The papers in this collection consist of correspondence to and from Walt Horan, interfiled and combined with other manuscripts and printed materials used in his official work. He served a total of eleven consecutive terms, from to , losing the election to Thomas Foley. He was a member of several sub-committees of the House Appropriations Committee: Horan was a Republican. Horan was born in Wenatchee, Washington, in . He worked as an orchardist in Wenatchee. Exceptions were made when the functions of an agency or bureau, for example, were modified, transferred, or ceased, or when a more comprehensive arrangement seemed desirable to bring all the papers having to do with same subject into closer proximity to simplify its use. The outgoing office correspondence constitutes a name-index arranged alphabetically by years and will be useful in certain approaches to the papers. For example, a searcher wishing to examine the known correspondence of a Mr. Brown of Spokane may easily determine that Mr. Horan wrote to him on February 15, , concerning the Rural Electrification Administration. Examination of the file of this agency will produce Mr. Horan may have had with other persons or Government agencies in connection with his reply, along with a copy of any printed material which Mr. Horan sent to Mr. Personal Correspondence and Invitations, Series 2: Outgoing Office Correspondence, Series 3: Includes correspondence and supporting documentation: Appropriations, Agriculture; Subseries 3. Appropriations, Army Civil Functions; Subseries 3. Appropriations, Interior; Subseries 3. Departmental, Series 5: Subject files, Series 6: Legislation, Series 7: Communications with Constituents, Series 8: Political, Series 9: Extension 1, first addition to collection Series Extension 2, second addition to collection Series

*Full committee consideration of H.R. [H.R. ] Department of Defense authorization for appropriations for fiscal year and H.R. [H.R. ] to authorize certain construction at military installations, and for other purposes.*

Good morning and thank you for joining us today at this exciting groundbreaking ceremony for Cheney Brothers Inc. We also want to recognize the people responsible for making the expansion of this fine company become a reality. However, before getting too far into recognition, I would like to take a moment to welcome our distinguished guests: We are privileged to have with us the Governor, the Honorable Rick Scott. With the Legislative session opening this week we really appreciate you taking the time to celebrate with us. Wanting to be here, but unable to attend because of their legislative responsibilities are: Deutsch and Trisha Duffy. As well as the Airport Authority Commissioners: The economic impact of this facility will bring about new jobs and a great multiplier effect on our Southwest Florida Region. Not only a substantial impact for Charlotte County, but healthy growth for the state of Florida. In fact it takes many people in both the Private Sector and the Public Sector working hundreds of hours behind the scenes, as a "Team; to make a project of this magnitude become a reality. Chris made the initial phone call to Cheney Brothers that started this whole ball rolling. Bruce Laishley from Southwest Land Developers, and his team, then picked up that ball and started running with it. They made the important introductions to potential businesses to prove to Cheney Brothers that the market in this region would sustain their local business needs. Thanks to Bruce and his team! The County Commission then supported and approved a variety of incentives to resolve development issues, such as the extension of utility infrastructure to this site. Our goal has been to provide incentives that help to overcome infrastructure shortfalls. Brian Starford and Tara Poulton at the Southwest Florida Water Management District also worked diligently to expedite the environmental permitting approvals needed for this project. Your directive has made a big difference. Also, a special thank you to the Airport Authority for granting the right of way for Cheney Way and partnering with your master stormwater permit to provide greater access to this site! Strong partnership I would be remiss if I did not mention the strong partnership we have here in Charlotte County within the business community, the Enterprise Charlotte Economic Council. We have a strong group of involved Business leaders who are unmatched. I would like to thank, in advance, our partners who will be assisting in the training and recruiting of potential employees for Cheney Brothers. Your future support will be critical to the ultimate success of this project. Florida Power and Light is recognized as a major player and partner in Economic Development statewide and this project is no exception. FPL has jumped in here and statewide, with a new development rate structure that is helping to attract more jobs to Florida. Thank you very much, Byron, for your continued confidence in Charlotte County. We are truly privileged to have you here in our community! Jane Moore points to the beads she wants while her husband of 63 years, Jack, just watches the oversized jester handing out beads.

*of H.R. , and I would like to discuss a need for this bill to preserve fiscal sanity and Federal health policy. As reported in the Washington Post last week, U.S.*

