

1: Getting Ready For First Grade Math Worksheets - Printable Worksheets

Get Ready for Second Grade This workbook is packed with worksheets that will help students practice the core concepts featured in the second grade curriculum, from word study and math to reading and writing.

Our teaching strategies that can help make a more productive learning But rather than just dictate a set of rules the first day, encourage your students to collectively come up with a list of rules as well. Research has shown that when students share in the rulemaking they tend to follow them and hopefully, a lot of the rules that they brainstorm will mirror your own. Create a Class Webpage Create a user-friendly webpage i. Wordpress, Blogspot to help communicate information to students and parents. Keep the design simple and include the following: The best way to do this is to prepare seatwork for students to do as they come through the door. Creating learning center games beforehand will also ensure that every minute in class will be spent on fully engaged instructional time. Make sure you review your icebreakers so students may feel safe and comfortable in their new classroom quickly. Mail the letter a few weeks before school starts and include: Information about yourself, the supplies needed, what kids can expect the first day of school, school policies, classroom rules, curriculum overview, how parents can communicate you, as well as adult volunteer opportunities. In doing so, it also helps to give parents a variety of options text message, email, newsletter, website, phone to help cater to different communication styles. This will help you establish a rapport and build a solid partnership for the year. Prepare Bulletin Boards Bulletin boards are a proud classroom place to display student work, provide an easy reference for classroom assignments, or just act as a daily calendar. Dress up your board with fabric or construction paper and add visual elements like a title and graphics. Make it a place where students and parents alike look forward to visiting. Set Up the Classroom Classroom furniture should be arranged according to your teaching style—desks can be arranged into traditional rows, cooperative clusters, or a horseshoe shape. Dedicate the last available space to a class library filled with a variety of books and possibly a comfy chair or small couch. Your classroom will be your home away from home for the majority of the next year. Remember, the secret to a successful start of the new school year is in the details. Have a great year! Teachers, how do you prepare for the school year? Do you have any tips that you would like to share? Feel free to comment in the section below. We would love to hear your ideas. In addition to dealing with boundless energy levels and intense emotions, children preparing for 1st grade will face new responsibilities in school. Your child will learn to adjust to a longer school day, take more ownership of his homework, and learn to get around by himself. Skills Acquired During.

Kristen Smith Hello everyone! I hope that you are enjoying your last few days of summer. This year I will have 18 students in my class and am getting very excited to meet all of them! During the first week of school I focus on procedures and classroom habits while introducing my new group of students to life in kindergarten. I want them to go home saying that they had a great time at school and that they made friends. Keeping in mind that this might be the first time that many of our students have been to school five full days a week, I make sure that our first week is full of engaging activities. I posted a set of FREE first week of school lesson plans last year but wanted to change things up a bit this year. This year, my picture books of choice focus on interactive aka engaging and fun! On the first day of school, my school lets the students come right to the classroom. This means that my students will enter anytime between 7: During this time, I will have table activities set out for my students. Last year I used pattern blocks and templates. If you would like the recipe and freebie that goes along with the Magic Play Dough lesson, you can get it here. I tried to schedule my day so that we are learning procedures and classroom habits along side some engaging activities. When we get into our groove of school, all of our language and math lessons will occur before quiet time these plans mirror that. After quiet time is when we have more exploratory play and inquiry based activities. I usually teach a brief mini-lesson at the beginning of Exploration Centers so that students can select what they want to do that day and define their plan and purpose for their time. This helps them go even farther in their play. Day 2 Our second day of school happens to be a Wednesday which is also our chapel day. Therefore, we will discuss and practice those behaviors and expectations. Later in the day, we will begin to get to know each other better as well as draw self portraits. During exploration centers, we will begin to explore some of our science tools with a fun color mixing activity. Day 4 By Friday, most students are starting to get familiar with each other and the sequence of our day. Margie my assistant and I are both teaching an activity. These activities will be some of our first literacy centers and therefore, I want the kids to have small group instruction and practice using the materials. Friday afternoon we will have our first STEM activity. My students always love these activities and they help them to think deeper and critically about things. Our fist activity is a color activity that explores acids and bases. In kindergarten terms, the experiment will begin to introduce my students to different shades of colors. I am excited to meet my new group of students!

Award winning; Let's Get Ready For First Grade! is taking the nation by storm, helping parents, kids and educators prepare for First Grade. It's not a storybook or a workbook; it's a book that covers the First Grade curriculum.

Is your Kindergartener Ready for First Grade? After all, it was only a few months ago that these newly minted preschool grads were tiptoeing into the room. Now, in June, they know how to start a school day and work in a group. In just a few months, First Grade will be here. Expect your child to be tired and perhaps cranky for the first few weeks of school. Reassure yourself and your child: More Focus In first grade, teachers will work hard to help kids expand their capacity to focus. Back in kindergarten, the children most frequently worked in small groups, moving around the room from one activity to the next at short intervals. While first grade will continue this format, but with longer work-times, and there will be more times when the whole class works on one assignment. But do try to maintain some basic routines in your home. Experts agree that one of the best ways to help children learn to focus is to maintain as much consistency and predictability as possible. Finally, try to find at least some time most days when your child focuses on one quiet activity for at least 20 minutes, such as writing a warm, happy letter to Grandma. More Small Motor Activities Back in kindergarten, your child worked almost daily with markers and scissors, and the transition to first grade may be a breeze. But if your child did struggle a bit, summer is a great time to build strength and coordination. Instead, teachers and occupational therapists emphasize activities that strengthen coordination so that handwriting becomes easier. Reading and Math Groups In many schools, these targeted skills groups now start in kindergarten. In first grade, teachers will expect children to get more serious. Kids get there in small, structured academic groups. But if not, summer can be a good time to practice—as long as you keep the work engaging and low-key. For engaging, hands-on, standards-supporting activities, try visiting our Activities.
