

1: Fleet & Driver Safety Solutions | GPSTrackIt

Fleet and Driver Safety For fleets, staying safe means more than reducing personal injury and vehicle damage. It's essential to choose a partner who understands that safety behind the wheel means an improvement in fuel economy, company reputation, and clean motor vehicle licenses for your drivers.

In particular, reducing preventable crash rates with the associated repair, downtime, and liability costs. For those fleets that are not self-insured, lowering crash rates has a direct impact on lowering insurance costs. Why Choose PDE Our senior staff has over 25 years experience in road safety, and each of our programs has been developed with the benefit of this experience in mind. We cater to any size organization and most industries. Training is completed on site and with company vehicles, so drivers are assessed in familiar surroundings. Pacific Driver Education " providing low-risk driver training for experienced drivers. Contact us for our full list of driver training solutions. Pacific Driver Education can help you manage that risk with professional classroom and in-vehicle training. We are already working with a variety of corporations in the Portland area and have a team of DMV-certified and ODOT-approved instructors to help your employees improve their safety on the road. Our Fleet driver safety training programs can help you in a variety of ways: It should be thorough, reaching each employee who gets behind the wheel. And the commitment has to start at the top. Identify all of your drivers. Businesses may not be aware of the full extent of their non-owned vehicle exposure. Leadership support from all levels of management will help assure that the program is used and will succeed. Screen and select your drivers carefully. This can help create a reliable, safe team. Without safe drivers, no organization is likely to have a good long-term safety record. Establish clear hiring standards and a thorough screening process for anyone who drives on company business. Train and Manage your drivers on a regular ongoing basis. This is essential in helping to ensure that drivers are following fleet safety rules and driving safely. All drivers should have access to information on safe driving strategies and techniques, including instruction in defensive driving. Manage crashes when they occur. This will help mitigate costs and help you to understand your exposures and can reduce the potential for future losses. Establish written policies and procedures and formalize a plan for vehicle inspection, repair, and maintenance. This can help reduce costly, unexpected breakdowns, and can assist in avoiding crashes due to faulty equipment. At Pacific Driver Education, we take advantage of our driving risk expertise and extensive experience to help our customers design their fleet safety programs and help protect what is important to their business. Customized Fleet Training Fleet vehicle crashes are one the most costly of injury claims for business. The average cost of a loss related to vehicle accidents is about twice the cost of the average workplace injury. Without a formal fleet safety program, you may be putting the welfare of your employees and company at risk. A generic safety program is better than none. But it is far more effective to specifically design a program for your employees, company and your fleet. A fleet safety program establishes the policies and procedures that are needed to help ensure a safe work environment. It can also help protect against liability from vehicle accidents. The road is one of the most dangerous places for your employees, so establishing a formal and ongoing program of screening, testing, inspection and training is essential. For any company with a fleet of vehicles of any size, a formal fleet safety plan can provide a number of advantages, including improved safety, employee satisfaction and the potential to improve fleet efficiency.

2: Fleet&DriverCare is a driver safety management company.

Fleet vehicle accidents are among the most costly of injury claims for business. The average cost of a loss related to vehicle accidents is approximately \$70, This is almost twice the cost of the average workplace injury (\$36.).¹ Without a formal fleet safety program, you may be putting the.

Click below and let us send you a free demo copy of our fleet driver training. No payment info required. Driver Safety Training For The Long Haul We believe in a proactive approach. Before your drivers begin their online training with us, they will go through a 20 minute assessment to determine their strengths and weaknesses. Each driver is then given a 15 page report, along with a customized training plan based on their unique results. In addition to periodic reinforcement training, if your organization utilizes driver monitoring technology, you can quickly use that data to create custom training plans based on real events that have occurred from during real driving situations in the real-world. Over 20 Training Courses Offered Including:
