It sits in Western Asia, bordered by the Mediterranean Sea. The climate is hot and dry. This region is an ancient one, and people have been living here for thousands of years. Their religion is very important to them and they often have strict rules that may seem different than the rules most people in the United States live by. Remember, though, that for Muslims, the most important part of their faith is to love and serve God. Family is very important and most Muslims want peace. Parents want their children to be healthy and strong. Children want to play and make friends. Many countries in the Middle East are wealthy because they have large quantities of crude oil. The Middle East Vocabulary Ancient: Why is everything in the Middle East called very old or ancient? Everything there is called old or ancient mostly because a lot of it is. From what scientists can tell human civilization began in this area. They even call part of it the cradle of civilization. People always talk about oil in the Middle East and how important it is. Is that the only place oil comes from? Russia and the United States also have oil reserves. The problem is that the available oil is limited at it is a limited resource. This fossil fuel takes millions of years and the right conditions of organic materials, intense heat and intense pressure to develop. Humans are burning oil at a much faster rate than nature can replenish it.

Two or three minute class periods Grade Level Objective Students will be able to: Find the Middle East and North Africa on a map of the world, and know the location of the countries and capitals within the Middle East and North Africa. Understand and give examples of the diversity in the region, distinguishing from prevailing stereotypes. Understand and analyze the geographic history of the region, from its ancient empires to its 20th century colonial powers. Apply geographic knowledge to a newspaper article about the political future of the region. Evaluate the arguments made in the article, and the cultural perspective of the writer. Embark upon further study of the region, whether the unit concerns history or current affairs. It also ensures a basic geographical starting point for any unit plan about the region, or for any mini-unit delving into Middle Eastern current affairs. Background Throughout history, the geography of the Middle East has been at the heart of many of its most critical political and cultural moments. Gauge to what extent students actually have a geographic knowledge of the region. Come back together as a class for a short discussion before labeling the maps together. What is the Middle East? Where did the term come from? Is it a defined land mass, or can it have different definitions? As a class, come up with a list of qualities generally assumed to be similar about Middle Eastern countries. As students do this, point out anomalies. Egypt, Lebanon, Jordan and Syria have sizable Christian populations, and that more than 80 percent of Israeli citizens are Jewish. In Iran, the majority speaks Farsi also called Persian. If you do not have access to the Internet, make copies of almanac pages for each country or for the countries on which you want students to focus. Scatter the pages around the room, and have students move from station to station gathering the info from each page. In a summary paragraph of 10 sentences or less rubric below, summarize the time period, geographic reach and defining political and cultural traits of one of the following: Or, assign students one of the following, so as to make sure at least one person does each empire or caliphate.