Section of the Agricultural Act of as redesignated by section b 1 B is amended-- 1 by striking the section heading and inserting the following: The 5-month period shall be established during the period beginning April 1, and ending October 31, of a year. The Secretary may not exclude irrigated or irrigable acreage not planted to alfalfa when exercising the authority under this paragraph. Milk used for nonfat dry milk or butter shall not be supported under this section. The support rate adjustment provided under this subsection shall be effective only for the calendar year applicable to the estimate of the Secretary. After the support rate adjustment terminates, the support price shall be the level provided under subsection b 2. The milk equivalent value at 3. The monthly Class IV differential shall be the amount, if any, by which the support rate for milk in effect under section of the Agricultural Act of 7 U. The amount shall be remitted to the Administrator of the Account. The proportion of the total proceeds payable to each person shall be the same proportion that the skim milk and butterfat used by the person to produce Class IV final products during the preceding month is of the total skim milk and butterfat used by all persons during the preceding month to produce Class IV final products. Section of the Agricultural Act of 7 U. A recourse loan made during the fiscal year prior to the tariff rate quota being established at 1,, or more short tons, raw value, under this section shall be modified by the Secretary into a nonrecourse loan for the remainder of the term of the loan. The penalty for cane sugar shall be equivalent to 1 cent per pound. The penalty for beet sugar shall bear the same relation to the penalty for cane sugar as the marketing assessment for sugar beets bears to the marketing assessment for sugarcane. Title V of the Agricultural Act of 7 U. Haying and grazing on the acres shall not be restricted. The program crop shall be eligible for loans. Notwithstanding any other provision of law, the monthly Commodity Credit Corporation interest rate applicable to loans provided for agricultural commodities by the Corporation shall be basis points greater than the rate determined under the applicable interest rate formula in effect on October 1, Undermarketings of quota peanuts from the previous year shall not be considered. A decrease shall occur only once, and shall be applicable only to the marketing year. Any farm poundage quota transferred under this paragraph shall not result in any reduction in the farm poundage quota for the transferring farm if sufficient acreage is planted on the receiving farm to produce the quota pounds transferred.

*Full Committee consideration of H.R. Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of , H.R. to authorize appropriations for fiscal year for conservation, exploration, development and use of the Naval petroleum reserves and naval oil shale reserves and for other purposes.*

The reports on business and financial conditions for the several Federal Reserve districts continue to emphasize the prevalence of an unabated business activity due to persistent demand for goods at all stages of production. The eagerness and sustained buying capacity of the ultimate consumer appear to be the. Curtailment of industrial operations because of the coal shortage had been only sporadically enforced up to the middle of the month, but the imminency of drastic action looking toward the conservation of vanishing coal supplies was already apparent at that date, the shortage being especially acute in the Kansas City. Notwithstanding the demoralizing effects upon general business that might have been expected to accompany any widespread industrial disturbance in the basic industries of the country, there was virtually unanimous testimony concerning the increase in the volume of wholesale and retail trade in terms of price measurement. In several districts emphasis is placed upon the increase in physical volume of sales, district No. Louis the sales of wholesale dry goods in certain sections. Orders placed with wholesale boot and shoe concerns, however, were improving and even exceptionally heavy in some cases. Widespread discontent on the part of many classes of workers is asserted to be a further cause of diminished output. There is possibly a tendency to exaggerate the magnitude of buying operations by thinking of purchases and sales in terms of prewar prices, instead of considering them in relation to money incomes on the new price basis. Nevertheless, in view of the ephemeral character of the industrial situation in the present transition period, more conservative buying might have been expected. But there are not as yet many indications of a desire to resort to the practice of that economy which has been urged upon the country for so many months. Paralleling the trade activities just outlined, a growing volume of speculation has developed. In the review of business and financial conditions during October it was pointed out that speculative activity throughout the country was reaching dangerous levels. This activity continued unabated until, early in November, the Federal Reserve Banks advanced discount rates. The advance was slight, but interpreted, as it was, as indicating a change of discount policy, it had a good deal of effect. Reports from the agricultural sections of the country indicate a considerable amount of crop damage due to excessive rains and insect pests. The quality of Oklahoma cotton has been damaged by rains, which have also interfered with cotton picking in district No. For the same reason, the sowing of winter wheat was delayed in districts No. A large area has been put in winter wheat in district No. Sowing was in progress in the Pacific Northwest, the probabilities being that the acreage would largely exceed that of The corn crop, although rain-damaged in certain localities, will, it is estimated, prove to be larger than that of except in districts No. The Kentucky and Tennessee yield, as reported from district No. The crop grown in district No. Bright tobacco is bringing 40 to 70 cents per pound and the export demand is very insistent. The quality of the crop in Pennsylvania is poor and production below the year average, as the result of adverse weather conditions. With the year ending October 31, district No. Florida citrus fruits are not maturing as well as they should and the market is said to be poor. The grain movement has been slow, the Minneapolis district reporting that the farmers are holding their grain for higher prices, while district No. Until the middle of the month, wheat prices in Kansas City showed continued strength; oats remained practically unchanged, and corn advanced after a price recession. Louis Receipts of wheat at 16 interior markets during October were 50,, bushels, as compared with 65,, bushels during October, Receipts of corn and oats show a marked falling off from the totals for the same month last year, being 12,, bushels and 24,, bushels, respectively, against 23,, bushels and 31,, bushels. Wheat flour production in October amounted to 15,, barrels, as compared with 14,, barrels in October, Receipts of cattle at 15 primary markets during October were somewhat in excess of the total for the same month last year, the respective figures being 2,, head and 2,, head, corresponding to index

