 9 by 12 feet and larger! Use your dry erase markers and Mark-It Dots directly on the wall map! Wooden Rails Add a warm, classic look to your wall maps! Wooden Rails are the perfect accessory for adding a warm, classic look to your Wall Map. A solid cherry-stained wooden rail is soundly attached to the top and bottom of your map. A rugged cord makes it easy to hang and to proudly display your Wall Map! Wooden Rails can be added to your map for very little cost. Mounted Maps offer a professional and decorative wall map display. They are protected with a quality lamination for long term use. You can also write on these mounted maps. Magnetic Wall Maps are useful planning and tracking tools. Use magnetic markers and symbols to track customers, delivery points, service centers and much more. Protected in a soft line black plastic frame. Spring Roller Maps take the convenience of a Wall Map a step further. The map stays readily accessible - no more hunting around in storage rooms to find it. Conveniently display the map you need Perfect for the classroom or office, Spring Roller Valances can hold up to 5 maps for easy display of each map. Spring Roller Valances are available in custom sizes to suit your exact needs. Digital Maps Our Maps, now just a click away! With our digital maps, you can view a full wall map right from your computer screen! By using our maps electronically, you can pan, zoom, and view a portion of your wall map, all just a click away. You can even print sections of your digital map, making it the perfect portable reference for any occasion. Map Books An easy, sleek way to carry your map with you. Use it as a reference to the Wall Map you just charted your next route on. Stick to the classic. Free shipping applies to prepaid US orders only. Invoiced orders and international orders are subject to freight charges. Now you can download instantly upon completing "YOUR" order!