numbers of and , while receipts during September, , were 1,, corresponding to an index number of Receipts of hogs declined markedly, being 2,, head in October, , corresponding to an index number of 98, as compared with 2,, head during October, , corresponding to an index number of Receipts during September, , amounted to 1,, the index number being Receipts of cattle at the six principal markets of the Kansas City district were 5 per cent larger during October than in the same month of the preceding year, but the totals for the month period were 8. The decrease is " attributed in part to the large transfer of cattle from the dry regions of the Northwest to the South, where a plentiful supply of feed abounds. The car shortage and a disposition to hold cattle on feed for higher prices are also considered as factors in the reduction of supplies of cattle on the markets. It is said that while this is taken as a sign that there are fewer hogs now in this country than last year, it is also contended that many hogs are being held back for fattening, as there is more corn in the country than at this time last year. Sheep receipts fell off in October 5. Receipts of cattle during October in the principal markets of the Chicago district also show a 6 per cent increase; although for the full 10 months the receipts decreased 7 per cent as compared with the corresponding period of the preceding year. Lumber stocks are exceptionally light, being reported as 75 per cent of normal in district No. Production in district No. On the other hand, district No; 12 reports a steady increase in orders at a time when a normal seasonal decline might have been expected. In general, building activity has been unprecedented for this time of the year. According to district No. Notwithstanding the heavier receipts, the market has kept up well and prices continue excellent. Export demand is increasing and there is a large domestic demand for both rosin and turpentine. Louis "3 figures for the Week ending October 25, which were 2,, tons in excess of the earlier figures] the speed up being due to preparations for the impending coal strike. Anthracite coal shipments during the month of September were 6,, tons, corresponding to an index number of , as compared with 5,, tons during September, corresponding to an index number of The output of beehive coke decreased from 1,, tons during September to 1,, tons in October. Recently the region produced , for its own coking beside a much larger tonnage to outside consumption. Wyoming has surpassed Pennsylvania as an oil producing State and now ranks seventh. Labor conditions in the zinc and lead mining districts are reported to be improving, although cessation of operations was threatened by the coal strike. Transportation difficulties have been severe, shippers utilizing broken cars after making local repairs, while empty coal cars, trucks, and teams have been used for hauling lead in order to release cars for zinc transport. There have been only slight advances in the price of zinc ores. No surplus stocks have been moved. Lead prices have advanced, however, and surplus stocks have been used up. Except in cases of enforced idleness due to industrial disturbances, the chief lines of manufacture continue to exhibit the marked activity characteristic of the preceding months,, rising prices of raw materials not operating to relieve the pressure of buying orders, although here and there counseling caution in the accumulation of producers' stocks. Corroborative testimony comes from district No. There appears to be uncertainty regarding the probability of a shift of demand from the higher to the medium grades. The percentage of woolen machinery in operation in the New England mills has never been greater at this time of year. As for the New England cotton mills, those manufacturing gray goods are reported to have had a phenomenal business which has resulted in many contracting for their entire output for several additional months. The scarcity and abnormally high prices of the finer qualities of cotton have led to the buying of more Egyptian and Peruvian cotton by the fine goods mills. Present indications are for higher prices of the finished product six months hence. It is significant that district No. The most recent available news concerning cotton yarns is to the effect that trading has become slack, the principal demand now coming from knitters. Prices remain stationary at achieved high levels. Summarizing the prevalent conditions in the hide and leather using industries, it appears that stocks of the coarser grades of hides are accumulating somewhat. In the boot and shoe industry heavy orders indicate sustained demand at present or even higher prices. Up to the middle of the month the coal strike was not yet proving a factor to be reckoned with in the production of iron and steel, either in the Philadelphia or the Cleveland districts, while the Birmingham region reported business to be very active. This does not mean that the mills in district No. The steelmills in the Chicago district were gradually increasing the

**FULL COMMITTEE CONSIDERATION OF H.R. 7265 . H.R. 7252 . H.R. 7301 .

scale of their operations, but excessively short coal supplies were causing apprehension. The leading interests are inclined to resist the pressure to increase the schedule of prices for steel products, but material for quick shipment is commanding ever higher premiums. Crude and semifinished materials show a pronounced price rise, while it is reported from Cleveland that the prices of semifinished steel, pig iron, and scrap are all several dollars higher than a month ago. Unfilled orders of the United States Steel Corporation increased from 6,, tons at the end of September to 6,, tons at the end of October, the respective index numbers being and Wherever conditions of employment are referred to, evidence is adduced to show shortage of supply. A temporary surplus in district No. In view of the disturbances to production occasioned by strikes, with no counterbalancing diminution of buying pressure, it is not surprising to note a slight increase in prices for October. The index number of wholesale prices of the Bureau of Labor Statistics increased from in September to in October. A new high level for raw materials was reached, the index number rising from in September to Among the subgroups included in the group of raw materials forest products achieved a record figure, of , surpassing the previous September record of The index for farm products registered against for September. The animal products group alone declined slightly from to Bank clearings everywhere have been exceptionally heavy. The issue of new securities by domestic corporations during October is reported by district No. A very large number of preferred shares were put out. It is not surprising, in view of prevailing high interest rates and the uncertainty as to the length of time that may elapse before the investment rate falls, to find preferred shares to a certain extent taking the place of long-time bond issues. During the month sterling exchange, francs, marks and lire fell to new low levels, marks selling at 2. Lire were quoted at Since then there have been slight recoveries, but no improvement in the foreign credit situation to warrant any substantial or permanent rise in quotations.
